Androids Chet Haase,2022-07-12 The fascinating inside story of how the Android operating system came to be. In 2004, Android was two people who wanted to build camera software but couldn't get investors interested. Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. Androids: The Team that Built the Android Operating System is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

The Influence of Japanese Art on Design Hannah Sigur,2008 During America's Gilded Age (dates), the country was swept by a mania for all things Japanese. It spread from coast to coast, enticed everyone from robber barons to street vendors with its allure, and touched every aspect of life from patent medicines to wallpaper. Americans of the time found in Japanese art every design language: modernism or tradition, abstraction or realism, technical virtuosity or unfettered naturalism, craft or art, romance or functionalism. The art of Japan had a huge influence on American art and design. Title compares juxtapositions of American glass, silver and metal arts, ceramics, textiles, furniture, jewelry, advertising, and packaging with a spectrum of Japanese material ranging from expensive one-of-a-kind art crafts to mass-produced ephemera. Beginning in the Aesthetic movement, this book continues through the Arts & Crafts era and ends in Frank Lloyd Wright's vision, showing the reader how that model became transformed from Japanese to American in design and concept. Hannah Sigur is an art historian, writer, and editor with eight years' residence and study in East and Southeast Asia. She has a master's degree from the Institute of Fine Arts, New York University, and is completing a PhD in the arts of Japan. Her writings include co-authoring *A Master Guide to the Art of Floral Design* (Timber Press, 2002), which is listed in *The Best Books of 2002* by *The Christian Science Monitor* and is now in its second edition; and *The Golden Ideal: Chinese Landscape Themes in Japanese Art*, in *Lotus Leaves*, *A Master Guide to the Art of Floral Design* (2001). She lives in Berkeley.
