**The Ringtone Dialectic** Sumanth Gopinath, 2013-07-19 The rise and fall of the ringtone industry and its effect on mobile entertainment, music, television, film, and politics. A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines “declines,” “reversals,” and “revivals” of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine “Gloriagate” scandal), the ringtone's narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone's relation to pop music (including

possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as “mobile music” and the emergence of cloud computing.

The Platform Economy Marc Steinberg, 2019-02-26 Offering a deeper understanding of today’s internet media and the management theory behind it Platforms are everywhere. From social media to chat, streaming, credit cards, and even bookstores, it seems like almost everything can be described as a platform. In *The Platform Economy*, Marc Steinberg argues that the “platformization” of capitalism has transformed everything, and it is imperative that we have a historically precise, robust understanding of this widespread concept. Taking Japan as the key site for global platformization,

Steinberg delves into that nation's unique technological and managerial trajectory, in the process systematically examining every facet of the elusive word platform. Among the untold stories revealed here is that of the 1999 iPhone precursor, the i-mode: the world's first widespread mobile internet platform, which became a blueprint for Apple and Google's later dominance of the mobile market. Steinberg also charts the rise of social gaming giants GREE and Mobage, chat tools KakaoTalk, WeChat, and LINE, and video streaming site Niconico Video, as well as the development of platform theory in Japan, as part of a wider transformation of managerial theory to account for platforms as mediators of cultural life. Analyzing platforms' immense impact on contemporary media such as video streaming, music, and gaming, *The Platform Economy* fills in neglected parts of the platform story. In narrating the rise and fall of Japanese platforms, and the enduring legacy of Japanese platform theory, this book sheds light on contemporary tech titans like Facebook, Google, Apple, and Netflix, and their platform-mediated transformation of contemporary life—it is essential reading for anyone wanting to understand what capitalism is today and where it is headed.

*medi@sia* T.J.M. Holden, Timothy J. Scrase, 2006-09-27 This new interdisciplinary book is the first comparative, case-based analysis of media panoply in (and out of) Asia today. Examining what the authors call the media/tion equation, the contributors demonstrate the multiple links between media, society and culture, and advance the claim that media is the key means through which Asians experience, understand, effect and are affected by the worlds containing them. Exploring a relatively neglected principle in cultural studies - that context counts - *medi@sia* highlights how the experiences of those encountering media messages differ depending on social, economic, political and ideational conditions. Balancing social, cultural and

media theory with empirical research, the essays in this collection provide a better understanding of the complex relationship between media and people's practices, values and behaviour in contemporary Asia.

Mobile Communication and Greater China Rodney Wai-chi Chu, Leopoldina Fortunati, Pui-Lam Law, Shanhua Yang, 2012-05-04 This edited volume is the first book-length study focusing entirely on mobile phone use in China. Drawing on examples from a wide range of contemporary situations in China and beyond, the contributors argue that the mobile phone is in fact an important means by which one can understand a rapidly changing China, and the developing culture of mobile phone usage reflects both the cultural norms and struggle of the people. Through a theoretical comparison of usage in the West and in China, the editors assert the uniqueness of China's experience, highlighting that Chinese society is being exposed simultaneously to a rapid process of industrialization and cyberization. The contributors maintain that such density of experience under a compressed period combined with a thick cultural heritage and a country still under a dictating rule provides a unique situation and offers deep insights into Chinese culture in general. This work will be of great interest to all students and scholars of Asian communication studies, ICT and Chinese culture and society.

**Regionalizing Culture** Nissim Otmazgin, 2013-09-30 The political economy of popular culture -- Popular culture and the East Asian region -- Japan's popular culture powerhouse -- The creation of a regional market -- Japan's regional model -- Conclusion: Japanese popular culture and the making of East Asia.

queerqueen Claire Maree, 2020-06-30 From the twins Osugi and Peeco to longstanding icon Miwa Akihiro, Claire Maree traces the figure of the Japanese queerqueen, showing how a diversity of gender identifications, sexual orientations, and discursive styles are commodified and packaged

together to form this character. Representations of gay men's speech have changed in tandem with gender norms, increasingly crossing over into popular media via the body of the authentic gay male up to and including the current LGBT boom in Japan. In this context, queerqueen demonstrates how commercial practices of recording, transcribing, and editing spoken interactions and use of on-screen text encode queerqueen speech as inherently excessive and in need of containment. Tackling questions of authenticity, self-censorship, and the restrictions of heteronormativity within this perception of queer excess, Maree shows how queerqueen styles reproduce stereotypes of gender, sexuality, and desire that are essential to the business of mainstream entertainment.

**Routledge Handbook of New Media in Asia** Larissa Hjorth,Olivia

Khoo,2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future, today we are seeing a much more complex picture of contesting new media practices and production. As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices, boundaries between art, new media, and the everyday are transformed. This Handbook addresses the historical, social, cultural, political, philosophical, artistic and economic dimensions of the region's new media. Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions. The Routledge Handbook of New Media in

Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia. It provides an authoritative, up-to-date, intellectually broad, conceptually cutting-edge guide to the important aspects of new media in the region – as the first point of consultation for researchers, advanced level undergraduate and postgraduate students in fields of new media and Asian studies.
