Mastering Java 2, J2SE 1.4 John Zukowski,2006-02-20 The 1.4 version of Java 2 Standard Edition provides many new programming capabilities while making plenty of old tasks easier. But without reliable guidance, you'll find it hard to take advantage of even a fraction of what the new SDK has to offer. Filled with detailed coverage of the new technology, step-by-step instruction, and tips from an acclaimed Java consultant and author, *Mastering Java 2, J2SE 1.4* is the resource you'll want to keep within easy reach. Coverage Includes: * Understanding the Java programming language * Building forms with the Swing component set * Creating superior graphics with the Java 2D API * Supporting advanced data structures with the Collections API * Improving the speed of your Java applications * Taking advantage of Swing's support of drag and drop * Understanding OOP concepts, including UML * Working with Java's new assertion capabilities * Using Java's new I/O capabilities: nonblocking read and write operations, application preferences, and logging * Solving tough printing challenges * Working with installation options, including Java Plug-in and Java Web Start * Working with multiple threads and timer tasks

Java Collections John Zukowski,2008-01-01 The Collections Framework is supplied with all versions

of the Java 2 platform and provides programmers with incredibly efficient ways to manipulate data. However, given the large number of methods and classes in this library, using them correctly is hardly a cakewalk. Well-known columnist and bestselling author John Zukowski gives the Java professional exactly what he or she needs to know about this vital library in order to maximize productivity. This practical book contains comprehensive coverage of the important Collections Framework from the working programmer's point of view, while staying away from academic abstractions. Java Collections leads you through the standard Java support for maintaining abstract groups of data, from the historical collection classes available since the inception of Java time, through the Collections Framework introduced with the Java 2 platform, and on to third-party alternative libraries for times when the standard support isn't enough. If you're working with data in Java programs, you need to understand the Collections Framework. Let Zukowski's Java Collections be your guide!

C++ FAQs Marshall P. Cline, Greg Lomow, Mike Girou, 1998-12-11 In a concise and direct question-and-answer format, C++ FAQs, Second Edition brings you the most efficient solutions to more than four hundred of the practical programming challenges you face every day. Moderators of the on-line C++ FAQ at comp.lang.c++, Marshall Cline, Greg Lomow, and Mike Girou are familiar with C++

programmers' most pressing concerns. In this book, the authors concentrate on those issues most critical to the professional programmer's work, and they present more explanatory material and examples than is possible on-line. This book focuses on the effective use of C++, helping programmers avoid combining seemingly legal C++ constructs in incompatible ways. This second edition is completely up-to-date with the final ANSI/ISO C++ Standard. It covers some of the smaller syntax changes, such as mutable; more significant changes, such as RTTI and namespaces; and such major innovations as the C++ Standard Library, including the STL. In addition, this book discusses technologies such as Java, CORBA, COM/COM+, and ActiveX—and the relationship all of these have with C++. These new features and technologies are iconed to help you quickly find what is new and different in this edition. Each question-and-answer section contains an overview of the problem and solution, fuller explanations of concepts, directions for proper use of language features, guidelines for best practices and practices to avoid, and plenty of working, stand-alone examples. This edition is thoroughly cross-referenced and indexed for quick access. Get a value-added service! Try out all the examples from this book at www.codesaw.com. CodeSaw is a free online learning tool that allows you to experiment with live code from your book right in your browser.

Review of Progress in Quantitative Nondestructive Evaluation Donald O. Thompson,Dale E. Chimenti,2013-11-11 These Proceedings, consisting of Parts A and B, contain the edited versions of most of the papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at Bowdoin College, Brunswick, Maine on July 28 to August 2, 1996. The Review was organized by the Center for NDE at Iowa State University, in cooperation with the American Society of Nondestructive Testing, the Ames Laboratory of the USDOE, the Federal Aviation Administration, the National Institute of Standards and Technology, and the National Science Foundation Industry!University Cooperative Research Centers program. This year's Review of Progress in QNDE was attended by approximately 400 participants from the U.S. and many foreign countries who

presented over 350 papers. As usual, the meeting was divided into 36 sessions, with as many as four sessions running concurrently. The Review covered all phases of NDE research and development from fundamental investigations to engineering applications or inspection systems, and it included many important methods of inspection techniques from acoustics to x-rays. In the last eight to ten years, the Review has stabilized at about its current size, which most participants seem to agree is large enough to permit a full-scale overview of the latest developments, but still small enough to retain the collegial atmosphere which has marked the Review since its inception.

Beginning J2EE 1.4 James Weaver, Kevin Mukhar, James Crume, 2008-01-01 *This book is more than simply a reprint of material already freely available on the Web (I'm looking at you, The J2EE Tutorial). * Concentrates on the parts of J2EE that readers find most interesting, accessible, and relevant for the start of their professional career – JSP and Servlets, rather than in depth coverage of EJB—helps reader accomplish something and may spark interest for further exploration of J2EE. * This title will concentrate on web development (using JSP and Servlets) but still be aimed at programmers who want to become J2EE developers – so it will be a title for the Java category, not JavaServer Pages.
