Android Tablets for Seniors in easy steps Nick Vandome, 2013-06-05 Tablet computers are beginning to appear everywhere on the digital landscape and, at first sight, they can be slightly daunting in terms of what they can do and how to make best use of them. Tablets are by no means a passing gimmick, however, and in many ways they have the potential to replace desktop or laptop computers in many households. Tablets are powerful, portable and packed full of functionality for most computing tasks. Android is the operating system on a wide range of tablets and it is one of the major players in this market. As the appetite for mobile computing increases, the use of Android tablets is also likely to increase significantly. Android Tablets for Seniors in easy steps looks at the range of devices available and their specifications and functionality. It also explains the Android operating system and how to use it on your tablet in terms of navigating around, performing all of your favourite tasks, getting online and turning your tablet into a mobile library and entertainment centre. Android tablets offer an interactive, touch screen experience and the book shows how to get up and running with this so that you can quickly find your way around with Android. It also details how you can use the Android settings to ensure that your tablet looks and works in exactly the way that you want. Apps are the programs that give Android tablets their functionality and this is covered in depth, from using the preinstalled apps, to downloading and using the huge selection available from the Google Play Store, which is linked directly to Android tablets. It also shows how to get the best apps for popular activities such as travel, health and wellbeing, family history and online shopping. Online connectivity is a vital element for tablets and the book looks at connecting to the web via Wi-Fi, using email, making phone and video calls to family and friends with Skype and diving into the world of social networking. Security on tablets is just as important as on any other computer and this is covered in terms of preventing access to

your tablet and staying safe online and when using your apps. Overall, *Android Tablets for Seniors* in easy steps shows the value of having one of these devices and presents clear and visually attractive advice, in larger type for easier reading, about joining the latest computer revolution so that you can feel confident about participating in the world of mobile computing. The book features the Google Nexus but is applicable to all tablets running the Android operating system.

Android Programming Concepts Trish Cornez,Richard Cornez,2015-10-01 Using a hands-on, student-friendly approach, *Android Programming Concepts* provides a comprehensive foundation for the development of mobile applications for devices and tablets powered by Android. This text explores Android Java and the Android SDK, the implementation of interactivity using touchscreen gesture detection and sensors, and current concepts and techniques for constructing mobile apps that take advantage of the latest Android features. Each chapter features a collection of well-designed and classroom tested labs that provide clear guidance of Android concepts. Each lab is geared toward one or two specific Android concepts, which eliminated distractions and gives the reader better focus on the concepts at hand.

Android on x86 Iggy Krajci,Darren Cummings,2014-01-23 *Android on x86: an Introduction to Optimizing for Intel® Architecture* serves two main purposes. First, it makes the case for adapting your applications onto Intel's x86 architecture, including discussions of the business potential, the changing landscape of the Android marketplace, and the unique challenges and opportunities that arise from x86 devices. The fundamental idea is that extending your applications to support x86 or creating new ones is not difficult, but it is imperative to know all of the technicalities. This book is dedicated to providing you with an awareness of these nuances and an understanding of how to tackle them. Second, and most importantly, this book provides a one-stop detailed resource for best practices and procedures associated with the installation issues, hardware optimization issues, software requirements, programming tasks, and performance optimizations that emerge when developers consider the x86 Android devices. Optimization discussions dive into native code, hardware acceleration, and advanced profiling of multimedia applications. The authors have collected this information so that you can use the book as a guide for the specific requirements of each application project. This book is not dedicated solely to code; instead it is filled with the information you need in order to take advantage of x86 architecture. It will guide you through installing the Android SDK for Intel

Architecture, help you understand the differences and similarities between processor architectures available in Android devices, teach you to create and port applications, debug existing x86 applications, offer solutions for NDK and C++ optimizations, and introduce the Intel Hardware Accelerated Execution Manager. This book provides the most useful information to help you get the job done quickly while utilizing best practices.

Black Cat Weekly #84 Stacy Woodson ,Bev Vincent ,Hal Charles,Bryce Walton ,Lester del Rey ,Richard Wilson, Frank Kane ,Ray Cummings,Paul A. Torak ,Noel Loomis,2023-04-08 Our 84th issue features a pair of original mysteries from Bev Vincent and Stacy Woodson. Plus we have a Bryce Walton Hollywood crime story and a Frank Kane mystery novel (featuring detective Johnny Liddell). And, of course, a solve-it-yourself puzzler from Hal Charles. On the science fiction side, we have an anti-war story from Richard Wilson, a UFO story from Paul Torak, a rather silly science fiction/detective story from Noel Loomis, and a time-travel tale from Lester del Rey. Plus a pre-Golden Age science fiction novel from oldtime master Ray Cummings: *The Man on the Meteor*, which appeared in *Science and Invention* in 1924, two years before *Amazing Stories* and the genre of science fiction were launched! Here's the complete lineup: Mysteries / Suspense / Adventure: "The River Heights Ripper," by Bev Vincent [Michael Bracken Presents short story] "Jellybean Justice," Hal Charles [Solve-It-Yourself Mystery] "Before the Highwaymen," by Stacy Woodson [Michael Bracken Presents short story] "Actor's Showcase," by Bryce Walton [short story] *Crime of Their Life*, by Frank Kane [novel] Science Fiction & Fantasy: "The Day They Had a War," by Richard Wilson [short story] "Flight 18," by Paul A. Assistive Technology Assessment Handbook Stefano Federici, Marcia Scherer, 2017-11-23 *Assistive Technology Assessment Handbook*, Second Edition, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference

guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook: gives readers a toolkit for performing assessments; describes the roles of the assessment team members, among them the new profession of psychotechnologist; and reviews technologies for rehabilitation and independent living, including brain–computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.
