A Mission from God James Meredith, 2012-08-07 "I am not a civil rights hero. I am a warrior, and I am on a mission from God." -James Meredith James Meredith engineered two of the most epic events of the American civil rights era: the desegregation of the University of Mississippi in 1962, which helped open the doors of education to all Americans; and the March Against Fear in 1966, which helped open the floodgates of voter registration in the South. Part memoir, part manifesto, A Mission from God is James Meredith's look back at his courageous and action-packed life and his challenge to America to address the most critical issue of our day: how to educate and uplift the millions of black and white Americans who remain locked in the chains of poverty by improving our public education system. Born on a small farm in Mississippi, Meredith returned home in 1960 after nine years in the U.S. Air Force, with a master plan to shatter the system of state terror and white supremacy in America. He waged a fourteen-month legal campaign to force the state of Mississippi to honor his rights as an American citizen and admit him to the University of Mississippi. He fought the case all the way to the Supreme Court and won. Meredith endured months of death threats, daily verbal abuse, and round-the-clock protection from federal marshals and thousands of troops to became the first black graduate of the University of Mississippi in 1963. In 1966 he was shot by a sniper on the second day of his "Walk Against Fear" to inspire voter registration in Mississippi. Though Meredith never allied with traditional civil rights groups, leaders of civil rights organizations flocked to help him complete the march, one of the last great marches of the civil rights era. Decades later, Meredith says, "Now it is time for our next great mission from God. . . . You and I have a divine responsibility to transform America."

Pauline Elizabeth Hopkins Lois Brown, 2012-07-01 Born into an educated free black family in Portland, Maine, Pauline Elizabeth Hopkins (1859-1930) was a pioneering playwright, journalist, novelist, feminist, and public intellectual, best known for her 1900 novel Contending Forces: A Romance of Negro Life North and South. In this critical biography, Lois Brown documents for the first time Hopkins's early family life and her ancestral connections to eighteenth-century New England, the African slave trade, and twentieth-century race activism in the North. Brown includes detailed descriptions of Hopkins's earliest known performances as a singer and actress; textual analysis of her major and minor literary works; information about her most influential mentors, colleagues, and professional affiliations; and details of her battles with Booker T. Washington, which ultimately led to her professional demise as a journalist. Richly grounded in archival sources, Brown's work offers a definitive study that clarifies a number of inconsistencies in earlier writing about Hopkins. Brown re-creates the life of a remarkable woman in the context of her times, revealing Hopkins as the descendant of a family comprising many distinguished individuals, an active participant and supporter of the arts, a woman of stature among professional peers and clubwomen, and a gracious and outspoken crusader for African American rights.

Cerebral Cortex Alan Peters, John H. Morrison, 1999-09-30 This volume of Cerebral Cortex is dedicated to Sir John Eccles, who was an active member of the advisory board for the series until his death in May 1997. His input as to what topics should be covered in future volumes of this series will be sorely missed. The present volume is concerned with neurodegenerative disorders and age related changes in the structure and function of the cerebral cortex, a topic that has attracted increasing interest as longevity and the number of aged individuals in the population increase. Although much of the research on the neurodegenerative effects of aging has been centered on Alzheimer's disease, most of the aging population will not be afflicted by this disease. They will, however, be affected by the consequences of normal aging, so the first few chapters of this volume are concerned with that topic. Chapter 1, by Marilyn S. Albert and Mark B. Moss, gives an account of the cognitive changes that accompany normal human aging. Chapter 2, by Mark B.

Multilevel Converters: Analysis, Modulation, Topologies, and Applications Gabriele Grandi, Alex Ruderman, 2019-10-14 This book is a collection of scientific papers concerning multilevel inverters examined from different points of view. Many applications are considered, such as renewable energy interface, power conditioning systems, electric drives, and chargers for electric vehicles. Different topologies have been examined in both new configurations and well-established structures, introducing novel and particular modulation strategies, and examining the effect of modulation techniques on voltage and current harmonics and the total harmonic distortion. Furnace Tapping 2022 Joalet D. Steenkamp, Dean Gregurek, Quinn G. Reynolds, Gerardo Alvear Flores, Hugo Joubert, Phillip J. Mackey, 2022-02-03 No pyrometallurgical smelter can operate without some form of tapping system. It is the one thing all smelters have in common. This collection discusses this meeting point of the science, technology, and skill involved in this process. The tap-hole design process includes a set of design criteria, which need to be revised as the results of laboratory, computational fluid dynamics (CFD), and time-and-motion studies become available. The tap-hole life cycle is considered in this volume, with authors addressing the requirements for installation and operability as well as for maintenance. Matters such as online monitoring of the tap-hole wear, handling of liquid products, and extraction of fumes are all discussed. Although much has been done to make the tapping process as automatic as possible, tapping of smelters cannot be done without labor. Tap floor operators work in harsh environments where safety is of utmost importance. Selection of suitable personnel and intensive training is required and is discussed in this collection.

James Hamilton of South Carolina Robert Tinkler, 2004-09-01 An esteemed planter, politician, and military leader influential in the affairs of both South Carolina and Texas, James Hamilton (1786--1857) so declined in reputation during the last twenty years of his life that his home state refused to acknowledge him when he died. Robert Tinkler's superb, first-published biography of Hamilton conveys the enormous drama, dignity, and pathos that marked Hamilton's pursuit of the greatness achieved by his prominent Revolutionary-era forebears and his subsequent profound reversal brought on by debt. While a member of Congress during the 1820s, Hamilton came to champion states' interests over a strong central national government. As governor of South Carolina, 1830--1832, he reached the pinnacle of his political and social glory when he presided over the Nullification Crisis of 1832. Hamilton's undoing began with a series of ill-advised cotton speculations that left him deeply and very publicly in arrears by 1839. He desperately sought relief -- even supporting the Compromise of 1850 in hopes of monetary benefit, while alienating his old allies in the process. To his fellow southerners, Hamilton became a scourge and embarrassment as one who compromised his political beliefs because of fiscal distress. Perhaps even more than his political apostasy, Hamilton's unforgivable offense may have been to remind planters of their own struggles with

chronic debt. Tinkler's extraordinary research into both Hamilton's life and the dynamics of reputation and debt in the antebellum South suggests that many contemporaries simply wished to forget Hamilton's plight so as to avoid facing their own financial reality. Possessing the weight of tragedy, James Hamilton of South Carolina documents a powerful man's achievements and the events and personal flaws that led to his fall.
