Children's Social Competence in Context Barry H. Schneider,1993 This book provides a comprehensive and critical overview of current knowledge about family, school and cultural influences on children's relations with others and the emergence of social competence. Ongoing research in these areas is considered in the light of recent advances in the field of child development, especially the enhanced appreciation of the ways these context factors operate in conjunction with characteristics of the individual and with the process of development. This book will be of interest to students and researchers in psychology, human development, family relations, special education and sociology.

The Social Psychology of Education Robert Stephen Feldman,Robert S. Feldman,1990-07-27 This book examines the ways in which the theory and data of social psychology can be applied to teaching, learning, and other experiences in schools. Its focus ranges in level from the individual (e.g., student attitudes and attributions), to the teacher-student interaction, to the impact of society (e.g., racial and cultural influences on school performance). The editor and distinguished contributors have two major purposes. The first is to illustrate the scope and sophistication of the emerging field known as the social psychology of education. The second is to provide solid, informed suggestions to educators for the amelioration of current educational problems. To that end, each author explicitly discusses implications for educational practice.

Cases on Collaboration in Virtual Learning Environments: Processes and Interactions Russell, Donna,2009-10-31 Using a case study analysis, this book provides a unifying perspective for discussing the viability of collaborative virtual spaces as training programs for insurance brokers, forums to support at-risk university students, simulations of historical places, means to aid autistic children learn social skills, repositories for digital libraries, collaborative spaces designing new university programs and emergency response training--Provided by publisher.

Young Friends Sue Roffey,Tony Tarrant,Karen Majors,1994 The development of children's self-awareness and social skills enables them to find increased enjoyment in friendships. Improving basic communication skills helps children to become more effective learners. The authors' experience as educational psychologists, which is supported by research data, points to the importance of the social climate of the school, classroom and playground. What happens between children can affect how they learn and their whole attitude to school. The authors believe that co-operative and collaborative skills are of as much lasting benefit to individuals as becoming numerate and literate and that positive social experiences for all children need not be left to chance. This book sets out

to explore the different social contexts that - children find themselves in at school. It aims to link principles and theory with practical application by providing activities for developing a positive social climate in an educational setting.

Fun with Algorithms Alfredo Ferro,Fabrizio Luccio,Peter Widmayer,2014-05-28 This book constitutes the refereed proceedings of the 7th International Conference, FUN 2014, held in July 2014 in Lipari Island, Sicily, Italy. The 29 revised full papers were carefully reviewed and selected from 49 submissions. They feature a large variety of topics in the field of the use, design and analysis of algorithms and data structures, focusing on results that provide amusing, witty but nonetheless original and scientifically profound contributions to the area. In particular, algorithmic questions rooted in biology, cryptography, game theory, graphs, the internet, robotics and mobility, combinatorics, geometry, stringology, as well as space-conscious, randomized, parallel, distributed algorithms and their visualization are addressed.

The Puzzle of the Gospels Peter Vardy,Mary E. Mills,2015-02-24 First Published in 2015. The gospels tell a story. There are many types of story ranging from fiction through biographies to attempts at historical accounts. Even so-called 'true' stories will be affected by the perception of the writer. It is impossible to present any book without taking the viewpoint of the author into account - which is one reason why this book will be devoting considerable time to understanding the purpose and intention of the individual gospel writers. Matthew, Mark, Luke and John present different accounts of the life and death of Jesus of Nazareth, as one might expect from four people who, although they use some common material, nevertheless present this material in distinctive ways. This book will be concerned with helping you, the reader, to understand the gospel stories and how they came to be written; to bring to light the implicit references that were being made of which modern readers may be unaware; and also to consider the issue of the truth of the stories.

Complex Dynamics and Renormalization Curtis T. McMullen,1994-12-19 Addressing researchers and graduate students in the active meeting ground of analysis, geometry, and dynamics, this book presents a study of renormalization of quadratic polynomials and a rapid introduction to techniques in complex dynamics. Its central concern is the structure of an infinitely renormalizable quadratic polynomial $f(z) = z^2 + c$. As discovered by Feigenbaum, such a mapping exhibits a repetition of form at infinitely many scales. Drawing on universal estimates in hyperbolic geometry, this work gives an analysis of the limiting forms that can occur and develops a rigidity criterion for the polynomial f . This criterion supports general conjectures about the behavior of rational maps and the structure of the Mandelbrot set. The course of the main argument entails many facets of modern complex dynamics. Included are foundational results in geometric function theory, quasiconformal mappings, and hyperbolic geometry. Most of the tools are discussed in the setting of general polynomials and rational maps.
