Claiming Crusher Jordan Marie,2015-08-18 I've claimed her... She's mine.Crusher The moment I saw her I knew I was in trouble. I just didn't care.Once I knock down her walls and get a taste, I know she's it.I'll have her and no one will get in my way----not even my club.She's trying to run. That won't happen.I'll use whatever I can just to keep her.I'm an expert at making women give me what I want.Dani just doesn't realize who she's dealing with yet.She will.Dani I'm running.I'm have secrets that will kill me someday. I need to stay ahead of them.I run straight into his arms.Zander's trouble. I know, because he sets my body on fire.One taste of him and I keep going back, even when I shouldn't.All I need is his body, his touch and his deliciously dirty mouth.He's not mine to claim.One more taste and I'll leave.Before my past finds me...

Mine Planning and Equipment Selection 2004 Monika Hardygóra,Gabriela Paszkowska,Marek Sikora,2004-08-15 Spearheading the promotion of international technology transfer in the fields of mine planning, mining systems design, equipment selection and operation techniques, the International Symposium on Mine Planning and Equipment Selection is recognised by the mining society as a key annual event in highlighting developments within the field. Here in this volume, proceedings from the thirteenth annual symposium concentrate on the following major topics: * open pit and underground mine planning, modelling and design * geomechanics * mining and processing methods * design, monitoring and maintenance of mine equipment * simulation, optimalization and control of technological processes * management, mine economics and financial analysis * health, safety and environmental protection. Including 147 papers from leading experts and authorities, Mine Planning and Equipment Selection undoubtedly provides valuable information and insight for a range of engineers, scientists, researchers and consultants involved in the planning, design and operation of underground and surface mines.

Construction, Demolition and Disaster Waste Management Erik K. Lauritzen,2018-09-03 Construction and Demolition Waste (CDW), from the construction, maintenance, renovation and demolition of buildings and structures, represents a large proportion of the waste in industrialized societies. Compared to other forms, such as household waste, more than 90% of CDW can be used as a resource and a substitute for construction materials, especially for primary, natural raw materials. Reuse, recovery and recycling depends on the quality and market for the materials, and the environmental impact of the processes for conversion of CDW from old structures to its use in new structures. However, the utilization today of CDW products as secondary resources is marginal. Most CDW is deposited or used as fill material, and the opportunities of high quality recycling are generally neglected. This book presents the opportunities for the sustainable and resource efficient utilisation of CDW, focusing on recycling of concrete and masonry as the major forms of CDW. The recycling of gypsum, timber, mineral wool, asphalt and other types are also described. Its aim is to present a chain of value and material streams in the transformation of obsolete buildings and structures into new buildings and structures. It takes a holistic view, focusing on the lifecycle economy (the circular economy) and integrated management aspects of various scenarios ranging from high industrial urban renewal to debris removal and management after disasters and conflicts. It is based on the author's 35 years of research and development combined with practical international experience within the demolition and recycling area. It addresses students, architects, civil engineers, building owners, public authorities and others working in urban planning, demolition and resource management in the building and construction sector and in the reconstruction of damaged buildings after disasters and wars.
