Job Reconnaissance Josh More, 2013-09-20 There is considerably more skill in the IT and security communities than is reflected in the jobs people are able to attain. Most people's limiting factor in their ability to get better jobs is not technical skills or even the soft skills necessary to do well in a new job. It is that getting a job is a completely different skill set and one that most people only

practice every few years. *Job Reconnaissance: Using Hacking Skills to Win the Job Hunt Game* explains the job hunting process, why the most commonly followed models fail and how to better approach the search. It covers the entire job hunt process from when to decide to leave your current job, research new possible job opportunities, targeting your new boss, controlling the job interview process and negotiating your new compensation and the departure from your current job. This is not a complete all-in-one job-hunting book. This book assumes that the reader is reasonably competent and has already heard most of the standard advice, but is having difficulty putting the advice into practice. The goal is to fill in the gaps of the other books and to help the readers use their technical skills to their advantage in a different context. The emphasis in *Job Reconnaissance* is for infosec and IT job seekers to leverage the same skills they use in penetration testing and recon toward job-hunting success. These skills include targeting, reconnaissance and profiling combined with a technical look at skills other career search books commonly miss. Covers the entire job hunt process from when to decide to leave your current job to the departure of your current job. Suggests how to research new possible job opportunities. Shows how to target your new boss, controlling the job interview process and negotiating your new compensation.

Through a prescriptive approach, Dalton explains how to wade through the Internet’s sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. 2020 Minnesota Directory of Search Firms and Recruiters Jane Lockshin, 2020-01-30 Information for Your Job Hunt - Databases and Directories - Used by Resume Writers, Outplacement Firms, Career Coaches, College Career Centers, and Individuals Since 1987/ Job hunters need to do many things to get a job - - call all their friends and relatives, answer ads, and send out hundreds, even thousands of letters and resumes in a targeted direct email, direct fax or direct snail mail campaign. Our online databases and directories are designed to help you in that last task - to get your personal cover letter and resume to the executive search firms that specialize in your field. Executive search firms work to fill management positions at top companies across the U.S. and abroad. It is estimated that almost two-thirds of executive positions are filled by executive search firms. Personnel agencies work to fill professional, technical, and administrative personnel at companies. The search firms and agencies in our database are hired and paid by companies that need new employees. Our

Directories of Search Firms and Recruiters are drawn from our database of more than 16,000 search firms and personnel agencies and more than 38,000 key contacts. The directories contain descriptive information about each search firm and recruiter in its category and contain the contact information that you can easily use to contact these recruiters. The directories list companies alphabetically by name with multiple offices of the same firm listed alphabetically by city. This review is for: 2017 CXO: C-Level Executives Directory of Search Firms and Recruiters: Job Hunting? Get Your Resume in the Right Hands (Kindle Edition) Useful by Clark Hansen on June 20, 2017 Format: Kindle Edition-Verified Purchase Great resource. Puts everything into a single place. Information can be utilized immediately and acted upon. Very practical reference tool. Amazon Reviews: 5.0 out of 5 stars: Outstanding Reference for Job Seekers as well as Recruiters and Managers, November 20, 2013 - By Let's Compare Options Amazon Rocks (Worldwide) This review is from: IT Managers eBook Directory of Search Firms and Recruiters (Job Hunting? Get Your Resume in the Right Hands) (Kindle Edition) Custom Databanks has been selling headhunting (and many other) databases and lists since the 1980s. They are one of the most reputable data warehouses around. Some of the web reviews that trash these directories as just sales brochures for their lists are not correct. They even state that CD removes contact info. These are both untrue! Don't believe me, just use the wonderful Amazon/publisher look inside feature- full profiles and contact data is given. Now there ARE many more lists on their DBMS, including city by city cuts, etc. and you likely will want to actually buy some of these lists in your niche with the discount code you get with this purchase. But that's certainly not necessary to get a lot of value from these pubs. This particular one focuses on jobs at 50K or better, but come on, that's base entry level for programmers with even basic skills! Big Data starting salaries are now North of 120K at a lot of firms. If you're looking to change jobs or hire, obviously networking comes first, but this is a close second. I have nothing to do with this company, but have used them successfully to recruit in some VERY narrow niches like robotics and digital art programming. Their reps are really customer responsive, and mine even helped find an extremely specialized group of candidate recruiters in tutorial software. Highly recommended for candidates, IT managers and of course headhunters specializing in engineering and IT.
