

Jobs In Ukraine

J. David Brown, John S. Earle

Skills for a Modern Ukraine Ximena Del Carpio, Olga Kupets, Noël Muller, Anna Olefir, 2017-01-13 Ukraine's economic progress since its independence in the early 1990s has been uneven, in part due to the slow pace of reforms, unfavorable demographic factors, and low productivity. One of the key factors limiting success is the inadequacy of the skills of Ukraine's workforce with the needs of a modern economy. While the country demonstrates a strong record of educational attainment and acquisition of foundational skills, the post-secondary education and training system fails to equip workers with the right advanced skills for labor market success. This study provides new evidence on the nature of skills valued in the labor market, reviews the institutional constraints hindering the development and use of workforce's skills, and proposes a set of policy options. This study argues that, to improve skills formation and use, Ukraine needs to renew its public policies on post-secondary education, labor-market intermediation and information, and labor regulations. Drawing on household and firm surveys, the study finds that workers need a mix of advanced cognitive skills (like problem solving and communication), socio-emotional skills (like self-management and teamwork), and technical skills (like computer programming or sales skills) to be successful in the labor market and meet employers' demand. These skills are not necessarily explicitly taught in traditional learning settings. Policy makers should therefore rethink the content of post-secondary education and training to focus on the development of skills for the labor market rather than only attendance. To do so, establishing steady links between education institutions and enterprises, by setting up occupation standards and adapting curricula to firm demand, is crucial. An essential instrument to identify the demand for skills and facilitate fruitful investments in skills formation is a labor market information system—which provides reliable information on labor market prospects across post-secondary education fields and institutions and job requirements and characteristics to students, their families, and jobseekers. Nonetheless, a better formation of skills would only be beneficial if most of the workforce can put them at use in jobs, promoted by better labor regulations.

Gross Job Flows in Ukraine Jozef Konings, Olga Kupets, Hartmut Lehmann, 2003

Ukraine, 1999 The government deficits that have played such a prominent role in Ukraine's continued economic decline reflect in large measure the fact that government has been slow to relinquish the role it played during the Soviet era. Since independence, Ukraine has suffered one of the most severe economic declines of any country in this century. While other transition countries in the region successfully replaced their old command economies with market economies, Ukraine continued to protect unprofitable enterprises to preserve employment and income levels. To support this strategy, the government has borrowed more money than it takes in and, at the same time, competes with private enterprise domestically for credit. As Ukraine's economic foundations proceed to crumble, the Ukrainian Government, the World Bank, and the International Center for Policy Studies in Kyiv examined the issues surrounding the crisis. The group analyzed the data and policy studies that were prepared by various Ukrainian and World Bank teams of experts and formulated recommendations for strategies to stem the growing tidal wave of economic collapse now threatening Ukraine. This report presents the issues that are creating these crises and outlines a course to prevent a crash. This report will be of interest to government agencies, economists, bankers, and academics.

Jobs For Development Gordon Betcherman, Martin Rama, 2016-10-06 This book is a sequel to the World Bank's World Development Report 2013: Jobs. The central message of that report was that job creation is at the heart of development. Jobs raise living standards and lift people out of poverty, they contribute to gains in aggregate

productivity, and they may even foster social cohesion. In doing so, jobs may have spillovers beyond the private returns they offer to those who hold them. Poverty reduction is arguably a public good, making everybody better off; higher productivity spreads across co-workers, clusters, and cities; and social cohesion improves the outcomes of collective decision-making. But which jobs make the greatest contribution to development and what policies can facilitate the creation of more of these jobs? There is no universal answer – it depends on the country's level of development, demography, natural endowments, and institutions. This volume explores the diversity of jobs challenges and solutions through case studies of seven developing countries. These countries, drawn from four continents, represent seven different contexts – a small island nation (St. Lucia), a resource-rich country (Papua New Guinea), agrarian (Mozambique), urbanizing (Bangladesh), and formalizing (Mexico) economies, as well as young (Tunisia) and aging (Ukraine) populations. Using methods drawn from several branches of economics and the social sciences more broadly and analyzing a wide range of data, the authors show the different ways in which jobs have contributed to social and economic development in the countries they have studied and how they can contribute in the future. The policy priorities vary accordingly. They often extend well beyond traditional labor market instruments to include policy areas not typically considered in national growth strategies.

Ukrainian Migration to the European Union Olena Fedjuk, Marta Kindler, 2016-11-02 This book brings together research findings from a variety of disciplines in this integrated study of the migration of Ukrainian nationals to the EU. It contextualizes and historicizes this migration against the background of the series of crises experienced by Ukraine and the wider region over the last thirty or so years, from the dissolution of the USSR, through EU border changes, to the failed economic reforms of independent Ukraine. The book reviews major publications in a variety of disciplines and in several languages, including Russian, Ukrainian and English. It provides a critical analysis of these authoritative sources, linking historical and contemporary texts to establish a longitudinal perspective on migration trends and practices. The spatial, temporal, gender and geopolitical aspects of migration are examined, with expert analysis of the implications for economics, immigration policies, and migration studies. The contributors also draw on national and international academic research and country-specific data to describe the experience of Ukrainian migration in six European countries: Poland, the Czech Republic, Greece, Italy, Portugal, and Spain. These detailed portraits identify the principal trends and will help researchers, policy makers, and students to a better understanding of the dynamics of migration flow in the region as a whole. "A timely volume covering many cases and many facets of Ukrainian mobility in the EU. A must have for all libraries." Anna Triandafyllidou, Robert Schuman Centre for Advanced Studies (RSCAS) Is Ukraine the Mexico of Europe, I once asked. It is one of the most eminent migration cases to study. This book fills an acute knowledge gap and is a rich and important contribution. Franck Düvell, University of Oxford "This collection offers a comprehensive historical and geographical analysis of various migratory patterns from Ukraine to different European countries. It is a must read for migration scholars and for anyone interested in this highly topical phenomenon." Lena Näre, University of Helsinki

Nephrology Worldwide José A. Moura-Neto, José Carolino Divino-Filho, Claudio Ronco, 2021-03-03 This book presents contributions from leading international experts in the field of nephrology. Each chapter is independent and discusses nephrology in the author's country, including the history of nephrology development, kidney disease epidemiology, clinical nephrology, dialysis practice in acute and chronic renal failure settings (hemodialysis, hemodiafiltration, peritoneal dialysis), pediatric nephrology, and kidney transplantation. In addition, the book covers topics such as the job market for nephrologists, reimbursement, nephrology education, and the number of professionals in the private and public sectors. With 53 chapters and more than 300 authors from all continents offering a unique perspective on nephrology practice, it provides a much-needed information source for nephrologists around the globe. The reader will be able to travel through "Nephrology Worldwide", a pleasant reading experience with not only relevant information and updated data, but also a comprehensive look at the history, countries' peculiarities, and a critical analysis of the scenario of nephrology and renal replacement therapy. A valuable resource for healthcare professionals and other stakeholders interested in learning about the status quo of Nephrology Worldwide. "Both the failings and the successes are outlined in a way that should make this book a compelling read, not just for the well-informed renal physician, but also for planners and policy makers whose thinking and actions are integral to the way we practice medicine." - Sir Peter J. Ratcliffe, Nephrologist and 2019 Nobel Prize Winner More information on the Nephrology Worldwide initiative can be found at www.nephrologyworldwide.com.

Twelve Feminist Lessons of War Cynthia Enloe, 2023-09-19 Renowned scholar-activist Cynthia Enloe lays out the lessons that women activists have drawn from their immediate experiences of war. *Twelve Feminist Lessons of War* draws on firsthand experiences of war from women in places as diverse as Ukraine, Myanmar, Somalia, Vietnam, Rwanda, Algeria, Syria, and Northern Ireland to show how women's wars are not men's wars. With her engaging trademark style, Cynthia Enloe demonstrates how patriarchy and militarism have embedded themselves in our institutions and our personal lives. Enloe reveals how the social and political influences that shape war--from military recruitment and economic collapse to sexual assault and reproductive rights (and their denial)--are deeply gendered and pervade women's lives before, during, and in the aftermath of war. Her razor-sharp analysis, at once accessible and provocative, highlights how women's emotional and physical labor is used to support government policies and how women's rights activists--against all odds--remain committed in the midst of armed violence. *Twelve Feminist Lessons of War* is the gritty and grounded book we need to understand what is happening

to our world.

Ukraine Modernisation Programme The Agency For The Modernisation Of Ukraine,2015-10-13 The reform agenda Ukraine Modernisation Programme was developed by several experts from the fields of science and politics. Implementation of temporary protection for refugees from Ukraine Berlina, Anna,2022-12-06 Available Online: <https://pub.norden.org/nord2022-026/> On 4 March 2022, the EU activated the Temporary Protection Directive to provide quick and effective assistance to people fleeing the war in Ukraine. This report provides an overview of how the Temporary Protection Directive and the national protection schemes have been implemented in the Nordic countries. The analysis identifies differences between the countries when it comes to the categories of persons who qualify for temporary protection, as well as the protection status that refugees from Ukraine receive. The study also identifies certain challenges to implementing temporary protection faced by all the Nordic countries. These include the fact that refugees from Ukraine are treated differently than other groups of refugees, the difficulties involved in monitoring secondary migration and the lack of vulnerability assessments.

Youth policy in Ukraine Ewa Krzaklewska, Howard Williamson,Council of Europe,2014-01-01 Ukraine is the 19th country overall, and the third of the Commonwealth of independent States (following Armenia and Moldova) to have its youth policy reviewed by the Council of Europe's international review team. Ukraine presented a range of new challenges: it was by far the largest country geographically and it embodied geo-political characteristics (from North to South, and East to West) that are reflected in its philosophy and approach to youth policy development. This international review explores three issues of particular interest to the Ukrainian authorities: health and healthy lifestyles, employment and employability, and patriotic education and citizenship, in addition, the international review pays special attention to questions of youth participation and engagement, and to those groups of vulnerable young people who are at most risk of social exclusion. The review argues for the establishment of a more open development model for youth policy in Ukraine, supported by a clear strategic vision and the strengthening of its commitment to local capacity and autonomy in shaping relevant programmes and projects, in particular, it also advocates the promotion of more diverse methodologies in the implementation of youth policy, based on non-formal learning and skills-development principles.

Ukraine Marta Dyczok,2000 Aimed at nonspecialists and specialists alike, this book presents an overview of the main government policies, and the social and cultural issues facing the new state. These are placed within their historical, regional and global framework.

Attitudes, Poverty and Agency in Russia and Ukraine Ann-Mari Sätre,Ildikó Asztalos Morell,2017-10-02 One of the main ideas behind this book was to trace continuities from the Soviet time to post-Soviet Russia. There are many similarities between Russia and Ukraine, indicating such a continuation. Russia and Ukraine had a lot in common in terms of culture, language and history, partly also because of their common origin. After the dissolution of the Soviet Union, however, the two independent countries chose different routes of development. This makes it possible to distinguish between the effects of politics/reforms on the one hand, and the impacts from the Soviet system on the other. After some more or less chaotic development paths in the 1990s, showing clear differences between the two countries, and before the contemporary conflict broke out in Eastern Ukraine (2013), they had once again more similarities in terms of political leadership and policies in general. The chapters in this book focus on Ukraine and on two regions in Russia: Nizhny Novgorod and Archangelsk. Contributors look at attitudes towards poverty and

poor people; strategies of the poor; and policies against poverty. This book was published as a special issue of the Journal of Contemporary Central and Eastern Europe.

The Microeconomics of Creating Productive Jobs J. David Brown, John S. Earle, 2006 The challenge for labor market policy in the transition economies has been to redress the sharp drops in employment and rises in unemployment in a way that fosters the creation of productive jobs. The authors first document the magnitude and productivity of job and worker reallocation. Then they investigate the effects of privatization, product and labor market liberalization, and obstacles to growth in the new private sector on reallocation and its productivity in Hungary, Romania, Russia, and Ukraine. The authors find that market reform has resulted in a large increase in the pace of job reallocation, particularly that occurring between sectors and through firm turnover. Unlike under central planning, the job reallocation during the transition has contributed significantly to aggregate productivity growth. Privatization has not only stimulated intrasectoral job reallocation, but the reallocation is more productive than that among remaining state firms. The effect of privatization on firm productivity varies considerably across countries and is not always positive. The productivity gains from privatization have generally not come at the expense of workers but are rather associated with increased wages and employment.

Income Justice in Ukraine Kseniia Gatskova, 2015-01-12 This book presents the results of an empirical study of distributive justice attitudes in the post-Soviet, transforming society of Ukraine. The focus of this study is on the mechanisms of the formation of justice attitudes, which are explained within the methodological framework of analytical sociology. Two perspectives of research were applied in this study - a contextual and a comparative approach - in order to test the hypotheses stemming from a combination of the major statements of human capital, labor market, rational choice, socialization, adaptation, and cognitive dissonance theories, and the analysis of the current political and socio-economic situation in Ukraine. The innovative factorial survey method was applied as a measurement technique for people's distributive justice attitudes. Bringing together fundamental theoretical statements on the nature of social justice and unique novel data on attitudes to justice, this study contributes to several research areas, including inequality studies and post-communist transformation research.

Migrant Domestic Workers and Family Life Maria Kontos, Glenda Tibe Bonifacio, 2016-02-23 This timely and innovative book delivers a comprehensive analysis of the non-recognition of the right to a family life of migrant live-in domestic and care workers in Argentina, Canada, Germany, Italy, Lebanon, Norway, the Philippines, Slovenia, South Korea, Spain, the United Arab Emirates, the United States of America, and Ukraine.
