**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital

tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**All-weather Flight Manual** United States. Office of the Chief of Naval Operations, 1961

**The Pig Book** Citizens Against Government Waste, 2013-09-17 The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

Lost in Space Jon Schiller,2009 The US Space Shuttle delivering supplies to the US Space Station has a mechanical breakdown that prevents its return to the Earth. The remaining two US Space Shuttles are launched as quickly as possible to carry the needed supplies to the Space Station before the people there run out of expendables: air, water, etc. Both aging Shuttles suffer breakdowns - one explodes on the launch pad and the other has a breakdown in orbit near the Space Station. This second Shuttle is close enough to the Space Station to be secured by a cable and then winched up to the Space Station docking gate. The hero, Dr. Donald Richards, devises two options for rescuing the stranded astronauts: use the new European Space Station Shuttle or use the Soviet Space Shuttle.

The US President over-rules NASA's recommendation to use the Soviet Space Shuttle for the rescue, so Richards negotiates an agreement with the European Space Agency to use their Shuttle to rescue the astronauts.
