The Crane Wife Patrick Ness, 2014-01-23 A magical novel, based on a Japanese folk tale, that imagines how the life of a broken-hearted man is transformed when he rescues an injured white crane that has landed in his backyard. George Duncan is an American living and working in London. At forty-eight, he owns a small print shop, is divorced, and lonelier than he realizes. All of the women with whom he has relationships eventually leave him for being too nice. But one night he is woken by an astonishing sound—a terrific keening, which is coming from somewhere in his garden. When he investigates he finds a great white crane, a bird taller than even himself. It has been shot through the wing with an arrow. Moved more than he can say, George struggles to take out the arrow from the bird's wing, saving its life before it flies away into the night sky. The next morning, a shaken George tries to go about his daily life, retreating to the back of his store and making cuttings from discarded books—a harmless, personal hobby—when through the front door of the shop a woman walks in. Her name is Kumiko, and she asks George to help her with her own artwork. George is dumbstruck by her beauty and her enigmatic nature, and begins to fall desperately in love with her. She seems to hold the potential to change his entire life, if he could only get her to reveal the secret of who she is and why she has brought her artwork to him. Witty, magical, and romantic, *The Crane Wife* is a story of passion and sacrifice, that resonates on the level of dream and myth. It is a novel that celebrates the creative

imagination, and the disruptive power of love.

Shock Waves - Proceedings Of The 20th International Symposium (In 2 Volumes) Hans G Hornung, Joseph E Shepherd, Bradford Sturtevant, 1997-01-22 The symposia take place every two years. They are the forum at which scientists concerned with shock waves present their research. They USE shock waves for chemical kinetics studies, for materials studies, and smashing kidney stones; they STUDY the phenomena associated with flows involving shock waves, such as supersonic flow, explosions, detonations, volcanic eruptions, and, in this symposium, even such with-it topics as impact of Shoemaker-Levy on Jupiter and blast waves in the World Trade Center. They also discover new, bigger and better ways of generating flows at hypervelocity speeds and develop their technological tools further. The international exchange of information is documented in the proceedings volumes, which have become a storehouse of information on the subject, documenting the history of this peculiar branch of science that involves chemists, physicists, engineers, geophysicists, material scientists and biologists.

Chef's Choice TJ Alexander, 2023-05-30 A fake dating arrangement turns to real love in this deliciously delightful queer rom-com from the author of the sweetly satisfying Chef's Kiss. When Luna O'Shea is unceremoniously fired from her frustrating office job, she tries to count her blessings: she's a proud trans woman who has plenty of friends, a wonderful roommate, and a good

life in New York City. But blessings don't pay the bills. Enter Jean-Pierre, a laissez-faire trans man and the heir to a huge culinary empire—which he'll only inherit if he can jump through all the hoops his celebrity chef grandfather has placed in his path. First hoop: he needs a girlfriend, a role that Luna is happy to play...for the right price. She's got rent to pay, after all! Second hoop: they both need to learn how to cook a series of elaborate, world-renowned family recipes to prove that Jean-Pierre is a worthy heir. Admittedly, Luna doesn't even know how to crack an egg, but she's not going to let that—or any pesky feelings for Jean-Pierre—stop her. Another swoon-worthy and heartwarming queer love story from a charming new voice in romance.

The Pandora Deception David Bruns, J. R. Olson, 2020-09-15 With *The Pandora Deception*, Bruns and Olson return with a captivating portrayal of modern day combat that compares with the best of the timeless classics by Tom Clancy, Dale Brown, and Stephen Coonts. (Mark Greaney) To effectively combat the rise of global terrorism, the U.S. military must now rely on more than traditional weapons and tactics. Don Riley of the U.S. Cyber Command is given charge of a brand new effort: a new team in the CIA Operations Directorate called Emerging Threats. To establish this team he recruits three talented recent commissioned naval officers—Janet Everett, Michael Goodwin, and Andrea Ramirez—and together they uncover a new terrorist group. The group is going under the name of the Mahdi, a messiah figure of Islamic mythology, and is

operating in the geopolitical tinderbox that is the Nile River basin. But the Mahdi is no ordinary terrorist group. Their stock in trade is not the usual suicide bombings and surprise attacks. In fact, the Mahdi has created and is about to release the worst kind of weapon: a hugely destructive bioweapon, known as Pandora, with a devastating fatality rate. And it will take all the resources that the U.S. can bring to bear—intelligence assets, cyber warfare and military assaults—to not only find out who is really behind the Mahdi, but to stop them before they successfully destroy the balance of power in the Middle East.

French Science Fiction, Fantasy, Horror and Pulp Fiction Jean-Marc Lofficier, Randy Lofficier, 2000 Connoisseurs of fantasy, science fiction, and horror have long recognized the important contributions of thousands of French authors, filmmakers, and artists. The volume is divided into two parts. Part I gives historical overviews, complete lists, descriptions, and summaries for works in film, television, radio, animation, comic books, and graphic novels. This section also includes interviews with animation director Rene Laloux and comic book artist Moebius, as well as comments from filmmaker Luc Besson. Biographies are provided for over 200 important contributors to television and graphic arts. Part II covers the major authors and literary

trends of French science fiction, fantasy, and horror from the Middle Ages to the present day. (French-Canadians and Belgians are also examined.) There is a biographical dictionary of over 3,000 authors, a section on major French awards, and a complete bibliography. Many illustrations (!) illuminate this thorough presentation.

Physics and Chemistry of the Upper Atmosphere M. H. Rees, 1989-08-25 A multitude of processes that operate in the upper atmosphere are revealed by

detailed physical and mathematical descriptions of the interactions of particles and radiation, temperatures, spectroscopy and dynamics.

Biogenic Trace Gases P. A. Matson, R. C. Harriss, 2009-05-27 Trace gases are those that are present in the atmosphere at relatively low concentrations. Small changes in their concentrations can have profound implications for major atmospheric fluxes, and therefore, can be used as indicators in studies of global change, global biogeochemical cycling and global warming. This new how-to guide will detail the concepts and techniques involved in the detection and measurement of trace gases, and the impact they have on ecological studies. Introductory chapters look at the role of trace gases in global cycles, while later chapters go on to consider techniques for the measurement of gases in various environments and at a range of scales. A how-to guide for measuring atmospheric trace gases. Techniques described are of value in addressing current concerns over global climate change.

Fundamental Stellar Properties: The Interaction Between Observation and Theory Timothy R. Bedding, Andrew J. Booth, John M. Davis, 2013-12-01 This Symposium began with a proposal for a meeting to honour Emeritus Professor Robert Hanbury Brown on the occasion of his 80th birthday. He requested that any such meeting should be on a topic that would be of benefit to the Sydney University Stellar Interferometer (SUSI) program. With SUSI and several other high angular resolution instruments either in operation or coming on line within the next decade, and with advances in astrometry, spectroscopy and in

theoretical models of stellar atmospheres and interiors, it appeared to be both appropriate and timely to hold a symposium on Fundamental Stellar Properties: the Interaction between Observation and Theory. The emphasis of the meeting was on the critical assessment of the quality, accuracy, and prospects for improvement of the observational data and theoretical models, on the outstanding problems in stellar astrophysics, and on the feasibility of achieving the observational and theoretical advances required for their solution. Invited papers comprised the major part of the oral program and the speakers responded to the challenge issued by the Scientific Organising Committee to critically review the current status and prospects for their area of expertise. The Symposium was opened by the Chancellor of the University of Sydney, Emeritus Professor Dame Leonie Kramer, who welcomed the 126 participants from 22 countries on behalf of the University. The oral program included . 52 invited reviews and papers and 10 contributed papers.
