Gender and Family in East Asia Siumi Maria Tam,Wai Ching Angela Wong,Danning Wang,2014-02-18 The on-going reconfiguration of geo-political and economic forces across the globe has created a new institutional and moral environment for East Asian family life and gender dynamics. Indeed, modernisation in East Asia has brought about increases in women's education levels and participation in the labour force, a delay in marriage age, lower birth rates, and smaller family size. And yet, despite the process of modernization, traditional systems such as Confucianism and patriarchal rules, continue to shape gender politics and family relationships in East Asia. This book examines gender politics and family culture in East Asia in light of both the overwhelming changes that modernization and globalization have brought to the region, and the structural restrictions that women in East Asian societies continue to face in their daily lives. Across three sections, the contributors to this volume focus on marriage and motherhood, religion and family, and migration. In doing so, they reveal how actions and decisions implemented by the state trigger changes in gender and family at the local level, the impact of increasing internal and transnational migration on East Asian culture, and how religion interweaves with the state in shaping gender dynamics and daily life within the family. With case studies from across the region, including South Korea, Japan, mainland China, Taiwan, and Hong Kong, this book will be of great interest to students and scholars of Asian studies, gender studies, anthropology, sociology and social policy.

Japanese Foreign Intelligence and Grand Strategy Brad Williams,2021-03-01 Incisive insights into the distinctive nature of Japanese foreign intelligence and grand strategy, its underlying norms, and how they have changed over time Japanese foreign intelligence is an outlier in many ways. Unlike many states, Japan does not possess a centralized foreign intelligence agency that dispatches agents abroad to engage in espionage. Japan is also notable for civilian control over key capabilities in human and signals intelligence. Japanese Foreign Intelligence and Grand Strategy probes the unique makeup of Japan's foreign intelligence institutions, practices, and capabilities across the economic, political, and military domains and shows how they have changed over time. Brad Williams begins by exploring how Japan's experiences of the Second World War and its new role as a major US ally influenced its adoption of bilateralism, developmentalism, technonationalism, and antimilitarism as key norms. As a result, Japanese intelligence-gathering resources centered primarily around improving its position in the global economy throughout the Cold War. Williams then brings his analysis up to the Abe Era, examining how shifts in the international, regional, and domestic policy environments in the twenty-first century have caused a gradual reassessment of national security strategy under former prime minister Shinzo Abe. As Japan reevaluates its old norms in light of regional security challenges, the book concludes by detailing how the country is beginning to rethink the size, shape, and purpose of its intelligence community. Anyone interested in Japanese intelligence, security, or international relations will welcome this important contribution to our understanding of the country's intelligence capabilities and strategy.

Information Modelling and Knowledge Bases XX Y. Kiyoki,T. Tokuda,H.

Jaakkola, 2009-02-11 In the last decades, information modelling and knowledge bases have become essentially important subjects, not only in academic communities related to information systems and computer science, but also in the business area where information technology is applied. The 18th European-Japanese Conference on Information Modelling and Knowledge Bases (EJC 2008) continues the series of events that originally started as a cooperation initiative between Japan and Finland. Later, the geographical scope of these conferences expanded to cover the whole of Europe and other countries as well. The EJC conferences constitute a worldwide research forum for the exchange of scientific results and experiences achieved in computer science and other related disciplines using innovative methods and progressive approaches. In this way, a platform has been established drawing together researchers as well as practitioners dealing with information modelling and knowledge bases. The main topics of EJC conferences target the variety of themes in the domain of information modelling, conceptual analysis, multimedia knowledge bases, design and specification of information systems, multimedia information modelling, multimedia systems, ontology, software engineering, knowledge and process management. The aim of this publication is also applying new progressive theories. To this end, much attention is paid also to theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy.

Expatriates in Japanese Firms Chie Yorozi, 2022-04-21 Focusing on the experiences of foreign employees working in Japanese firms, this book identifies the trends and realities facing both expatriates and firms in the current landscape of the Japanese labour market. By utilising interview data from both expatriates and Japanese HR staff, this study identifies the fact that self-initiated expatriates often do not remain in Japanese firms for long and highlights the main factors that influence their decisions to leave; including difficulty adjusting to Japan's lifetime employment system, seniority-based pay, and the prevalence of unpaid overtime. The book reveals that whilst Japanese firms are adjusting to improve the retention of foreign employees, there remains a clear expectation gap between the two sides. Moreover, it outlines further potential adjustments that could be implemented to reduce the turnover rate of expatriates and create a more harmonious workplace both for expatriates and for local employees. This is an urgent challenge for Japan as it faces labour shortages. Featuring an in-depth exploration of first-hand experiences from direct testimonies of expatriates in Japanese firms, this book will be a valuable resource for academics and students of Japanese studies, human resource management, and organisation studies.
