Subpar Parks Amber Share, 2021-07-13 **A New York Times Bestseller!** Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply Too cold for me! Another saw the mind-boggling vistas of Bryce Canyon as Too spiky! Never mind the person who visited the thermal pools at Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

The Boiling River Andrés Ruza, 2016-02-16 In this exciting adventure mixed

with amazing scientific study, a young, exuberant explorer and geoscientist journeys deep into the Amazon—where rivers boil and legends come to life. When Andrés Ruzo was just a small boy in Peru, his grandfather told him the story of a mysterious legend: There is a river, deep in the Amazon, which boils as if a fire burns below it. Twelve years later, Ruzo—now a geoscientist—hears his aunt mention that she herself had visited this strange river. Determined to discover if the boiling river is real, Ruzo sets out on a journey deep into the Amazon. What he finds astounds him: In this long, wide, and winding river, the waters run so hot that locals brew tea in them; small animals that fall in are instantly cooked. As he studies the river, Ruzo faces challenges more complex than he had ever imaged. The Boiling River follows this young explorer as he navigates a tangle of competing interests—local shamans, illegal cattle farmers and loggers, and oil companies. This true account reads like a modern-day adventure, complete with extraordinary characters, captivating plot twists, and jaw-dropping details—including stunning photographs and a never-before-published account about this incredible natural wonder. Ultimately, though, The Boiling River is about a man trying to understand the moral obligation that comes with scientific discovery—to protect a sacred site from misuse, neglect, and even from his own discovery.

Seeing Silence Pete McBride, 2021-09-28 In a world ever more congested and polluted with both toxins and noise, award-winning photographer Pete McBride takes readers on a once-in-a-lifetime escape to find places of peace and quiet—a pole-to-pole, continent-by-continent quest for the soul. We tend to think of silence as the absence of sound, but it is actually the void where we can hear the sublime notes of nature. In this National Outdoor Book Award winning work, photographer Pete McBride reveals the wonders of these hushed places in spectacular imagery—from the thin-air flanks of Mount Everest to the depths of the Grand Canyon, from the high-altitude vistas of the Atacama to the African savannah, and from the Antarctic Peninsula to the flowing waters of the Ganges and Nile. These places remind us of the magic of being “truly away” and how such places are vanishing. Often showing beauty from

vantages where no other photographer has ever stood, this is a seven-continent visual tour of global quietude—and the power in nature's own sounds—that will both inspire and calm.

In the Footsteps of Marco Polo Denis Belliveau, Francis O'Donnell, 2008-10-07
Did Marco Polo reach China? This richly illustrated companion volume to the public television film chronicles the remarkable two-year expedition of explorers Denis Belliveau and Francis O'Donnell as they sought the answer to this controversial 700-year-old question. With Polo's book, *The Travels of Marco Polo*, as their guide, they journeyed over 25,000 miles becoming the first to retrace his entire path by land and sea without resorting to helicopters or airplanes. Surviving deadly skirmishes and capture in Afghanistan, they were the first Westerners in a generation to cross its ancient forgotten passageway to China, the Wakhan Corridor. Their camel caravan on the southern Silk Road encountered the deadly singing sands of the Taklamakan and Gobi deserts. In Sumatra, where Polo was stranded waiting for trade winds, they lived with the Mentawai tribes, whose culture has remained unchanged since the Bronze Age. They became among the first Americans granted visas to enter Iran, where Polo fulfilled an important mission for Kublai Khan. Accompanied by 200 stunning full-color photographs, the text provides a fascinating account of the lands and peoples the two hardy adventurers encountered during their perilous journey. The authors' experiences are remarkably similar to descriptions from Polo's account of his own travels and

life. Laden with adventure, humor, diplomacy, history, and art, this book is compelling proof that travel is the enemy of bigotry—a truth that resonates from Marco Polo's time to our own.

Regeneration Paul Hawken, 2021-09-21 A radically new understanding of and practical approach to climate change by noted environmentalist Paul Hawken, creator of the New York Times bestseller Drawdown Regeneration offers a visionary new approach to climate change, one that weaves justice, climate, biodiversity, equity, and human dignity into a seamless tapestry of action, policy, and transformation that can end the climate crisis in one generation. It is the first book to describe and define the burgeoning regeneration movement spreading rapidly throughout the world. Regeneration describes how an inclusive movement can engage the majority of humanity to save the world from the threat of global warming, with climate solutions that directly serve our children, the poor, and the excluded. This means we must address current human needs, not future existential threats, real as they are, with initiatives that include but go well beyond solar, electric vehicles, and tree planting to include such solutions as the fifteen-minute city, bioregions, azolla fern, food localization, fire ecology, decommodification,

forests as farms, and the number one solution for the world: electrifying everything. Paul Hawken and the nonprofit Regeneration Organization are launching a series of initiatives to accompany the book, including a streaming video series, curriculum, podcasts, teaching videos, and climate action software. Regeneration is the inspiring and necessary guide to inform the rapidly spreading climate movement.
