Blueprint for Action Paula Jorde Bloom,2005 A management and staff development book for early childhood administrators

Blueprint for Action Paula J. Bloom,2015-03-01 Blueprint for Action provides a framework for

understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a quick fix notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

Education Studies in South Africa Charl C. Wolhuter, 2020-12-31 The thesis of this volume is that the fields of scholarly enquiry of Education – internationally as well as in South Africa in particular – despite being fields of virile scholarly activity and output, are in need of a major overhaul. In this collected work this want in research is encapsulated in three words: relevance, rigour and restructuring. Research in the scholarly field(s) of Education is predominantly of small scale, non-accumulative, widely condemned as not of a comparable standard to research done in other social sciences, much less upon a par with research in the natural sciences, and lacking structure in the sense of being anchored in a firm theory. To make matters worse, scholars in Education internationally and in South Africa have till very recently eschewed discussion as to the packaging or structuring of knowledge produced by Education research. The book consists of chapters containing original research unpacking these desiderata from a variety of angles. The authors had them served by a variety of methods, from deductively argued position papers, to empirical research, the latter both quantitative (survey research) and qualitative.

Early Intervention for Young Children with Autism Spectrum Disorder Russell Lang, Terry B. Hancock, Nirbhay N. Singh, 2016-05-17 This book examines early intensive behavioral intervention (EIBI) programs for young children with autism spectrum disorder (ASD). It analyzes current research on early intervention (EI) and explains the importance of accurate, timely detection of ASD in facilitating the use of EI. Chapters address five widely researched EIBI approaches: Discrete Trial Training, Pivotal Response Training, the Early Start Denver Model, Prelinguistic Milieu Teaching, and Enhanced Milieu Teaching. This in-depth study of current EIBI approaches offers a rigorous guide to

earlier and more intensive interventions for children with ASD, leading to greater autonomy and improved later life outcomes for individuals. Featured topics include: Parent-implemented interventions and related issues. Evaluations of controversial interventions used with children with ASD. Factors contributing to rising ASD prevalence. Obstacles to obtaining accurate ASD diagnosis in young children. Early Intervention for Young Children with Autism Spectrum Disorder is an essential resource for researchers, clinicians, and graduate students in developmental, clinical child, and school psychology, behavioral therapy/rehabilitation, social work, public health, educational policy and politics, and related psychology and behavioral health fields.

Encyclopedia of Modern U.S. Military Weapons Timothy M. Laur, Steven L. Llanso, 1998-07 An accessible encyclopedia of military weapons represents a collaboration with The Army, Navy, and Air Force Times, and covers each weapon system, its evolution, development, and combat experience.

Learning Mathematics Archie Lapointe, Nancy A. Mead, Janice M. Askew, 1992 In 1990-91, 20 countries (Brazil, Canada, China, England, France, Hungary, Ireland, Israel, Italy, Jordan, Korea, Mozambique, Portugal, Scotland, Slovenia, Soviet Union, Spain, Switzerland, Taiwan, and the United States) surveyed the mathematics and science performance of 13-year-old students (and 14 countries also assessed 9-year-olds in the same subjects) as part of the second International Assessment of Educational Progress (IAEP) Project. While recognizing the fundamental differences from country to country, the participants assembled tests that focus on the common elements of their curriculums, and in order to form the contexts for interpreting the student achievement data, they added sets of questions about students' home background and classroom experiences and the characteristics of the schools they attended. Results are reported in six chapters that discuss the following: (1) the mathematics performance of 13-year-olds; (2) results organized around topics featured in the curriculum; (3) results reporting students' and administrators' perceptions of teaching practices and their relationship to student performance; (4) information about the backgrounds of students and how they spend their time outside of school; (5) information about physical, demographic, and socioeconomic characteristics and the educational systems of the participating countries; and (6) the mathematics performance of 9-year-olds. Other sections present highlights of the findings discussed in detail in the main chapters, information about the participating countries, a procedural appendix discussing the research methods used by the countries, and a data appendix providing tables of results reported in the main chapters. Overcoming Autism Lynn Kern Koegel, Ph.D.,Claire LaZebnik,2014-03-25 There have been huge advances in our ability to diagnose autism and in the development of effective interventions that can change children’s lives. In this extraordinary book, Lynn Kern Koegel, a leading clinician, researcher, and cofounder of the renowned Autism Research Center at the University of California at Santa Barbara, combines her cutting-edge expertise with the everyday perspectives of Claire LaZebnik, a writer whose experience with a son with autism provides a rare window into the disorder. Together, they draw on the highly effective “pivotal response” approach developed at the center to provide concrete ways of improving the symptoms of autism and the emotional struggles that surround it, while reminding readers never to lose sight of the humor that lurks in the disability’s quirkiness or the importance of enjoying your child. From the shock of diagnosis to the step-by-step work with verbal communication, social interaction, self-stimulation, meltdowns, fears, and more, the answers are here—in a book that is as warm and nurturing as it is authoritative.
