Death in the Long Grass Peter Hathaway Capstick, 1978-01-15 As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some

of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

Born to Run Christopher McDougall,2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of

characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

The New Complete Book of Self-Sufficiency John Seymour, 2019-01-03 Embrace off-grid green living with the bestselling classic guide to a more sustainable way of life, now with a brand new foreword from Hugh Fearnley-Whittingstall. John Seymour has inspired thousands to make more responsible, enriching, and eco-friendly choices with his advice on living sustainably. The New Complete Book of Self-Sufficiency offers step-by-step instructions on everything from chopping trees to harnessing solar power; from growing fruit and vegetables, and preserving and pickling your harvest, to baking bread, brewing beer, and making cheese. Seymour shows you how to live off the land, running your own smallholding or homestead, keeping chickens, and raising (and

butchering) livestock. In a world of mass production, intensive farming, and food miles, Seymour's words offer an alternative: a celebration of the joy of investing time, labour, and love into the things we need. While we aren't all be able to move to the countryside, we can appreciate the need to eat food that has been grown ethically or create things we can cherish, using skills that have been handed down through generations. With refreshed, retro-style illustrations and a brand-new foreword by Hugh Fearnley-Whittingstall, this new edition of Seymour's classic title is a balm for anyone who has ever sought solace away from the madness of modern life.

Homo Deus Yuval Noah Harari, 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more

people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

Mortals Norman Rush, 2011-03-23 The greatly anticipated new novel by Norman Rush—whose first novel, *Mating*, won the National Book Award and was everywhere acclaimed—is his richest work yet. It is at once a political adventure, a social comedy, and a passionate triangle. It is set in the 1990s in Botswana—the African country Rush has indelibly made his own fictional territory. *Mortals* chronicles the misadventures of three ex-pat Americans: Ray Finch, a contract CIA agent, operating undercover as an English instructor in a private school, who is setting out on perhaps his most difficult assignment; his beautiful but slightly foolish and disaffected wife, Iris, with whom he is obsessively in love; and Davis Morel,

an iconoclastic black holistic physician, who is on a personal mission to “lift the yoke of Christian belief from Africa.” The passions of these three entangle them with a local populist leader, Samuel Kerekang, whose purposes are grotesquely misconstrued by the CIA, fixated as the agency is on the astonishing collapse of world socialism and the simultaneous, paradoxical triumph of radical black nationalism in South Africa, Botswana’s neighbor. And when a small but violent insurrection erupts in the wild northern part of the country, inspired by Kerekang but stoked by the erotic and political intrigues of the American trio—the outcome is explosive and often explosively funny. Along the way, there are many pleasures. Letters from Ray’s brilliantly hostile brother and Iris’s weebegone sister provide a running commentary on contemporary life in America. Africa and Africans are powerfully evoked, and the expatriate scene is cheerfully skewered. Through lives lived ardently in an unforgiving land, *Mortals* examines with wit and insight the dilemmas of power, religion, rebellion, and contending versions of liberation and love. It is a study of a marriage over time, and a man’s struggle to find his way when his private and public worlds are shifting. It is Norman Rush’s most commanding work.

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of

anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

How Europe Underdeveloped Africa Walter Rodney, 2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the

anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping the great divergence between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Intelligence, Genes, and Success Bernie Devlin, Stephen E. Fienberg, Daniel P. Resnick, Kathryn Roeder, 2013-12-01 A scientific response to the best-selling *The Bell Curve* which set off a hailstorm of controversy upon its publication in 1994. Much of the public reaction to the book was polemic and failed to analyse the details of the science and validity of the statistical arguments underlying the book's conclusion. Here, at last, social scientists and statisticians reply to *The Bell Curve* and its conclusions about IQ, genetics and social outcomes.

Air Force Handbook 10-644 Survival Evasion Resistance Escape Operations, 27 March 2017 United States Government Us Air Force, 2017-06-06 Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential

to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

Global Transformations M. Trouillot, 2016-04-30 Through an examination of such disciplinary keywords, and their silences, as the West, modernity, globalization, the state, culture, and the field, this book aims to explore the future of anthropology in the Twenty-first-century, by examining its past, its origins, and its conditions of possibility alongside the history of the North Atlantic world and the production of the West. In this significant book, Trouillot challenges contemporary anthropologists to question dominant narratives of globalization and to radically rethink the utility of the concept of culture, the emphasis upon fieldwork as the central methodology of the discipline, and the relationship between anthropologists and the people whom they study.

The Language Instinct Steven Pinker, 2010-12-14 A brilliant, witty, and altogether satisfying book. – New York Times Book Review The classic work on the development of human language by the world's

leading expert on language and the mind In *The Language Instinct*, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. *The Language Instinct* received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since *The Language Instinct* was first published.
