RFID and the Internet of Things Sergei

Evdokimov,Benjamin Fabian,Oliver Günther,2011 RFID and the Internet of Things shows how RFID has transformed the supply chain over the last decade and examines the manufacturing, logistics and retail aspects of RFID. This monograph considers the related cost/benefit of RFID in these business environments. The authors describe a vision of an Internet of Things, where each participating object has a digital shadow with related information stored in cyberspace. RFID and the Internet of Things introduces the reader to the relevant hardware and software as well as to standards and architectures. It then presents several case studies and uses cases showing how RFID can be used in manufacturing and retail with a focus on intra-enterprise applications and local benefits. The authors move further down the supply chain, discussing RFID applications in logistics and the perspectives for an Internet of Things. This is followed by a discussion of cost/benefit analyses of RFID implementations. The volume discusses possible security and privacy risks of RFID and presents several architecture proposals for a less centralized Internet of Things. The authors conclude with a summary and outlook.

Functional Neuroradiology Scott H. Faro, Feroze

B. Mohamed, Meng Law, John T. Ulmer, 2011-09-08 Functional Neuroradiology: Principles and Clinical Applications, is a follow-up to Faro and Mohamed's groundbreaking work, Functional (BOLD)MRI: Basic Principles and Clinical Applications. This new 49 chapter textbook is comprehensive and offers a complete introduction to the state-of-the-art functional imaging in Neuroradiology, including the physical principles and clinical applications of Diffusion, Perfusion, Permeability, MR spectroscopy, Positron Emission Tomography, BOLD fMRI and Diffusion Tensor Imaging. Libraries Driving Access to Knowledge Jesús

Lau, Anna Maria Tammaro, Theo J. D.

Bothma, 2012-08-31 This book is a must for librarians with international interest in access to knowledge. It includes a collection of 15 chapters written by authors from all over the world and covers different approaches to the vital role of libraries driving access to knowledge. There are chapters that offer solutions and ideas to enable libraries to become the knowledge engine in society. Other chapters discuss the conceptual part of the subject and related services. The book was compiled as part of the presidential theme of Ellen Tise, IFLA President 2009-2011, with the aim of offering the reader a good portrait of the opportunities and challenges that libraries have in driving access to knowledge.

White Matter Diseases Massimo Filippi, Maria A. Rocca, 2020-02-13 This book provides cutting-edge information on the epidemiology, etiopathogenesis, clinical manifestations, diagnostic procedures and treatment approaches for the main white matter (WM) disorders of the central nervous system (CNS). WM lesions are associated with many neurological conditions, and with aging. The diagnostic work-up of neurological diseases characterized by the presence of these lesions has changed dramatically over the past few years. This is mainly due on the one hand to the discovery of specific pathogenetic factors in some of these conditions, and on the other to the optimized use of diagnostic tools. All of this has resulted in

new diagnostic algorithms, and in the identification of new neurological conditions. The book offers neurologists essential guidance in the diagnosis and treatment of the most frequent WM conditions, promoting their correct and cost-saving diagnosis and management. By integrating neurological, laboratory and imaging concepts with the demands of accurate diagnosis, this reference guide provides a state-of-the-art overview of the current state of knowledge on these conditions, as well as practical guidelines for their diagnosis and treatment.

How Capitalism Was Built Anders Aslund, 2013 This second edition updates all chapters and covers the impacts of the global financial crisis and the European Union.

Responsible Corporate Governance Maria Aluchna, Samuel O. Idowu, 2017-05-10 This book discusses the tasks and functions of corporate governance in the light of current challenges and the dynamics that arise from a broader approach to company management and the integration of corporate governance with corporate social responsibility (CSR) and sustainability. Addressing the corporate governance shortcomings that are believed to have contributed to the recent financial crisis, it explores the interplay between corporate governance and CSR, and includes examples of company practice to show how such changes affect the practices of shareholders, boards of directors and regulators. In particular, the book examines shareholders' activities, their different investment strategies, specific reporting expectations and the submission of

proposals to the annual meeting. Further, for boards of directors it explores the need to revise their tasks with respect to the criteria for executive appointments, their corporate strategy, performance measures and diversity recommendations, while for directors it provides recommendations to reconsider the structure of executive pay and performance incentives. Lastly, for regulators the book investigates the need to introduce new laws addressing, for instance, the need for integrated reporting, limiting the voice of short term oriented shareholders and providing guidelines for executive compensation.

The Syntax of Mainland Scandinavian Jan Terje Faarlund, 2019-03-21 This book explores the syntactic structures of Mainland Scandinavian, a term that covers the Northern Germanic languages spoken in Denmark, Norway, Sweden, and parts of Finland. The continuum of mutually intelligible standard languages, regional varieties, and dialects stretching from southern Jutland to eastern Finland share many syntactic patterns and features, but also present interesting syntactic differences. In this volume, Jan Terje Faarlund discusses the main syntactic features of the national languages, alongside the most widespread or typologically interesting features of the non-standard varieties. Each topic is illustrated with examples drawn from reference grammars, research literature, corpora of various sorts, and the author's own research. The framework is current generative grammar, but the volume is descriptive in nature, with technical formalities and theoretical discussion kept to a minimum. It will

hence be a valuable reference for students and researchers working on any Scandinavian language, as well as for syntacticians and typologists interested in Scandinavian facts and data without necessarily being able to read Scandinavian.

Mathematics as an Educational Task Hans

Freudenthal, 2012-12-06 Like preludes, prefaces are usually composed last. Putting them in the front of the book is a feeble reflection of what, in the style of mathematics treatises and textbooks, I usually call the didactical inversion: to be fit to print, the way to the result should be the inverse of the order in which it was found; in particular the key definitions, which were the finishing touch to the structure, are put at the front. For many years I have contrasted the didactical inversion with the thought-experiment. It is true that you should not communicate your mathematics to other people in the way it occurred to you, but rather as it could have occurred to you if you had known then what you know now, and as it would occur to the student if his learning process is being guided. This in fact is the gist of the lesson Socrates taught Meno's slave. The thought-experiment tries to find out how a student could re-invent what he is expected to learn. I said about the preface that it is a feeble reflection of the didactical inversion. Indeed, it is not a constituent part of the book. It can even be torn out. Yet it is useful. Firstly, to the reviewer who then need not read the whole work, and secondly to the author himself, who like the composer gets an opportunity to review the Leitmotifs of the book.

Digital Convergence - Libraries of the Future

Rae Earnshaw, John Vince, 2007-09-20 The convergence of IT, telecommunications, and media is changing the way information is collected, stored and accessed. This revolution is having effects on the development and organisation of information and artefact repositories such as libraries and museums. This book presents key aspects in the rapidly moving field of digital convergence in the areas of technology and information sciences. Its chapters are written by international experts who are leaders in their fields.

Mathematical Knowledge in Teaching Tim

Rowland, Kenneth Ruthven, 2011-01-06 The quality of primary and secondary school mathematics teaching is generally agreed to depend crucially on the subject-related knowledge of the teacher. However, there is increasing recognition that effective teaching calls for distinctive forms of subject-related knowledge and thinking. Thus, established ways of conceptualizing, developing and assessing mathematical knowledge for teaching may be less than adequate. These are important issues for policy and practice because of longstanding difficulties in recruiting teachers who are confident and conventionally well-qualified in mathematics, and because of rising concern that teaching of the subject has not adapted sufficiently. The issues to be examined in *Mathematical Knowledge in Teaching* are of considerable significance in addressing global aspirations to raise standards of teaching and learning in mathematics by developing more effective approaches to characterizing, assessing

and developing mathematical knowledge for teaching.

Pensions at a Glance 2019 OECD and G20

Indicators OECD, 2019-11-27 The 2019 edition of *Pensions at a Glance* highlights the pension reforms undertaken by OECD countries over the last two years. Moreover, two special chapters focus on non-standard work and pensions in OECD countries, take stock of different approaches to organising pensions for non-standard workers in the OECD, discuss why non-standard work raises pension issues and suggest how pension settings could be improved.
