Transport, Mobility, and the Production of Urban Space Julie Cidell,David Prytherch,2015-05-01 The contemporary urban experience is defined by flow and structured by circulating people, objects, and energy. Geographers have long provided key insights into transportation systems. But today, concerns for social justice and sustainability motivate new, critical approaches to mobilities. Reimagining the city prompts an important question: How best to rethink urban geographies of transport and mobility? This original book explores connections – in theory and practice – between transport geographies and new mobilities in the production of urban space. It provides a broad introduction to intersecting perspectives of urban geography, transport geography, and mobilities studies on urban places of flows. Diverse, international, and leading-edge contributions reinterpret everyday intersections as nodes, urban corridors as links, cities and regions as networks, and the discourses and imaginaries that frame the politics and experiences of mobility. The chapters illuminate nearly all aspects of urban transport, from street regulation and roadway planning, intended and subversive practices of car and truck drivers, planning and promotion of mass transit investments, and the restructuring of freight and logistics networks. Together these offer a unique and important contribution for social scientists, planners, and others interested in the politics of the city on the move.

Challenges to Asian Urbanization in the 21st Century Ashok K. Dutt,A.G. Noble,G. Venugopal,S. Subbiah,2006-04-11 This book is unique in that it brings forth the nature and characteristics of 21st century Asian urbanization. It provides a basic framework, particularly as it relates to the patterns,

characteristics and problems associated with urbanization. Urban structural models are discussed in relation to their applicability and non-applicability. It is of relevance to researchers and students working in the fields of social geography, Asian studies, urban economies, urban and regional planning and social issues.

Popular Culture in Taiwan Marc L. Moskowitz, 2010-10-18 The growing field of popular culture studies in Taiwan can be divided into two distinct academic trends; a different analytical framework is used to examine either locally oriented popular culture or transnational pop culture. This volume combine these two academic trends, firstly by revealing that localized popular culture in Taiwan is in many ways a merging of Chinese, Japanese, American, and indigenous cultures and therefore is a form of hybridity that arose long before the term became popular. Secondly, the chapters show that the transnational character of Taiwan's pop culture is one of the more important ways that it distinguishes itself from mainland China. In other words, it is precisely Taiwan's transnational hybrid character that helps to define it as a distinctive local space. The contributors explore how traditional Chinese influences modern localized lives in Taiwan, localized identity, culture, and politics as a contested domain with Chinese and traditional Taiwanese identities and Taiwan's localization process as contesting Taiwan's gravitation towards globalized Western culture. Including chapters on baseball, poetry, pop music, puppets and Harry Potter, Popular Culture in Taiwan is an accessible and stimulating read for those studying the culture and society of Taiwan and China as well as cultural studies more generally.

Politics of Difference in Taiwan T.W. Ngo, Hong-zen Wang, 2011-05-10 Taiwan has been hailed as a successful case of democratization. Compared with many other nations, the transition from authoritarian rule occurred in a rather orderly fashion. Group consciousness emerged as a reaction to

the decades-long suppression of cultural diversity under martial law as different social groups competed fiercely to exert their political subjectivity. This volume is the first study to examine the politics of difference in Taiwan. It aims to go beyond ethnic identity as the sole concern for group boundary, to acknowledge the interests of other marginalized groups, and to look behind reified group boundaries in order to discover group differences as mediated social relations based on overlapping boundaries rather than exclusive opposition. In exploring the politics of difference among minority groups and the problems arising from their struggle over political recognition, the book challenges the assumptions that groups are ontologically given, that groups are internally homogenous, and that the particularistic identities have no overlap. The chapters offer a broad coverage of major social groups including ethnic minorities, recent migrants, gay and lesbian groups, and marginalized workers. They offer perspective analyses of the ongoing struggles by minority groups to overcome subordination. .

Green Urbanism in Asia Peter Newman, Anne Matan, 2013 The world is facing an age of scarcity which will challenge all cities to reduce their resource footprint, especially carbon, improve biodiversity and at the same time continue to create economic opportunities and liveable places. This is green urbanism. Asian urban growth is leading the world in the rapidity of its change but how is it doing on green urbanism? This book finds emerging innovations and first signs of green urbanism in Asia and suggests they may be the guiding light for the rest of the world. The authors highlight seven archetypal cities exhibiting green urbanism: the renewable energy city, the bioregional carbon neutral city, the distributed city, the biophilic city, the eco-efficient city, the place-based city and the sustainable transport city. The book is a must-read for all who are concerned with the future of our cities as it instills hope that a greener urban future is possible.

Proceedings of the International Symposium on New Generation Design Codes for Geotechnical Engineering Practice - Taipei 2006 Meei-Ling Lin, 2006 Communication of design risk within a transparent and rational framework is necessary in view of the increasing interest in code harmonization, public involvement in defining acceptable risk levels, and risk-sharing among client, consultant, insurer, and financier. Activities in code harmonization are particularly noteworthy. For the

geotechnical engineering profession, there is added pressure for it to undergo a significant revamp because structural and geotechnical design are increasingly incompatible. The contributions in this volume tackle the important issues relating to new generation geotechnical design codes, in a bid to move geotechnical engineers forward together with the significant changes occurring at the global level. Sample Chapter(s). Chapter 1: Limit States Design Based Codes for Geotechnical Aspects of Foundations in Canada (195 KB). Contents: Code Concept and Harmonization; Performance Oriented Geotechnical Analysis; Geotechnical Reliability Analysis; Geohazards; Engineering Practice and Challenges; Geotechnical Uncertainties and Variabilities. Value for Money Andrew Podger, Tsai-tsu Su, John Wanna, Hon S. Chan, Meili Niu, 2018-01-11 The Greater China Australia Dialogue on Public Administration has held annual workshops since 2011 on public administration themes of common interest to the People's Republic of China, Taiwan and Australia. This book presents and discusses a selection of papers developed from the Dialogue's fifth workshop held in late 2015 hosted by the National Taiwan University in Taipei. The theme, 'Value for Money', focused on budget and financial management reforms, including how different nations account for the relative performance of their public sectors. All governments face the challenge of scarce resources requiring budgetary management processes for identifying the resources required by and available to government, and then for allocating them and ensuring their use or deployment represents value for money. Such budgetary and financial management processes need to inform decision-making routinely and protect the integrity of the way public resources are used – with some public accountability to indicate that their uses are properly authorised and reflect the policies of legitimate government leaders. The chapters in this book explore budgeting and financial management in three very different jurisdictions: Australia, the People's Republic of China and the

Republic of China (Taiwan). These activist and at times innovative countries are keen to analyse and reflect upon each other's policy achievements and patterns of public provision. They are keen to learn more about each other as their economic and social engagement continues to deepen. They are also conscious that fundamental differences exist in terms of economic development and global strategic positioning, and levels and philosophies of political development; to an extent these differences are representative of differences amongst countries around the globe.

The KMT Returns to Power John Franklin Copper, 2013 In this book the author examines how the Nationalist Party (Kuomintang or KMT) returned to govern Taiwan after ruling for more than half a century but losing power in 2000 when the opposition Democratic Progressive Party's (DPP) Chen Shui-bian won the presidency and was reelected in 2004. Out of power and playing the role of opposition party the KMT won legislative and executive elections in 2008. It subsequently won mayoral elections in 2010 and elections again to the legislative and executive branches of government in 2012. The KMT returned to power by resolving internal differences between older and younger factions in the party, maintaining an alliance with friendly parties and preventing philosophical differences from mattering. It was helped by the debilitating corruption of the DPP's President Chen and good campaigning. In assessing these KMT election victories the author concludes that the KMT will probably remain the ruling party for some time. Its reputation for good economic management, democratization, honesty and good leaders seen against the DPP's still damaged reputation due to Chen's corruption, internal disagreements, its perorocial base, its inability to deal with China and the United States inhibit it from being able to return to power.
