Language in Public Spaces in Japan Nanette Gottlieb,2014-06-11 This book throws light on ideologies, practices and sociocultural developments currently shaping language use in Japan by departing from the more common investigation of language in private contexts and examining aspects of the language found in a range of significant public spaces, from the material (an international airport, the streets of Tokyo, the JSL classroom in Japan and courtrooms) to the electronic (television dramas, local government web pages and cyberspace). Through its study of the language encountered in such settings, the volume provides a deeper understanding of multifaceted aspects of linguistic diversity, both in terms of the use of languages other than Japanese and of issues relating to the Japanese language itself. The variety of theoretical approaches brought to bear by contributing authors ensures a substantial intellectual contribution to the literature on language in contemporary Japan. This book was published as a special issue of Japanese Studies.

A History of the Korean Language Ki-Moon Lee,S. Robert Ramsey,2011-03-03 A History of the Korean Language is the first book on the subject ever published in English. It traces the origin, formation, and various historical stages through which the language has passed, from Old Korean through to the present day. Each chapter begins with an account of the historical and cultural background. A comprehensive list of the literature of each period is then provided and the textual record described, along with the script or scripts used to write it. Finally, each stage of the language is analyzed, offering new details supplementing what is known about its phonology, morphology, syntax, and lexicon. The extraordinary alphabetic materials of the 15th and 16th centuries are given special attention, and are used to shed light on earlier, pre-alphabetic periods.

Digital Contact Tracing for Pandemic Response Jeffrey P. Kahn,Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies,2020-05-29 As nations race to hone contact-tracing efforts, the world's experts consider strategies for maximum transparency and impact. As public health professionals around the world work tirelessly to respond to the COVID-19 pandemic, it is clear that traditional methods of contact tracing need to be augmented in order to help address a public health crisis of unprecedented scope. Innovators worldwide are racing to develop and implement novel public-facing technology solutions, including digital contact tracing technology. These technological products may aid public health surveillance and containment strategies for this pandemic and become part of the larger toolbox for future infectious outbreak prevention and control. As technology evolves in an effort to meet our current moment, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies—a rapid research and expert consensus group effort led by Dr. Jeffrey P. Kahn of the Johns Hopkins Berman Institute of Bioethics in collaboration with the university's Center for Health Security—carried out an in-depth analysis of the technology and the issues it raises. Drawing on this analysis, they produced a report that includes detailed recommendations for technology companies, policymakers, institutions, employers, and the public. The project brings together perspectives from bioethics, health security, public health, technology development, engineering, public policy, and law to wrestle with the complex interactions of the many facets of the technology and its applications. This team of experts from Johns Hopkins University and other world-renowned institutions has crafted clear and detailed guidelines to help manage the creation, implementation, and application of digital contact tracing. Digital Contact Tracing for Pandemic Response is the essential resource for this fast-moving crisis.
