Wenn Kunst behindert wird Viola Luz, 2014-03-31 Was haben die Hamburger und die Mainzer Kunsthalle gemeinsam? Beides sind Orte, an denen Werke von Künstler_innen gezeigt wurden bzw. werden, die als geistig behindert gelten. Die Ausstellungen scheinen einer vorschnellen Ablehnung des Kunststatus der präsentierten Werke ebenso entgegenzustehen wie der These, dass die Urhebenden und ihre Werke in unserer Gesellschaft »behindert« werden. Auf der Basis der Diskursanalyse und im Rahmen der Disability Studies analysiert Viola Luz die Auseinandersetzungen in Kunstbetrieb, Kunstgeschichte und Gesellschaft mit dem Ziel, weitreichende praxisorientierte und kunstpolitische Perspektiven auf die Kunst geistig behinderter Menschen zu entwickeln.

Oil, Gas, and Crime Rick Ruddell, 2017-07-22 This book addresses the causes of rising crime rates resulting from the rapid population growth and industrialization associated with natural resource extraction in rural communities. Ruddell describes the social problems emerging in these boomtowns, including increases in antisocial behavior, as well as property-related and violent crime, industrial mishaps and traffic collisions. Many of the victims of these crimes are already members of vulnerable or marginalized groups, including rural women, Indigenous populations, and young people. The quality of life in boomtowns also decreases due to environmental impacts, including air, water and noise pollution. Law enforcement agencies, courts, and correction facilities in boomtowns are often overwhelmed by the growing demand as these places are seldom able to manage the population growth. The key questions addressed here are: who should pay the costs of managing these booms, and how can we prepare communities to mitigate the worst effects of this growth and development and, ultimately, increase the quality of life for boomtown residents. An in-depth and timely study, this original work will be of great interest to scholars of violent crime, criminal justice, and corporate harm.

Holzbau Francois Colling, 2009-01-20 Dieses Lehrbuch behandelt die Bemessung von Holzbauteilen und Verbindungen nach der aktuellen DIN 1052. Die Änderungen, die sich aus dem Änderungspapier A1 zur DIN 1052 ergeben, sind bereits berücksichtigt und für den Anwender deutlich gekennzeichnet. In der 2. Auflage wurde eine Umstellung aller zulässigen Werte auf die sogenannten charakteristischen Werte bei der Bemessung vorgenommen, da diese Werte auch für weiterführende Berechnungen z.B. im Brandschutz relevant sind. Aufbauend auf dem neuen Sicherheitskonzept vermittelt der Autor die Grundlagen der Bemessung und erläutert Hintergründe in zahlreichen Bildern, Skizzen und Tabellen. 98 Beispiele erklären die Theorie praxisgerecht und verständlich. Die Lösungen zu

diesen Beispielen sind im Lehrbuch Holzbau-Beispiele zusammengefasst.

Understanding Transgender Identities James K.

Beilby, Paul Rhodes Eddy, 2019-11-05 One of the most pressing issues facing the evangelical church today involves dramatic shifts in our culture's perceptions regarding human sexuality. While homosexuality and same-sex marriage have been at the forefront, there is a new cultural awareness of sexual diversity and gender dysphoria. The transgender phenomenon has become a high-profile battleground issue in the culture wars. This book offers a full-scale dialogue on transgender identities from across the Christian theological spectrum. It brings together contributors with expertise and platforms in the study of transgender identities to articulate and defend differing perspectives on this contested topic. After an introductory chapter surveys key historical moments and current issues, four views are presented by Owen Strachan, Mark A. Yarhouse and Julia Sadusky, Megan K. DeFranza, and Justin Sabia-Tanis. The authors respond to one another's views in a respectful manner, modeling thoughtful dialogue around a controversial theological issue. The book helps readers understand the spectrum of views among Christians and enables Christian communities to establish a context where conversations can safely be held.

Modern Corporate Finance, Investments and Taxation Peter Brusov, Tatiana Filatova, Natali Orekhova, Mukhadin Eskindarov, 2015-06-02 This monograph is devoted to the modern theory of capital cost and capital structure and its application to the real economy. In particular, it presents a possible explanation to the causes of global financial crisis. The authors of the book

modify the theory of Nobel Prize winners Modigliani and Miller to describe an alternative theory of capital cost and capital structure that can be applied to corporations with arbitrary lifetime and investment projects with arbitrary duration. The authors illustrate their theory with examples from corporate practice and develop investment models that can be applied by companies in their financial operations.

Mother of My Heart, Daughter of My Dreams Rachel Fell McDermott, 2001-06-28 This book chronicles the rise of goddess worship in the region of Bengal from the middle of the eighteenth century to the present. Focusing on the goddesses Kali and Uma, McDermott examines lyrical poems written by devotees from Ramprasad Sen (ca. 1718-1775) to Kazi Nazrul Islam (1899-1976).

Huntington's Disease Clay Farris Naff, 2012-06-12

Huntington's Disease causes degeneration of brain cells, in motor control regions of the brain, as well as other areas. Symptoms get progressively worse, and include uncontrolled movements, abnormal body postures, and changes in emotion, behavior, judgment, and cognition. People with HD also develop impaired coordination, slurred speech, and difficulty feeding and swallowing. Provide your readers with essential information on HD. This book also serves as a historical survey, by providing information on the controversies surrounding its causes.

Compelling first-person narratives by people coping with Huntington's Disease give readers a first-hand experience. Patients, family members, or caregivers explain the condition from their own experience. The symptoms, causes, treatments,

and potential cures are explained in detail. Essential to anyone trying to learn about diseases and conditions, the alternative treatments are explored. Student researchers and readers will find this book easily accessible through its careful and conscientious editing and a thorough introduction to each essay.

Modern Corporate Finance, Investments, Taxation and Ratings Peter Brusov, Tatiana Filatova, Natali Orekhova, Mukhadin Eskinidarov, 2018-11-11 This monograph is devoted to a modern theory of capital cost and capital structure created by this book's authors, called the Brusov-Filatova-Orekhova (BFO) theory, and its application to the real economy. BFO theory promises to replace the traditional theory of capital cost and capital structure by Nobel laureates Modigliani and Miller. This new theory in particular, presents a possible explanation to the causes of the recent global financial crisis. The authors of the book describe the general theory of capital cost and capital structure that can be applied to corporations of arbitrary age (or with arbitrary lifetime) and investment projects with arbitrary duration. The authors illustrate their theory with examples from corporate practice and develop investment models that can be applied by companies in their financial operations. This updated second edition includes new chapters devoted to the application of the BFO theory in ratings, banking and other areas. The authors also provide a new approach to rating methodology highlighting the need for including financial flow discounting, the incorporation of rating parameters (in particular, financial ratios) into the modern theory of capital structure - BFO theory. This book aims to change our understanding of corporate finance, investments, taxation and rating procedures. The authors emphasize that the most used principles of financial management should be changed in accordance to BFO theory.
