Digital Passages: Migrant Youth 2.0 Koen

Leurs, 2016-12-15 Increasingly, young people live online, with the vast majority of their social and cultural interactions conducted through means other than face-to-face conversation. How does this transition impact the ways in which young migrants understand, negotiate, and perform identity? That's the question taken up by *Digital Passages: Migrant Youth 2.0*, a ground-breaking analysis of the ways that youth culture online interacts with issues of diaspora, gender, and belonging. Drawing on surveys, in-depth interviews, and ethnography, Koen Leurs builds an interdisciplinary portrait of online youth culture and the spaces it opens up for migrant youth to negotiate power relations and to promote intercultural understanding.

VIDEOBLOGGING BEFORE YOUTUBE. TRINE.
BJRKMANN BERRY,2018

DIY Media Michele Knobel,Colin Lankshear,2010
Schools remain notorious for co-opting digital technologies to «business as usual» approaches to teaching new literacies. DIY Media addresses this issue head-on, and describes expansive and creative practices of digital literacy that are increasingly influential and popular in contexts beyond the school, and whose educational potential is not yet being tapped to any significant degree in classrooms. This book is very much concerned with engaging students in do-it-yourself digitally mediated meaning-making practices. As such, it is organized around three broad areas of digital media: moving media, still media, and audio media. Specific DIY media practices addressed in the chapters include machinima, anime music videos, digital photography, podcasting, and music remixing. Each chapter opens with an overview of a specific DIY media practice, includes a practical how-to tutorial section, and closes with suggested applications for

classroom settings. This collection will appeal not only to educators, but to anyone invested in better understanding - and perhaps participating in - the significant shift towards everyday people producing their own digital media.

Innovation, Economic Development, and Intellectual Property in India and China Kung-Chung Liu, Uday S. Racherla, 2019-09-06 This open access book analyses intellectual property codification and innovation governance in the development of six key industries in India and China. These industries are reflective of the innovation and economic development of the two economies, or of vital importance to them: the IT Industry; the film industry; the pharmaceutical industry; plant varieties and food security; the automobile industry; and peer production and the sharing economy. The analysis extends beyond the domain of IP law, and includes economics and policy analysis. The overarching concern that cuts through all chapters is an inquiry into why certain industries have developed in one country and not in the other, including: the role that state innovation policy and/or IP policy played in such development; the nature of the state innovation policy/IP policy; and whether such policy has been causal, facilitating, crippling, co-relational, or simply irrelevant. The book asks what India and China can learn from each other, and whether there is any possibility of synergy. The book provides a real-life understanding of how IP laws interact with innovation and economic development in the six selected economic sectors in China and India. The reader can also draw lessons from the success or failure of these sectors.

The Future of Identity in the Information Society

Simone Fischer-Hübner,Penny Duquenoy,Albin

Zuccato,Leonardo Martucci,2010-08-25 The increasing

diversity of Information Communication Technologies and their equally diverse range of uses in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. Each communication exchange contains an identifier which may, or may not, be intended by the parties involved. What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked information society? th From the 6 to the 10 August 2007, IFIP (International Federation for Information Processing) working groups 9. 2 (Social Accountability), 9. 6/11. 7 (IT Misuse and the Law) and 11. 6 (Identity Management) hold their 3 International

Summer School on The Future of Identity in the Infonnation Society in cooperation with the EU Network of Excellence FIDIS at Karlstad University. The Summer School addressed the theme of Identity Management in relation to current and future technologies in a variety of contexts. The aim of the IFIP summer schools has been to introduce participants to the social implications of Infonnation Technology through the process of infonned discussion. Following the holistic approach advocated by the involved IFIP working groups, a diverse group of participants ranging from young doctoral students to leading researchers in the field were encouraged to engage in discussion, dialogue and debate in an infonnal and supportive setting. The interdisciplinary, and intemational, emphasis of the Summer School allowed for a broader understanding of the issues in the technical and social spheres.

Habits of a Successful Musician Scott Rush, Rich Moon, 2021

Tube Ritual Brian G. Johnson, 2018-10-02 A successful YouTuber shares his strategic system for growing a channel—and going from zero to thousands of subscribers. You have to start with no videos, views, or subscribers. Furthermore, more than four hundred minutes of content is uploaded to YouTube each minute. To say that it's challenging to grow a channel is an understatement! In fact, less than three percent of YouTube channels ever gain more than ten thousand subscribers. Yet, in a one-year period, Brian G. Johnson gained 10,623 subscribers and drove over

half a million video views. Truly beginning from zero, Brian had no previous YouTube success to draw from and had to learn the nuances of camera settings, editing options, and technical details that often become roadblocks.

Furthermore, he did it in a small and competitive niche, the YouTube video marketing niche. How, you ask? By researching, testing, and tweaking various video growth methods over a one-year period in order to identify why the YouTube algorithm promotes one video over another.

Ultimately, this led to the creation of a video ritual based on his findings—a series of actions according to a prescribed order. More than a mere guide, Tube Ritual is a one-year case study with the goal of driving more views and converting more viewers into subscribers. For those already creating videos or who want to in the future, Tube Ritual contains detailed, step-by-step information that plain works. Covering topics from branding to thumbnails, video structure, YouTube SEO, video calls to action, playlist strategies, channel strategies, and more, Tube Ritual leaves no stone unturned.

In Jay Neal's "The Lighthouse Keep," a stranded traveler stumbles into a ghost story, a murder mystery, and a skin-tingling S/M thriller

rolled into one, complete with B-movie storm effects and a gnarled ancient mariner. Cat Tailor's "There's More to Kink than Leather" follows a leather daddy as he makes a crucial misstep into a drag bar, where the queens are restless for new subjects.
