**Mathematics of Keno and Lotteries** Mark Bollman, 2018-04-17 Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called winning systems for keno and lotteries are examined mathematically and their flaws identified.

*Culinary Culture in Colonial India* Utsa Ray,2015-01-05 This book utilizes cuisine to understand the construction of the colonial middle class in Bengal who indigenized new culinary experiences as a result of colonial modernity. This process of indigenization developed certain social practices, including imagination of the act of cooking as a classic feminine act and the domestic kitchen as a sacred space. The process of indigenization was an aesthetic choice that was imbricated in the upper caste and patriarchal agenda of the middle-class social reform. However, in these acts of imagination, there were important elements of continuity from the pre-colonial times. The book establishes the fact that Bengali cuisine cannot be labeled as indigenist although it never became widely commercialized. The point was to cosmopolitanize the domestic and yet keep its tag of 'Bengaliness'. The resultant cuisine was hybrid, in many senses like its makers.
