Keywords in Writing Studies Paul Heilker, Peter Vandenberg, 2015-02-15 **Keywords in Writing Studies** is an exploration of the principal ideas and ideals of an emerging academic field as they are constituted by its specialized vocabulary. A sequel to the 1996 work **Keywords in Composition Studies**, this new volume traces the evolution of the field's lexicon, taking into account the wide variety of theoretical, educational, professional, and institutional developments that have redefined it over the past two decades. Contributors address the development, transformation, and interconnections among thirty-six of the most critical terms that make up writing studies. Looking beyond basic definitions or explanations, they explore the multiple layers of meaning within the terms that writing scholars currently use, exchange, and question. Each term featured is a part of the general disciplinary parlance, and each is a highly contested focal point of significant debates about matters of power, identity, and values. Each essay begins with the assumption that its central term is important precisely because its meaning is open and multiplex. **Keywords in Writing Studies** reveals how the key concepts in the field are used and even challenged, rather than advocating particular usages and the particular vision of the field that they imply. The volume will be of great interest to both graduate students and established scholars.

The book will serve as an invaluable resource for advanced undergraduate and graduate-level students, as well as professional researchers and consultants from diverse backgrounds pursuing qualitative projects.
