*One Day of Life* Manlio Argueta,1991-01-09 Celebrated for the authenticity of its vernacular style and the incandescence of its lyricism, One Day of Life depicts a typical day in the life of a peasant family caught up in the terror and corruption of civil war in El Salvador. 5:30 A.M. in Chalate, a small rural town: Lupe, the grandmother of the Guardado family and the central figure of the novel, is up and about doing her chores. By 5:00 P.M. the plot of the novel has been resolved, with the Civil Guard's search for and interrogation of Lupe's young granddaughter, Adolfina. Told entirely from the perspective of the resilient women of the Guardado family, One Day of Life is not only a disturbing and inspiring evocation of the harsh realities of peasant life in El Salvador after fifty years of military exploitation; it is also a mercilessly accurate dramatization of the relationship of the peasants to both the state and the church. Translated from the Spanish by Bill Brow

**Purkinje's Vision** Nicholas J. Wade,Josef Brozek,Jiri Hoskovec,2001-04-01 The life of Jan Evangelista Purkinje (1787-1869) has fascinated students from many disciplines. Histologists marvel at his early descriptions of cells; physiologists admire his attempts to relate structure to function; pharmacologists view in awe his heroic experiments on self-administered drugs; forensic scientists acknowledge his role in the use of fingerprints for identification; and Czech patriots salute his awakening of pride in their nation. Yet all these achievements followed his initial enquiries into vision. It is this psychological dimension that fostered this collaboration. As the title suggests, the present volume is bifocal. In the narrow sense it refers to Purkinje's studies of vision, but in its broader view it concerns Purkinje's anticipation of neuroscience. Purkinje provided evidence to support both its cellular and its conceptual base. At the cellular level his acute vision is immortalized within our bodies. At the conceptual level, he sought to relate subjective phenomena to their objective underpinnings--to link psychology to physiology. Vision provides a bond that unites psychology and physiology, and it is this bond that was strengthened by Purkinje's enquiries. The authors have tried to provide a context in which Purkinje's descriptions of visual phenomena can be placed. In some cases this exposes clear precursors of research for which Purkinje has been credited. In others, there was nothing to suggest the phenomena that he exposed. The book translates Purkinje's initial masterpiece on subjective vision and places it in the context of emerging views of neuroscience.
