**Glomerulonephritis and Nephrotic Syndrome** Thomas Rath,2019-10-30 Chronic kidney disease is a worldwide disease affecting up to 4% of the population. In many cases, glomerulonephritis is the underlying disease leading to kidney failure. One hallmark of glomerulonephritis is proteinuria, which may in its most severe form lead to nephrotic syndrome. In seven chapters, this book puts light on different aspects related to the pathophysiology and clinical aspects of glomerulonephritis. In addition, chapters dealing with the importance of biomarkers in patients with glomerulonephritis will be beneficial for the open-minded reader. Nevertheless, new insights in renal rehabilitation in patients with chronic kidney disease will be provided.

**Automated Peritoneal Dialysis** Claudio Ronco, 1999-01-01 While continuous ambulatory peritoneal dialysis (CAPD) has been the standard peritoneal procedure since the seventies, different schedules of automated peritoneal dialysis (APD) have emerged during the eighties. Today, APD is considered a valuable tool in the management of ESRD patients, together with CAPD and hemodialysis. However,

despite its frequent use, APD has not yet been well assessed, and most pathophysiological and clinical studies on PD refer to CAPD. In this book, major experts in the field therefore discuss and evaluate the insights gained on APD up to now, presenting a comprehensive review of all experimental, technical and clinical aspects related to the various treatments grouped under the definition of APD. The recent developments presented are divided into four sections: membrane permeability, transport mechanisms and kinetic modeling applied to APD; prescription and adequacy of different APD treatment schedules; dialysis machines and solutions for APD, and, lastly, different clinical aspects such as the possibility to maintain APD program and residual renal function. Physicians involved in ESRD care, renal fellows and scientists both in the academic world and in the hospital setting will undoubtedly profit from this timely publication.
