Letter Tracing Tracing School The New,2019-09-22 Find out how your toddler can learn 26 (Uppercase letters) + 26 (Lowercase letters) + 10 (numbers thanks) thanks to a simple book that has already helped 97 children in the last month. Read on to find out how you can help your child. We studied which are the best and most effective ways of learning to write, and we have discovered that the child needs a few simple lines to follow. The shape had to suggest the shape by itself but not the direction, so he can freely choose how to trace it. We found out that he needs to see things big and clear. He needs to be able to touch and follow them with no distractions. Studies tell us that the child needs to learn to recognize shapes and to make connections between these shapes. For all these reasons, and the result of great experience in teaching, we decided to create a book that contains Bold letters (neat line) Big letters Uppercase alphabet Lowercase alphabet Dashed Lines NO directions Numbers We know that you want only the best for your child, that's why we decided to create a simple book (really simple!) that provides all that the child needs to learn to trace the alphabet. In this book there are no distractions, only dashed letters (and numbers) that helps the child to focus on learning. Even if your child has never used any tracing book, will understand immediately how it works.

The learning experience is at least 53 times better with the paperback version of this book, so I recommend you to buy the book instead of the kindle version.
