Number Sense Routines Jessica Shumway, 2023-10-10

In this groundbreaking and highly practical book, *Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3*, author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise. Shumway created a series of math routines designed to help young students strengthen and build their facility with numbers. These quick 5, 10, or 15 minute exercises are easy to implement as an add-on to any elementary math curriculum. Understanding Number Sense: Students with strong number sense understand numbers, how to subitize, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies, and use visual models to solve problems. *Number Sense Routines* supports the early learner by instilling the importance of daily warm-ups and explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: *Number Sense Routines* demonstrates the importance of listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy. Shumway writes, As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number

sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will come away with new ideas and tools to use in your own classroom.

The Littlest Math Book - Adding and Subtracting Sarah Brown, 2016-02-05 This is a tiny Math Book designed to be fun, intriguing and irresistible. 100 Pages of Art, Math, Logic and Activities that will help your child to figure out how to ADD & SUBTRACT without any of those boring old methods. Your child will be able to master his or her adding and subtracting skills without the usual memorization and flash card methods that cause children to dislike math. This is a beginners book of addition, subtraction and skip counting and it can be used for all ages. There are some activities designed to be enjoyed together - with a parent or older sibling. Many activities can be enjoyed without any help from grown-ups. We use Art & Logic to teach math - it's more like a game book than a workbook. This book is not designed for a specific age or grade level, it is for children who have not mastered their addition and subtraction skills. Many older children who have had trouble with memorization can use this book to overcome problems with learning math facts. This book can also be used as a 1st math book for children who can count to 50 and know how to write numbers. The logic games in this book ensure that the activities will be interesting for older children, but the games are still simple enough to be used with little children - with a little help from a parent. In this little book we call our math problems Math Mysteries, so kids don't grow up thinking

that math is a problem to be avoided but a mystery to be solved. This little book is a lot of fun because your child will even get the chance to be CREATIVE with math and numbers! there are some pages where the child is asked to create a math problem for someone older - like mom, dad, or a big brother or sister! Who knew math could be so much fun. This book is designed to be enjoyed together. So get some colored pencils or gel pens and help your child color the cute little characters. If your child struggles with any of the Math Mysteries you should say It might be hard, but it looks like FUN! can I try it? If the child says Yes then you can take a turn solving some Math Mysteries - this is how you can be an example to your child of how to do math, and how to have a good attitude towards learning and solving problems... I mean mysteries!
