13 Things Mentally Strong People Don't Do Amy Morin,2014-12-23 Kick bad mental habits and toughen yourself up.—Inc. Master your mental strength—revolutionary new strategies that work for everyone from homemakers to soldiers and teachers to CEOs. Everyone knows that regular exercise and weight training lead to physical strength. But how do we strengthen ourselves mentally for the truly tough times? And what should we do when we face these challenges? Or as psychotherapist Amy Morin asks, what should we avoid when we encounter adversity? Through her years counseling others and her own experiences navigating personal loss, Morin realized it is often the habits we cannot break that are holding us back from true success and happiness. Indulging in self-pity, agonizing over things beyond our control, obsessing over past events, resenting the achievements of others, or expecting immediate positive results holds us back. This list of things mentally strong people don't do resonated so much with readers that when it was picked up by Forbes.com it received ten million views. Now, for the first time, Morin expands upon the thirteen things from her viral post and shares her tried-and-true practices for increasing mental strength. Morin writes with searing honesty, incorporating anecdotes from her work as a college psychology instructor and psychotherapist as well as personal stories about how she bolstered her own mental strength when tragedy threatened to consume her. Increasing your mental strength can change your entire attitude. It takes practice and hard work, but with Morin's specific tips, exercises, and troubleshooting advice, it is possible to not only fortify your mental muscle but also drastically improve the quality of your life.

The Faces of Televisual Media Edward L. Palmer, Brian M. Young, 2003-10-17 This collection offers original, state-of-the-art contributions from leading authorities in children's televisual media. International researchers from communication and psychology provide readers with ready access to current televisual research, trends, and policymaking/political climate issues pertaining to children. This second edition provides a current summary of studies on content, viewing patterns, comprehension, effects, and individual differences in instructional and educational programming, televisual entertainment and violence programming, and televisual advertising to children. Editors Edward L. Palmer and Brian M. Young have structured the volume into three sections examining the faces of television: the Teaching (instructional/educational) Face, the Violent Face, and the Selling (advertising) Face. Chapters within each section identify and focus recurrent themes while integrating them topically into a coherent whole. Each area incorporates new technologies and considers their potentials, effects, and future. Subjects featured in the various chapters include: *cross-cultural and historical comparisons with an in-depth perspective on the BBC and other European/Asian televisual media roots, as well as America's formative televisual media roots; *an examination of key differences between developed and developing countries; *implications of emerging instructional/educational media for children's education--addressing both cognitive and multi-ethnic aspects; and * prominent, informed challenge to the prevailing popular view that children are unaffected and unharmed by exposure to media violence. This volume informs ongoing debates across a broad spectrum of current, critical issues, and suggests avenues for future research. It is pertinent and provocative for the most sophisticated scholar in the field, as well as for students in areas of developmental or social psychology, communication, education, sociology, marketing, broadcasting and film, public policy, advertising, and medicine/pediatrics. It is also appropriate for courses in children, media, and society.

Joel & Cat Set the Story Straight Nick Earls, Rebecca Sparrow, 2007-07-30 Joel and Cat Set the Story Straight is two weeks in the life of Joel

Hedges and Cat Davis. Joel would prefer to get through his final year of high school without Cat Davis or his mother's faux Spanish boyfriend and just hang-out with his best-friend Luke. Cat Davis has an annoying best-friend, an even more annoying little brother, and a deep abiding hatred of Joel Hedges. Due to an unfortunate incident involving a leaking pen and suspected outbreak of Bird Flu, Joel and Cat are forced to sit next to each other in Extension English. To make matters worse, and to their mutual horror, they are paired together for a tandem story writing assignment. What ensues reveals a lot about how smug teenage boys are and what teenage girls really think. No, wait – it's about a sane female and an insane male. It's about revenge and mistaken identity.

Reset Your Child's Brain Victoria L. Dunckley, MD, 2015-06-16 Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices — such as computers, video games, smartphones, and tablets — can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track — all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.
