Read, Write, and Trace Numbers 1-10 for Ages +2
S M Kids Design, 2020-09-08 This book teaches the basics of mathematics for a pre-school child, where it is suitable for children from 2 years and up and is one of the useful and wonderful ways to make the child recognize the numbers from (1) to (10) in the form and letters as well, as to teach him how to prepare them in an easy, simple and loving way. Parents will find different ways to start teaching their children numbers, and we have explained to each section how to make their children easier to deal with. We've been getting progressively more gradual in these ways, from making it recognize numbers to training it to write it in an easy, fun, and repeated way. The book pages had to be vaccinated with images that children like, whether animals or young children so that they would be more fun to learn, which would love the book and learn from its first

years. We mixed all of this by making it an activity that all children love, which is to paint the colors that he loves as dictated by his imagination. We also made the size of the book large (8.5/11 inches) that it would comfortably practice the collection of activities in the book through carefully studied space, as well as the number of pages suitable for this age.

Eighty noncompetitive games and participatory activities, plus nature, art, craft, and food experiences introduce the excitement of numbers and their place in daily life.
