Drawdown Paul Hawken,2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

The Train to Crystal City Jan Jarboe Russell,2015-01-20 The New York Times bestselling dramatic and never-before-told story of a secret FDR-approved American internment camp in Texas during World War II: “A must-read....The Train to Crystal City is compelling, thought-provoking, and impossible to put down” (Star-Tribune, Minneapolis). During World War II, trains delivered thousands of civilians from the United States and Latin America to Crystal City, Texas. The trains carried Japanese, German, and Italian immigrants and their American-born children. The only family internment camp during the war, Crystal City was the center of a government prisoner exchange program called “quiet passage.” Hundreds of prisoners in Crystal City were exchanged for other more ostensibly important Americans—diplomats, businessmen, soldiers, and missionaries—behind enemy lines in Japan and Germany. “In this quietly moving book” (The Boston Globe), Jan Jarboe Russell focuses on two American-born teenage girls, uncovering the details of their years spent in the camp; the struggles of their fathers; their families’ subsequent journeys to war-devastated Germany and Japan; and their years-long attempt to survive and return to the United States, transformed from incarcerated enemies to American loyalists. Their stories of day-to-day life at the camp, from the ten-foot high security fence to the armed guards, daily roll call, and censored mail, have never been told. Combining big-picture World War II history with a little-known event in American history, *The Train to Crystal City* reveals the war-time hysteria against the Japanese and Germans in America, the secrets of FDR’s tactics to rescue high-profile POWs in Germany and Japan, and above all, “is about identity, allegiance, and home, and the difficulty of determining the loyalties that lie in individual human hearts” (Texas Observer).
