  Battle for the Ruhr Derek S. Zumbro,2006 Derek

Zumbro chronicles this key military campaign from a unique and fresh perspective - that of the defeated German soldiers and civilians caught in the final maelstrom of the war's western front. Zumbro chronicles the relentless assault on the Ruhr Pocket through German eyes, as the Allied juggernaut battered the region's cities, villages, and homes into submission. He tells of children pressed into service by a desperate Nazi regime - and of even more desperate parents trying to save their sons from sacrifice at the eleventh hour. He also tells of unspeakable conditions suffered by foreign laborers, POWs, and political opponents in the Ruhr Valley and of the mass graves that gave Allied soldiers a grisly new understanding of their enemy. Zumbro also recounts the story of Field Marshal Walter Model's final hours. His eventual suicide effectively ended the existence of the Wehrmacht's once-formidable Army Group B after being pursued, methodically encircled, and finally destroyed by U.S. and British forces. Through interviews with surviving members of Model's former staff, Zumbro has uncovered the attitudes of beleaguered officers that official records could never convey. Other interviews with former soldiers reveal the extent to which Allied bombing contributed to the rapid deterioration of German combat effectiveness and tell of civilians begging soldiers to abandon the war. Zumbro's research reveals the identities of specific characters discussed in previous works but never identified, describes the final hours of German officers executed for the loss of the bridge at Remagen, and offers new insight into Model's

acquiescence to Hitler in military affairs.--BOOK JACKET.

Stop Teaching Our Kids To Kill, Revised and Updated Edition Lt. Col. Dave Grossman,Gloria Degaetano,2014-08-05 Completely revised and updated, a much-needed call to action for every parent, teacher, and citizen to help our children and stop the wave of killing and violence gripping America's youth Newtown, Aurora, Virginia Tech, Columbine. Thereis no bigger or more important issue in America than youth violence. Kids, some as young as ten years old, take up arms with the intention to murder. Why is this happening? Lt. Col. Dave Grossman and Gloria DeGaetano believe the root cause is the steady diet of violent entertainment kids see on TV, in movies, and in the video games they play—witnessing hundreds of violent images a day. Offering incontrovertible evidence based on recent scientific studies and

research, they posit that this media is not just conditioning children to be violent and see killing as acceptable but teaching them the mechanics of killing as well. Stop Teaching Our Kids to Kill supplies the statistics, interprets the copious research that exists on the subject, and suggests the many ways to make a difference in your home, at school, in your community, in the courts, and in the larger world. In using this book, parents, educators, social-service workers, youth advocates, and anyone interested in the welfare of our children will have a solid foundation for effective action and prevention of future Columbines, Jonesboros, and Newtowns.

  The Rebirth of the Russian Space Program Brian Harvey,2007-05-10 This, fifty years after Sputnik, is the definitive book on the Russian space program. The author covers all the key elements of the current Russian space program, including both manned and unmanned missions. He examines the various types of unmanned applications programs as well as the crucial military program, and even analyzes the infrastructure of production, launch centres and tracking. You'll also find discussion of the commercialization of the program and its relationship with western companies. Russia's current space experiment is also put in a comparative global context. Strong emphasis is placed on Russia's future space intentions and on new programs and missions in prospect.

  A Parent's Guide to Snapchat Axis,2018-08-01 Why are teens so obsessed with Snapchat? And what do they even do on it? This guide will help you better understand the app itself, why it's

appealing, and how to have conversations about it with your teens. Parent Guides are your one-stop shop for biblical guidance on teen culture, trends, and struggles. In 15 pages or fewer, each guide tackles issues your teens are facing right now—things like doubts, the latest apps and video games, mental health, technological pitfalls, and more. Using Scripture as their backbone, these Parent Guides offer compassionate insight to teens' world, thoughts, and feelings, as well as discussion questions and practical advice for impactful discipleship.

The Business Blockchain William Mougayar,2016-04-26 The definitive pioneering blueprint covering the what, why and how of the blockchain. Blockchains are new technology layers that rewire the Internet and threaten to side-step older legacy constructs and centrally served businesses. At its core, a blockchain injects trust into the network, cutting off some intermediaries from serving that function and creatively disrupting how they operate. Metaphorically, blockchains are the ultimate non-stop computers. Once launched, they never go down, and offer an incredible amount of resiliency, making them dependable and attractive for running a new generation of decentralized services and software applications. The Business Blockchain charts new territory in advancing our understanding of the blockchain by unpacking its elements like no other before. William Mougayar anticipates a future that consists of thousands,

if not millions of blockchains that will enable
not only frictionless value exchange, but also a
new flow of value, redefining roles,
relationships, power and governance. In this book,
Mougayar makes two other strategic assertions.
First, the blockchain has polymorphic
characteristics; its application will result in a
multiplicity of effects. Second, we shouldn't ask
ourselves what problems the blockchain solves,
because that gives us a narrow view on its
potential. Rather, we should imagine new
opportunities, and tackle even more ambitious
problems that cross organizational, regulatory and
mental boundaries. Drawing on 34 years of
technology industry experience as an executive,
analyst, consultant, entrepreneur, startup mentor,
author, blogger, educator, thought leader and
investor, William Mougayar describes a future that
is influenced by fundamental shifts brought by
blockchain technology as the catalyst for change.
William Mougayar has been described as the most
sophisticated blockchain business thinker. He is a
blockchain industry insider whose work has already
shaped and influenced the understanding of
blockchain for people around the world, via his
generous blogging and rigorous research insights.
He is a direct participant in the crypto-
technology market, working alongside startups,
entrepreneurs, pioneers, leaders, innovators,
creators, enterprise executives and practitioners;
in addition to being an investor, advisor, and
board member in some of the leading organizations
in this space, such as the Ethereum Foundation,
OpenBazaar and Coin Center. Just as the Internet

created new possibilities that we didn't foresee in its early years, the blockchain will give rise to new business models and ideas that may still be invisible. Following an engaging Foreword by Vitalik Buterin, this book is organized along these 7 chapters: 1. What is the Blockchain? 2. How Blockchain Trust Infiltrates 3. Obstacles, Challenges & Mental Blocks 4. Blockchain in Financial Services 5. Lighthouse Industries & New Intermediaries 6. Implementing Blockchain Technology 7. Decentralization as the Way Forward The Business Blockchain is an invitation for technologists to better understand the business potential of the blockchain, and for business minded people to grasp the many facets of blockchain technology. This book teaches you how to think about the blockchain.

Assessing Urban Forest Effects and Values ,2007 An analysis of trees in New York City reveals that this city has about 5.2 million trees with canopies that cover 20.9 percent of the area. The most common tree species are tree of heaven, black cherry, and sweetgum. The urban forest currently stores about 1.35 million tons of carbon valued at $24.9 million. In addition, these trees remove about 42,300 tons of carbon per year ($779,000 per year) and about 2,202 tons of air pollution per year ($10.6 million per year). The structural, or compensatory, value is estimated at $5.2 billion. Information on the structure and functions of the urban forest can be used to improve and augment support for urban forest management programs and to integrate urban forests within plans to improve environmental quality in the New York City area.
