**More Is More** Blake Morgan, 2017-04-21 “Less is more” may be good advice for many efforts, but it is terrible advice when it comes to customer experience. Brands that want to stay relevant must apply more energy, focus, and resources to creating knock-your-socks-off customer experiences than they ever did before. Customer experience guru Blake Morgan walks you through the D.O.M.O.R.E. concepts that set businesses up for success by emphasizing the importance of relationships. Companies that do more: Design something special Offer a strong employee experience Modernize with technology Obsess over the customer Reward responsibility and accountability Embrace disruption and innovation More Is More offers practical advice for building or improving customer experience that you can apply immediately at your own organization. Time is of the essence: your customers are not willing to wait for you to get the customer experience right. Outlining the key areas you need to address immediately, More Is More will help you weather external changes, remain relevant, and thrive in today’s ever-changing business landscape.

*Protecting Children Online?* Tijana Milosevic, 2018-02-23 A critical examination of efforts by social media companies—including Facebook, Twitter, Snapchat, and Instagram—to rein in cyberbullying by young users. High-profile cyberbullying cases often trigger exaggerated public concern about children's use of social media. Large companies like Facebook respond by pointing to their existing anti-bullying mechanisms or coordinate with nongovernmental organizations to organize anti-cyberbullying efforts. Do these attempts at self-regulation work? In this book, Tijana Milosevic examines the effectiveness of efforts by social media companies—including Facebook, Twitter, YouTube, Snapchat, and Instagram—to rein in cyberbullying by young users. Milosevic analyzes the anti-bullying policies of fourteen major social media companies, as recorded in companies' corporate documents, draws on interviews with company representatives and e-safety experts, and details the roles of nongovernmental organizations examining their ability to provide critical independent advice. She draws attention to lack of transparency in how companies handle bullying cases, emphasizing the need for a continuous independent evaluation of effectiveness of companies' mechanisms, especially from children's perspective. Milosevic argues that cyberbullying should be viewed in the context of children's rights and as part of the larger social problem of the culture of humiliation. Milosevic looks into five digital bullying cases related to suicides, examining the pressures on the social media companies involved, the nature of the public discussion, and subsequent government regulation that did not necessarily address the problem in a way that benefits children. She emphasizes the need not only for protection but also for participation and empowerment—for finding a way to protect the vulnerable while ensuring the child's right to participate in digital spaces.
