Joyful Math Deanna Pecaski McLennan,2020 This book is about how to create invitations for young children to play with math ideas through art, literacy, and outdoor play. The focus of her book is really on math that occurs OUTSIDE of math time. How can we create space for children to play in our classrooms that builds on their own questions as well as the math they are studying in the curriculum? How can we create a joyful and playful space for math so that children feel like mathematical thinkers with valuable ideas from the very start? How can we create connections between math and children's lives so that they see math as creative and purposeful instead of just learning school math?--

**Kindergarten Math Workbook** Alice Books,2021-04-27 This Kindergarten Math Workbook is a great way for your little champion to learn basic math skills in a fun and easy way. This workbook is organized in a progressive skill-building way to get plenty of math practice. Growing Mathematical Ideas in Kindergarten Linda Schulman Dacey, Rebeka Eston, 1999 Grade level: k, t.

**Teaching Preschool and Kindergarten Math** Ann Carlyle, Brenda Mercado, 2012 Through an exciting multimedia format, Teaching Preschool and Kindergarten Math takes you into an early childhood classroom for a seeing is believing look at how to create a focused, successful mathematics program while simultaneously deepening your knowledge of the mathematical ideas that need to be developed at an early age. You'll find: \* 26 video segments filmed in an actual classroom; \* more than 150 lessons and investigations; \* dozens of ideas for encouraging and supporting math talk with young children; \* numerous formative assessment recommendations including videos of one-on-one interviews; \* research-based strategies and insights to student misconceptions; \* reproducibles (also available in a downloadable, printable format at [www.mathsolutions.com/teachingpreschoolreproducibles](http://www.mathsolutions.com/teachingpreschoolreproducibles)), and more. The demands of the Common Core State Standards require students to have a stronger grounding in math concepts early on. In addition, research indicates that mastery of math concepts in early childhood is the most powerful predictor of later learning. These factors and more make Teaching Preschool and Kindergarten Math an essential go-to resource for the teaching and learning of early childhood mathematics.

Number Sense Routines Jessica Shumway, 2023-10-10 In this groundbreaking and highly practical book, Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3, author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise. Shumway created a series of math routines designed to help young students strengthen and build their facility with numbers. These quick 5, 10, or 15 minute exercises are easy to implement as an add-on to any elementary math curriculum. Understanding Number Sense: Students with strong number sense understand numbers, how to subitize, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies, and use visual models to solve problems. Number Sense Routines supports the early learner by instilling the importance of daily warm-ups and explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: Number Sense Routines demonstrates the importance of listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy. Shumway writes, As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will come away with new ideas and tools to use in your own classroom.
