Proceedings of the 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) Jerome Yen,Mohammad Zoynul Abedin,Wan Azman Saini Bin Wan Ngah,2023-07-25 This is an open access book.With the rapid development of modern economy and Internet technology, the traditional financial industry has to develop Internet finance to provide better services and meet the needs of the times. It is against this background that the blockchain, relying on its special advantages (collective maintenance, reliable databases, and decentralization), provides the reliability to solve the credit risk of Internet finance, has an impact on institutions, trust mechanisms, risk control, etc. in the Internet finance industry, and has derived more new application scenarios, thus paving the way for the development of finance in the Internet era. Applying blockchain technology to the financial field can promote data information sharing, improve value transmission efficiency, and enhance database security. The financial market based on the decentralized system of blockchain technology can reduce the operating costs of financial institutions, improve economic efficiency, and solve problems such as information asymmetry. The new financial business model of blockchain+finance is conducive to improving the Internet credit reporting system, preventing and controlling Internet financial risks, and further realizing financial disintermediation. At present, in China's financial field, blockchain technology has been applied and innovated in supply chain finance, cross-border payment, trade finance, asset securitization and other scenarios. To promote the exchange and development of blockchain, information technology and financial experts and scholars. The 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) will be held in Hangzhou from February 17 to 19, 2023. This conference mainly focuses on the latest research on blockchain, information technology and smart finance. This conference brings together experts, scholars, researchers and relevant practitioners in this field from all over the world to share research results, discuss hot issues, and provide participants with cutting-edge scientific and technological information, so that you can timely understand the development trends of the industry and master the latest technologies, broaden research horizons and promote academic progress.

China and India John T McManus,Mingzhi Li,Deependra Moitra,2007-02-28 In the last 30 years, the world's software industry has been developing rapidly and the landscape has also been changing dramatically. It is no longer predominately controlled by the developed countries such as the United States and the United Kingdom. This book examines the competitive and strategic issues faced by China and India through a political, economic, social, technological, environmental and legal analysis. The book reviews their competitive strengths and weaknesses and the potential risks for organisations looking to expand or invest resources in these two countries. The book also looks at the market strategies of both countries in a global context and identifies the critical success factors that have enabled China and India to gain competitive advantage in their respective markets. Importantly, the book examines the threats that these two countries pose to other countries looking to expand their presence in the global software markets. This book helps practitioners and business managers who are responsible for a firm's strategy or investment resources to grasp and understand the complexities and challenges faced by those organisations looking to expand their operations in these countries. Written from a highly knowledgeable and well-respected practitioner in the field of global strategy and software engineering Draws on the authors wide-ranging practical experience of working with some of the worlds leading global service providers on major strategy development and service provision Provides practical guidance to real-world problems in the global software industry

Automation and Robotisation in Welding and Allied Processes P D Boyd,H P Granjon,2013-10-22 Automation and Robotisation in Welding and Allied Processes contains the proceedings of the International Conference on Automation and Robotization in Welding and Allied Processes held in Strasbourg, France, on September 2-3, 1985, under the auspices of the International Institute of Welding. The papers explore developments in the mechanization, automation, and utilization of robots in welding and related processes and cover topics such as half and fully mechanized welding of offshore constructions; adaptive systems of process control for spot welding robotic cells; and application of computer integrated manufacture to welder fabrication. This book is divided into two sections and begins with an overview of technical, economic, and human factors relating to mechanization and automation in arc and resistance welding. The next chapter describes a closed-loop controlled arc welding power source using a microcomputer as controller. The discussion then turns to problems associated with half and fully mechanized welding of offshore constructions; flexible manufacturing systems comprising welding with high productivity in small lot production; and the main factors causing process disturbance in spot welding. The final chapter is devoted to advanced adaptive control of automated arc welded fabrication which involves sensor application for seam tracking and joint recognition, preprogramming and online supervision of process parameters, and the design of a closed adaptive control loop. This monograph will be of interest to mechanical, electronics, industrial, and robotics engineers.

  Global Brand Management Laurence Minsky,Ilan Geva,2019-11-03 In today's hyper-connected world, any brand with a website or digital presence is 'global' by its very definition; yet in practice it takes an enormous amount of strategic planning and adaptability to successfully manage an international brand. Global Brand Management explores the increasingly universal scope of brand management. In an era when many brand managers will find themselves working for large multinationals operating across varied territories, categories and consumer groups, developing an understanding of both the opportunities and risks of multinational brands is truly essential. Meticulously researched, Global Brand Management shows readers how to manage an existing global brand, while simultaneously equipping them with the skills to build one from scratch. The text uses fascinating case studies including Oreo, Harley Davidson and Xiaomi to demonstrate the challenges of maintaining a stable brand identity when operating across territories with different languages, cultural values and logistics. With helpful pedagogy throughout and built-in features to enhance classroom learning, Global Brand Management is the perfect springboard for students to appreciate, enjoy and embrace the nuances and complexities of brand management on an international scale.

  The Entrepreneurial Culture Denise Tsang,2006 The Entrepreneurial Culture highlights the subtle yet powerful influence of national cultural heritage on entrepreneurship ventures, using an alternative and fresh approach to explore the entrepreneurial culture of Chinese and Irish software firms. This book presents a unique analysis of entrepreneurship theory development, along with a single industry, cross-national study of entrepreneurship illustrating the impact of values from contrasting cultures. Specifically, Denise Tsang concentrates on the advantages associated with the diverse Chinese 'social' network and Irish 'personal' network (derived from the two nations' respective core cultural values) in relation to the strategies utilised by successful public and private firms emerging in the past two decades. Drawing upon data from China, Ireland and the USA, the author illustrates that the Chinese social network has led to a relationship-based approach in strategic areas such as team building, finance, marketing and recruitment during the early stage of firms' start-up. In contrast, the Irish 'personal' network is linked to a pragmatic and rational approach in the same strategic areas. This original work will provide fascinating reading for a wide-ranging audience, including academics, researchers, students, practitioners and policymakers specialising in entrepreneurship and/or international business.

  Knowledge Discovery in Big Data from Astronomy and Earth Observation Petr Skoda,Fathalrahman Adam,2020-04-10 Knowledge Discovery in Big Data from Astronomy and Earth Observation: Astrogeoinformatics bridges the gap between astronomy and geoscience in the context of applications, techniques and key principles of big data. Machine learning and parallel computing are increasingly becoming cross-disciplinary as the phenomena of Big Data is becoming common place. This book provides insight into the common workflows and data science tools used for big data in astronomy and geoscience. After establishing similarity in data gathering, pre-processing and handling, the data science aspects are illustrated in the context of both fields. Software, hardware and algorithms of big

data are addressed. Finally, the book offers insight into the emerging science which combines data and expertise from both fields in studying the effect of cosmos on the earth and its inhabitants. Addresses both astronomy and geosciences in parallel, from a big data perspective Includes introductory information, key principles, applications and the latest techniques Well-supported by computing and information science-oriented chapters to introduce the necessary knowledge in these fields
