Navigation Jeffrey Renfroe, 2020-09-04 At the age of eight, Indiana native Jeffrey Renfroe begins his compelling story in the back seat of a car on his way to Southern Mississippi to visit his grandparents with his mom and dad and another sibling. Not on the southern land for twenty-four hours, Renfroe's world is turned upside down from a dramatic tragedy. When returning to his hometown, Jeff and his family are faced with trying to heal from the aftermath of their trip. Jeff has to overcome death and homelessness. He is able to transition to being on a journey with no supervision, finding himself caught up in a world of challenges with no direction while setting his navigation on the entertainment business of movies to tell his story. Navigation is something we all endure in life while trying to figure out our next direction or waiting on instructions from someone, a sign from God, or just walking on faith without sight. To navigate on the daily basis, there will come a time in your life when you will come to that crossroad and ask yourself, Which way do I go?

Semantics Igor Mel'čuk, 2015-01-14 This book presents an innovative and novel approach to linguistic semantics, starting from the idea that language can be described as a mechanism for the expression of linguistic Meanings as particular surface forms, or Texts. Semantics is specifically that system of rules that ensures a transition from a Semantic Representation of the Meaning of a family of synonymous sentences to the Deep-Syntactic Representation of a particular sentence. Framed in the terms of Meaning-Text linguistics, the present volume closes the publication of the three volume series. It discusses in detail several linguistic notions crucial to the development of Meaning-Text models of natural languages: semantic and syntactic actants, government pattern, lexical functions, linguistic connotations, phrasemes, the meaning of grammatical cases, and linguistic dependencies. The notions under analysis are illustrated from a variety of languages. Reflecting the author's life-long dedication to the study of the semantics and syntax of natural language, this book is a paradigm-shifting contribution to the language sciences, whose originality and daring will make it essential reading for linguists, anthropologists, semioticians, and computational linguists.

Kiss Me By Moonlight Michele Zurlo, 2014-06-17 Hey there. It's Lacey again. Falling

in love and landing Dylan hasn't been the panacea I thought it would be. For starters, he moved into my apartment without asking, and he continues to have no respect for my need to have things in sets of six. Pile that on top of my emotional upheaval after losing my stepfather, and you have a recipe for disaster no amount of German chocolate cake can cure...Yes, Lacey Hallem's life remains fraught with challenge, but you know she's a fighter. Forming a talent management agency with her best friends has been the best career move she's ever made--even if it's the only thing currently working according to plan. Lacey's OCD is getting the better of her, and this time her hands aren't the only casualty. When her lies ruin her relationships with both Kiss Me Goodnight and Dylan, she's forced to confront her demons in ways she's never had to before. As she again faces her past, can she learn once and for all to let love and friendship through the barriers she's built?Both harrowing and hilarious, this conclusion to the tale of Lacey and Dylan will leave you laughing, crying, and fanning yourself--sometimes all at once. Michele Zurlo triumphs again in this moving story about life's quirks and what we all have to do to get by.

Celestial Navigation in the GPS Age John Karl, 2007 Many books on celestial navigation take shortcuts in explaining concepts; incorrect diagrams and discussion are often used for the sake of moving the student along quickly. This book tells the true story--and the whole story. It conveys celestial navigation concepts clearly and in the shortest possible time. It's tailored for navigation in the GPS age--a time of computers, calculators, and web resources. Although it covers all of the traditional methods of 'working a sight,' the primary thrust is using the (under \$10) scientific calculator. By using equations that you

key into your calculator, this book guides you toward a better understanding of the concepts of celestial navigation. You will learn novel ways to plot lines of position, ways to check your sextant accurately by star sights, and how to tell what time it is from a moon sight. The many appendices are a treasure of references and explanations of abstract ideas. Celestial Navigation is a crucial skill for the offshore navigator to know, this book provides the shortest path to that knowledge.

A Kiss from Moët Lorain O'Neil, 2013-06-08 She's young. Gorgeous. Cursed. And she's so not going to put up with it. Moët Arkady is a Lecora -cursed by an ancient swamp magic so that any man she kisses could end up not only possessing HER but a lifetime of fabulously good luck to boot. Not exactly helpful when returning home after years of banishment BAM! Moët's plane crashes right into the swamp that created the curse in the first place. So when Moët must play good Samaritan to a drowning passenger, what was that? A kiss? Better not be, because he's Moses Gentry, the indomitable Gentry in The Consortium v. Gentry Refinery, the biggest most dangerous legal war these southern Parishes have ever seen, the one that will decide whether the swamp itself lives or dies. And she's the new Court Monitor who has to decide the whole blasted thing. If Moët rules for the Consortium, Moses Gentry will lose everything -like he's gonna let that happen. But if she rules for Moses, the Consortium's rich and powerful members could be headed to prison -and they sure don't intend on going. Since Moët's predecessor resolved the dilemma by ending up alligator bait, and her former high school sweetheart is now the Consortium's lead attorney and pretty great at stealing kisses, Moët could sure use some good luck herself. And that wily old swamp still has its magic not to mention some truly

surprising plans for the intrepid little Lecora -and whoever wins (and whoever loses!) The Consortium v. Gentry Refinery. Because when they least expect it, a bit of swamp magic could just seal this deal... with a kiss! A Kiss From Moët is 71,000 words long and written in the genres of romance/magical realism/humor. Sample chapters from some of the author's other novels are added.
