Cognitive Models of Psychological Time Richard A. Block,2014-01-14 This volume critically reviews cognitive models of psychological time in order to clarify and enrich what is known about the temporal aspects of cognitive processes. Concentrating on how adult humans experience, remember, and construct time, chapters survey recent work on such topics as mental representations of time, timing in movement sequences, time and timing in music, and the processing of temporal information. Also included are chapters with a broader perspective, such as the impacts of methodological choices, chronobiology and temporal experience, a comparative approach to time and order, and normal and abnormal temporal perspectives. The book makes current research and theories on the psychology of time more accessible to researchers in cognitive psychology.

Approaches to Cognition Terry J. Knapp,Lynn C. Robertson,2016-07-15 To the vast majority of academic psychologists in the 1980s, the study of cognition referred to that area of psychology known as 'cognitive psychology'. The major basis of this area had been the computer metaphor with its accompanying notion of the individual as an information-processing system. Yet within the field the study of cognition is much broader and has a history that reaches into antiquity, whereas 'cognitive psychology' as information-processing psychology had only recently become the standard bearer of cognitive studies. One of the purposes of this volume, originally published in 1986, was to articulate some of the fundamental distinctions between and concordances among different orientations concerning the study of cognition. The collection includes chapters on information processing, ecological, Gestalt, physiological, and operant psychology.

The Trials and Tribulations of a Trailer Trash Housewife Del Shores,2009 Willi is the trailer trash housewife of the title. Her abusive husband won't let her get a job, one of her children is dead, and the other is verboten by her husband because he's gay. Her best and only friend, a large black woman who lives next door, worries that Willi's husband will end up killing her. A new woman comes to live in the trailer park and ends up having an affair with Willi's husband. When she finds out, Willi decides to get a job at the local Wal-Mart (a first step on the way to liberating herself from him). Her husband will have none of it, and quoting the bible about how a wife is supposed to obey her husband, threatens all three women with a gun, and then beats Willi to within an inch of her life. She recovers enough to finally shoot him, releasing her from the torment that she'd been living in for years.--From publisher description.

Trial Run Anne Metikosh,2012-09-17 In affluent Kingsport, New Hampshire, a particularly gruesome murder has been committed. There is no doubt in anyone's mind as to who did it: Randy Outray has all but confessed. Still, he wants his day in court. His lawyer hires trial consultant Kerrin Adams to help design a credible defense and Kerrin assembles a mock jury in order to test public opinion on various aspects of the case. Among Kerrin's jurors is her sister, Nina Ryan. Life has not been altogether kind to Nina. She has built a successful business but, at thirty-two, she is single and lonely. Her relationship with Kerrin is strained. Nina objects to what she sees as manipulation of the justice system but she agrees to serve on Kerrin's mock jury, if only as a way of getting closer to her sister. Then she meets David Maitland, a new arrival in town. The two form an instant bond and, at last, Nina can indulge her romantic dreams. Her happiness is short-lived. What she doesn't know about her lover threatens both their futures. David knew the murder victims well. He has come to Kingsport to make sure the man who killed them pays for his crime. When the accused murderer is himself murdered, David falls under suspicion. And Nina must face some harsh realities in order to save him and their future together. Handbook of Early Intervention for Autism Spectrum Disorders Jonathan Tarbox,Dennis R. Dixon,Peter Sturmey,Johnny L. Matson,2014-04-04 Current rates of autism diagnoses have been cause for concern and research as well as rumor and misinformation. Important questions surround the condition: how early can an accurate diagnosis be made? At what age should intervention start? How can parents recognize warning signs? And what causes autism in the first place? There are no easy answers, but the Handbook of Early Intervention for Autism Spectrum Disorders gives researchers, practitioners, and academics the science and guidance to better understand and intervene. Background chapters survey the history of professional understanding of the disorders and the ongoing debate over autism as a single entity or a continuum. Chapters on best methods in screening, assessment, and diagnosis reflect the transition between the DSM-V and older diagnostic criteria. And at the heart of the book, the intervention section ranges from evidence-based strategies for developing core skills to ethical concerns, cultural considerations, and controversial treatments. Included in the Handbook's broad-based coverage: Designing curriculum programs for children with autism spectrum disorders (ASD). Mainstream education for children with ASD. Teaching independent living skills to children with ASD. Social skills and play. Behavioral and mental health disorders in children with ASD. Training and supporting caregivers in evidence-based practices. Teaching cognitive skills to children with ASD. The Handbook of Early Intervention for Autism Spectrum Disorders is a comprehensive reference for researchers, professors, and graduate students as well as clinicians and other scientist-practitioners in clinical child and school psychology, child and adolescent psychiatry, social work, rehabilitation, special education, and pediatric medicine.

A Kitchen Course in Electricity and Magnetism David Nightingale,Christopher Spencer,2014-07-23 Electricity is all around us: cars, telephones, computers, lights -- the modern world runs entirely on electrons. But what are electrons? How do they behave? How do we control them? This book will show you how to build a battery, detect static electricity and construct a basic current meter, all using common items from your kitchen. Along the way you'll learn about the meaning of voltage and current, what makes an LED work and the difference between AC and DC. The last chapter uses transistors -- the basic building blocks of every computer -- for lots of interesting experiments. With plenty of colorful illustrations, historical stories and an easy, accessible style, A Kitchen Course in Electricity and Magnetism will be a great start for budding and amateur scientists who want to learn more about how the world works.

Her Faux Fiancé: Hotshot corporate lawyer Erik Sigurdson breezes into town determined to survive a family reunion. He makes his ex, Analise Thordarson, an irresistible offer: pretend to be his fiancée and he'll lend her the money to pay off her grandfather's debts. But when their fake engagement is complicated by a real pregnancy, they must sort out who is using whom and if this faux relationship could lead to a real future. Bride by the Book: Small-town Arkansas attorney Garner Holt

needs an assistant to sort out his cluttered office, but he didn't expect a super-secretary like Miss Angelina Brownwood. She's perfect until an online search reveals a flaw: Angelina isn't a secretary. Does her secret mean he can't make this unique woman his for life? **One Day's Loving:** Mae Alden likes her quiet life—she's certainly not cut out to defy convention like her sisters. But everything changes when Boston attorney James Collins reads her father's will and Mae must choose between who she is and the marriage everyone expects. Could James himself offer the answer to both? **The Amulet:** In their first life, Jackson Hawthorne was forced to watch as his fiancée was tried, convicted, and hung. Now an attorney in modern-day Salem, Massachusetts, can he get to the bottom of the mysterious threats to gorgeous Abby Corey's life—and stop history from repeating itself? **Find Me:** Amanda Gillespie never bargained on seeing Jackson Holstenar again after she was asked to leave the law firm where they worked. With a little help from fate, these two confused hearts might just find a way back to each other for good. **Looking for Prince Charming:** Glory agrees to pose as her fellow lawyer and boss's girlfriend while he campaigns for Lord Mayor of Melbourne—which might not be the best idea since she's already in love with the charming playboy. **Counterpoint:** The attorney general assigns Ciara Alafita to find out if defense attorney Bryce Gannon is corrupt, but this take-no-prisoners defense attorney is as elusive as the identity of the person trying to kill him. If she can't convince Bryce to let the feds protect him or to give up his current case, she might never get the chance to admit the truth or her feelings to him. **Trial Run:** Nina Ryan was just doing her sister a favor when she agreed to sit on a mock jury to help form a defense for a confessed killer. But the evidence isn't clear-cut, and it seems David Maitland, the sexy new guy in town that she's falling for, might have something to do with this case. When the suspect ends up dead, can Nina accept some harsh realities to her future with David? **Dangerous Decisions:** Someone is feeding the feds info on alleged illegal activities at the Franklin Everly law firm, and there's enough evidence to put Carino Montgomery in the hot seat when hired gun Ramon Terrones arrives to uncover the mole. But from the moment they meet, Ramon relentlessly pursues Carino, triggering a whirlwind romance packed with fierce emotions and secrets that won't remain buried. **Unmasking Love:** Sparks fly when Julie Payne meets Trace Watkins at a costume party, and they end the night beneath the sheets while literally hiding behind their masks. But their real identities present a serious snag: Trace manages the bank Julie happens to be suing for her client. Will they turn this nasty trick of fate into a treat? **Sensuality Level:** Sensual
