Beginning Lua Programming Kurt Jung,Aaron Brown,2011-08-15 This book is for students and professionals who are intrigued by the prospect of learning and using a powerful language that provides a rich infrastructure for creating programs. No programming knowledge is necessary to benefit from this book except for the section on Lua bindings, which requires some familiarity with the C programming language. A certain comfort level with command-line operations, text editing, and directory structures is assumed. You need surprisingly little in the way of computer resources to learn and use Lua. This book focuses on Windows and Unix-like (including Linux) systems, but any operating system that supports a command shell should be suitable. You'll need a text editor to prepare and save Lua scripts. If you choose to extend Lua with libraries written in a programming language like C, you'll need a suitable software development kit. Many of these kits are freely available on the Internet but, unlike Lua, they can consume prodigious amounts of disk space and memory.

Will Kiwi meet the Queen, run into a madcap mummy, have lunch with a portly panda or pull some wild stunts at the movie studios? Can you can spot Kiwi around the world? Remember-don't let Sporty Sheep, Tricky Tuatara, Wacky Wizard or Gumboot Guy distract you from the great Kiwi hunt!

The Handbook of New Zealand Mammals Carolyn King,David Forsyth,2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land-breeding mammals recorded in the New Zealand region (including the New Zealand sector of Antarctica). It lists 65 species, including native and exotic, wild and feral, living and extinct, residents, vagrants and failed introductions. It describes their history, biology and ecology, and brings

together comprehensive and detailed information gathered from widely scattered or previously unpublished sources. The description of each species is arranged under standardised headings for easy reference. Because the only native land-breeding mammals in New Zealand are bats and seals, the great majority of the modern mammal fauna comprises introduced species, whose arrival has had profound effects both for themselves and for the native fauna and flora. The book details changes in numbers and distribution for the native species, and for the arrivals it summarises changes in habitat, diet, numbers and size in comparison with their ancestral stocks, and some of the problems they present to resource managers. For this third edition, the text and references have been completely updated and reorganised into Family chapters. The colour section includes 14 pages of artwork showing all the species described and their main variations, plus two pages of maps.

Operation Certain Death Damien Lewis,2018-11-20 The terrifyingly true tale of a daring British special forces rescue mission and all-out assault on a savage Sierra Leone guerrilla gang: "What a story!" (Frederick Forsyth, #1 New York Times–bestselling author of The Day of the Jackal). Officially, the SAS mission was called Operation Barras. The men on the ground called it Operation Certain Death. In 2000, the British Special Air Service (SAS) attempted its riskiest rescue mission in more than half a century. A year before, an eleven-man patrol of Royal Irish Rangers who were training government troops in Sierra Leone was captured and held prisoner by the infamously ruthless rebel forces known as the West Side Boys. Their fortified base was hidden deep in the West African jungle, its barricades adorned with severed heads on spikes. Some four hundred heavily armed renegades were not only bloodthirsty—they were drink-and-drugs crazed. The guerrillas favored pink shades, shower caps, and fluorescent wigs, draping themselves in voodoo charms they believed made them bulletproof—a delusion reenforced by the steady consumption of ganja, heroin, crack, and sweet palm wine. This was the vicious and cutthroat enemy British special forces would confront in order to rescue their own. Featuring extensive interviews with survivors, this gritty, blow-by-blow account of the bloody battle that brought an end to ten years of Africa's most brutal civil war is "as good as any thriller I have ever read. This really is the low down" (Frederick Forsyth).

A book of humorous stories with a distinctive Kiwi flavour, both true and definitely not true, compiled through Radio Pacific, a leading radio talkback station based in Auckland. Spinning a good yarn is a time-honoured tradition in this country, and we've all heard some great ones. they used to be the favourite of the smoko room, the pub and the family gathering, the social occasions that bound us together as a community. We all know the sort of thing - stories about the larrikin, the local colourful identity, the tall tales and the fact is stranger than fiction true life tales of the absurd and the barely believable. We're in danger of losing them in this era of the internet joke you read rather than tell. After all, half the skill and humour in a good yarn is in the telling and the ever so gentle stretching of the truth. You should never let the facts get in the way of a good story.
