Contabilidad de activos con enfoque NIIF para las pymes Fierro Martínez Ángel Maria,Fierro Celis

Fernando Adolfo, 2015 En el área de la contabilidad el activo se define como un recurso controlado por la empresa, del cual se busca obtener flujos de beneficios futuros. Los activos se clasifican en corrientes o no corrientes de acuerdo con su facilidad de conversión a efectivo, su administración eficiente en obligaciones, inversiones y transacciones es esencial para todo tipo de empresas sin importar el tamaño. Desde las micro, pequeñas y medianas empresas (mipymes) -que según la Cepal son el 99 % de las empresas en América Latina- hasta las multinacionales necesitan tener los conocimientos mínimos sobre activos que les permitan tomar decisiones operativas, financieras y de inversión acertadas. Contabilidad de activos es una guía básica para el registro, medición y presentación contable de activos empresariales en mipymes con base en las Normas Internacionales de Información Financiera (NIIF) -también conocidas por sus siglas en inglés como IFRS, International Financial Reporting Standards- y el grupo de normas colombianas que deberán manejarse hasta el 2019. Esta tercera edición explica cómo medir, analizar, presentar y revelar diferentes tipos de activos como efectivo, deudores, inventarios, propiedades e intangibles, entre otros. Es, además, el segundo

de tres libros del mismo autor (junto con Contabilidad de Patrimonio y Contabilidad de Pasivos) sobre los componentes de la ecuación básica de la contabilidad.

Tigers' Roar Julian Weiss,2016-09-16 Despite Asia's protracted economic troubles, the region is poised to recover and perhaps become stronger than ever. This timely work identifies the major challenges facing Asia's Four Tigers (Singapore, Taiwan, South Korea, and Hong Kong), Japan, China, and their Southeast Asian neighbors (Thailand, Indonesia, Malaysia, and the Philippines) as the region increases its role and stature on the world stage. Highly regarded Asia policy makers and opinion shapers consider such key questions as: What is the appropriate response to China's ascent? Are there prospects for U.S.-Asian partnerships (in such areas as the environment)? Is economic cooperation between both sides of the Pacific realistic? How can Americans gain from Asia's attempts to rebuild her institutions? And will East Asia and the United States adjust to a multi-polar security and

economic milieu?
