**The Complete Guide to Real Estate Options** Steven D. Fisher, 2007 You are about to learn the true secret of real estate investing real estate options. WHO really makes money in Real Estate? Realtors, sellers, appraisers, the bank, brokers, mortgage brokers, closing companies, attorneys, taxing authorities, and lastly perhaps you the investor who takes all the risk and does all the work, while having to evict tenants and clean up their mess after they've left. But there is a new, unique and innovative method of investing in real estate. A Real Estate Option gives you control of a piece of real estate without actually purchasing it. By having an option on a piece of

property, you have the exclusive right to buy that property or not. A real estate option is simply a contract between the seller and buyer giving you the legal right not obligation to buy the property at a set price for a predetermined time. When you find a buyer for the property, you cash in your option and deposit a large check. Most real estate investment methods require you to sink a lot of your money, time, and effort into your investments. And it is a slow process, usually one property at a time, often part-time. Using an option instead of purchasing means you do not have to deal with rental property, tenants, maintenance and repairs, taxes, mortgage payments, commissions, or closing costs. In this new book you will learn how to control a vast real estate portfolio without ever buying the property. Let the owner keep paying the mortgage, dealing with tenants and all of the costs. You zero in on the profits. Here is an example, you locate a duplex worth \$400,000, you purchase an option to buy it for \$340,000 anytime within the next 120 days. On Day 60, you find a buyer who will pay the full \$400,000., you activate the option, pay the seller \$340,000, and pocket \$60,000. This is a simplified example, but this new book details how to become a highly successful real estate option buyer, and it demonstrates step-by-step how to get started in this highly rewarding investment strategy. All Real Estate Is Local David Lereah, 2007-04-03  
Whatever the national trends are with regard to real estate - whether they are booming or busting-what really matters is what the market conditions are in your region, town, or neighborhood. For as David Lereah points out, in the end, all real estate is local. What does that mean? Even during the real estate boom of 2001-2005, a great many cities and regions did not participate in the boom-they lagged behind, or even decreased in value. Similarly, when prices began to fall nationally, there were plenty of regions and locales where prices rose, and sales boomed. As Lereah makes clear, the most important factor in buying or selling a home isn't what is going on nationally-it is what is going on in your local market. Evaluating present and future trends and influences in your region or neighborhood is essential to creating long term wealth, whether you are in a buyer's or a seller's market. And

David Lereah, as the Chief Economist for the National Association of Realtors, shows you how to determine the conditions in your neighborhood. Lereah reveals how to: Evaluate the DNA of homes in the town or county or region you are considering (every town has its own real estate DNA-the characteristics that make a region or city more or less desirable to live in). Determine whether property values in your targeted neighborhood are on the rise. Research future real estate influences and trends, from migration into or out of the region, to plans to attract or develop new businesses in the area. Understand the local factors that can affect your investment in the future. Countless books offer advice on how to buy and sell a home. But ALL REAL ESTATE IS LOCAL is the first book to explain how knowing the ins and outs of the local market you are targeting is essential to deciding when, where, and what to buy.
