Big Seven Study (2016): 7 open source Crypto-Messengers to be compared (English/Deutsch) David Adams,Ann-Kathrin Maier,2019-10-23 Provided with two columns in German & English Language / Zweispaltig in deutscher & englischer Sprache. BIG SEVEN STUDY about 7 open source Crypto-Messengers for Encryption at the Desktop: A contribution in the cryptographic-discussion – The two security researchers David Adams (Tokyo) and Ann-Kathrin Maier (Munich), who examined in their BIG SEVEN study seven well-known encryption applications for e-mail and instant messaging out of the open source area, performed then a deeper IT-audit for the acquainted software solution GoldBug.sf.net. The audit took into account the essential criteria, study fields and methods on the basis of eight international IT-audit manuals and was carried out in 20 dimensions. It identifies Ten Trends in the Crypto-Messaging. Security researcher David Adams from Tokyo about the published BIG SEVEN CRYPTO-study: We looked at the seven major open source programs for encrypted online-communication and identified ten trends in the Crypto-Messaging area. One of the important trends is the feature, that the users should be able to define a so-called end-to-end encrypting password by themselves manually. The software GoldBug – email client and instant messenger here was ahead with excellent results and is not only very trustworthy and compliant to international IT-audit manuals and safety standards, GoldBug also scores in comparison and in the evaluation of the single functions in much greater detail than the other comparable open source crypto messenger. Co-author of the study Ann-Kathrin Maier from Munich confirms: We have then our Messenger study deepened with a detailed audit of the crypto-program GoldBug, which received excellent results for encrypted email and secure online chat. By our code-reviews we can confirm the trustworthiness of this open source encryption in GoldBug. Numerous details have been analyzed by various methods, compared and also strategically evaluated by the two authors regarding the current encryption discussions. The comparatively studied applications include CryptoCat, GoldBug, OTR-XMPP clients such as Pidgin with the OTR-plugin, RetroShare and Signal, Surespot and Tox.

Instant Messaging Reference Rachel Bridgewater,Meryl Cole,2008-01-31 Virtual reference is a vital component in twenty-first century reference service and the time for debate over its virtues and necessity has passed. This book focuses on the practical implementation of instant messaging (IM), including privacy and security and its future potential. Targeting busy practitioners who are looking for comprehensive answers about instant messaging in particular, rather than virtual reference in general, this book addresses questions from the basics of what IM is and how it operates to the more complicated issues such as privacy and security to its future potential as a strong candidate in the virtual reference arena. Exclusively focused on instant messaging reference services Provides practical information about starting and running a successful instant messaging reference service Includes significant background information and in-depth discussion of the broader issues raised by instant messaging and instant messaging reference

"Listening to your mum's voice can make your day". **An explorative study about the social functions of voice messages in messaging apps for international students** Lisa Fritsch,2020-01-08 Master's Thesis from the year 2019 in the subject Communications - Interpersonal Communication, grade: 1,6, European University Viadrina Frankfurt (Oder), language: English, abstract: Since 2013, voice messages can be sent using messaging services such as WhatsApp. Thus, the oral information transfer enters the digital messenger communication, which was previously exclusively based in written form. In German research of communication and linguistics, there are few scientists who have so far dealt with voice messages. They present a new challenge for the media linguistic conception of digital communication, as they fall into a gap between oral and written language utterances. The linguistics professor Katharina König emphasizes this decisive new aspect: With the integration of voice messages[...] media orality enters the non-simultaneous, quasi-synchronous messenger communication. Voice messages bring a kind of 'answering machine' option to messenger chats. How does this change digital communication? What are the social functions for the interpersonal exchange of them? These questions were investigated as part of a qualitative research, for which 20 international students between the ages of 20 and 34 were interviewed in Paris and Sofia. The selection of this sample favors the preservation of a homogeneous group of young adults in the same life situation. The research results showed that, despite the different countries of origin, the students have a similar usage of voice messages. The main benefit of voice messages is that they can be sent faster and easier and are therefore particularly practical in stressful situations. The speed allows more complex information to be recorded in less time. Furthermore, the increased emotionality through one's own voice and consequently a bigger intimacy between two chat partners, play an important role in the social functions of voice messages.

The Inside Text R. Harper,L. Palen,A. Taylor,2005-06-27 SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, The Inside Text is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.

Textiquette Calandra Izquierdo,2013-09-24 Texting. There are no rules. Until now. Textiquette, the dos and do nots of texting, is a fun list of the basic rules of texting. After fighting a five year long battle with a T9 cell phone, Calandra Ysquierdo, was driven by the sheer number of text messages that made her question the intellects of the people texting her to create this book. Calandra feels that the time is right, on the 20th anniversary of text messaging, to answer the important questions we all have had, when is the proper time to respond to a text message; do you need to use proper grammar; how did text messaging start; what was the first text message and why we should be following Texting Etiquette --Textiquette.

Internet Messaging Marshall T. Rose,David Strom,1998 Today, companies are looking to break away from proprietary LAN-based E-mail systems to open, Internet-based systems that can integrate both internal and external communications. The Internet messaging market is expected to grow from $1.2 billion in 1996 to $2.2 billion in the Year 2000. Internet Messaging is the complete guide to deploying Internet-based E-mail and solving the most annoying headaches associated with today's corporate E-mail systems. It covers nearly every E-mail issue an IT professional may encounter, from directory services and LDAP to security and virtual private networking. It also brings professionals up-to-date on the latest Internet E-mail standards, what it really means for a system to be 100% Pure Internet, and how that benefits the enterprise. The book also provides a How Can I matrix presenting solutions to the 12 most common E-mail problems, including integrating with E-mail with other desktop and palmtop applications; providing secure remote access to E-mail; integrating E-mail with fax, voicemail and paging; and much more.
