An Introduction to Arabic Translation Hussein Abdul-Raof, 2022-08-30 Combining theory and practice, this book is a model for Arabic translation and prepares students for the translation industry. Containing twenty-two translation approaches, An Introduction to Arabic Translation provides the normative principles to guide training in Arabic-English-Arabic translation. It revitalizes Arabic-English-

Arabic translation through its empirical textual reality, hinged upon Arabic and English authentic contexts and their linguistic, discursal, and cultural incongruity. The exercises in each chapter provide practical training supported by translation theory. The translation commentaries included represent a critical translation quality assessment based on an analysis of discourse and textual features to highlight the process of translation, the translation approach adopted, and why. Such commentary invites students to reflect on their understanding of the translation process and the approach required for a given Arabic-English-Arabic translation problem. Providing a methodologically comprehensive course of Arabic-English-Arabic translation studies, and insightful discussion of high value for both students and teachers, this book will be invaluable to anyone seeking to learn or improve their Arabic and translation skills.

Translating and Interpreting in Korean Contexts Ji-Hae Kang, Judy Wakabayashi, 2019-04-03 The focus of this volume is on how the people of the Korean Peninsula—historically an important part of the Sinocentric world in East Asia and today a vital economic and strategic site—have negotiated oral and

written interactions with their Asian neighbors and Europeans in the past and present through the mediation of translators and interpreters. These encounters have been shaped by political, social, and cultural factors, including the shared use of the Chinese writing system in East Asia for many centuries, attitudes toward other Asians and Westerners, and perceptions of Korean identity in relation to these Others. After exploring aspects of historical interactions, the volume addresses how the role and practice of translation and interpreting have recently evolved as a result of the development of digital technology, an increase in the number of immigrants, and changes in political and cultural dynamics in the region. It covers a range of historical and contemporary aspects, genres, and venues that extend beyond the common yet restrictive focus on literary translation and includes discussions of translator training and academic studies of translation and interpreting in Korea.

Government Translation in South Korea Jinsil Choi, 2022-04-26 **Government Translation in South Korea: A Corpus-based Study** is the first book to investigate and discuss translation processes and translation products in South Korean government institutions, employing a parallel corpus-based approach. Choi identifies different agents and procedures involved in institutional translation practices, discusses linguistic and genre features of translations, and investigates changes made in translations compared to the original documents, during the two Korean presidencies of Lee Myung-bak (2008–2013) and Park Geun-hye (2013–2017). Choi's book explores important facets of Korean government translation in the belief that practices associated with the normative meaning and concept of government translation have to be displaced into the wider understanding of the concept of translation as a social construct. Drawing on the theoretical frameworks of institutional translation and critical discourse analysis-informed corpus-based translation studies, the chapters discuss the practice, process and products of Korean government translation. The Korean–English parallel corpus

methodology used introduces a systemic way to analyse changes in Korean government translations, based on a personally built sentence-level tagged corpus, both qualitatively and quantitatively. This volume will be of great interest to scholars and students of translation studies as well as Korean studies.

Son of Classics and Comics George Kovacs, C. W. Marshall, 2016 *Wonder Woman. Asterix the Gaul. Watchmen.* These popular comics, and many others, use classical sources, narrative patterns, and references to enrich their imaginative worlds and deepen the stories they present. This volume explores that rich interaction. *Son of Classics and Comics* presents thirteen original studies of representations of the ancient world in the medium of comics. Building on the foundation established by their groundbreaking *Classics and Comics* (2011), George Kovacs and C. W. Marshall have gathered a wide range of essays with a new, global perspective. Chapters are helpfully grouped to facilitate classroom use, with sections on receptions of Homer, on manga, on Asterix, and on the sense of a classic in the modern world. All Greek and Latin passages are translated. Lavishly illustrated, the volume significantly widens the range of available studies on the reception of the Greek and Roman worlds in comics, and deepens our understanding of comics as a literary medium. *Son of Classics and Comics* will appeal to students and scholars of classical reception as well as comics fans.

Anthology of Arabic Discourse on Translation Tarek Shamma, Myriam Salama-Carr, 2021-12-30

This anthology brings the key writings on translation in Arabic in the pre-modern era, extending from the earliest times (sixth century CE) until the end of World War I, to a global English-speaking audience. The texts are arranged chronologically and organized by two historical periods: the Classical Period, and the Nahda Period. Each text is preceded by an introduction about the selected text and author, placing the work in context, and discussing its significance. The texts are complemented with a theoretical commentary, discussing the significance for the contemporary period and modern theory. A general introduction covers the historical context, main trends, research interests, and main findings and conclusions. The two appendices provide statistical data of the corpus on which the anthology is based, more than 500 texts of varying lengths extending throughout the entire period of study. This collection contributes to the development of a more inclusive and global history of translation and interpreting. Translated, edited, and analyzed by leading scholars, this anthology is an invaluable resource for researchers, students, and translators interested in translation studies, Arab/Islamic history, and Arabic language and literature, as well as Islamic theology, linguistics, and the history of

science. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons (CC-BY-NC-ND) 4.0 license.
