Translations in Korea Wook-Dong Kim, 2019-03-28 This book explores practical and theoretical approaches to translation in Korea from the 16th century onwards, examining a variety of translations done in Korea from a diachronic perspective. Offering a discussion of the methodology for translating the Xiaoxue (Lesser or Elementary Learning), a primary textbook for Confucianism in China and other East Asian countries, the book considers the problems involving Korean Bible translation in general and the Term Question in particular. It examines James Scarth Gale, an early Canadian Protestant missionary to Korea, as one of the language's remarkable translators. The book additionally compares three English versions of the Korean Declaration of Independence of 1919, arguing that the significant differences between them are due both to the translators' political vision for an independent Korea as well as to their careers and Weltanschauungen. The book concludes with a detailed analysis of Deborah Smith's English translation of 'The Vegetarian' by Han Kang, which won the 2016 Man Booker International Prize for Fiction.

On Translating Modern Korean Poetry Jieun Kiaer, Anna Yates-Lu, Mattho Mandersloot, 2021-09-15 On Translating Modern Korean Poetry is a research monograph exploring the intricacies and complexities of translating modern Korean poetry. The Vegetarian Han Kang, 2016-02-02 WINNER OF THE INTERNATIONAL BOOKER PRIZE • “[Han] Kang viscerally explores the limits of what a human brain and body can endure, and the strange beauty that can be found in even the most extreme forms of renunciation.”—Entertainment Weekly “Ferocious.”—The New York Times Book Review (Ten Best Books of the Year) “Both terrifying and terrific.”—Lauren Groff “Provocative [and] shocking.”—The Washington Post Before the nightmares began, Yeong-hye and her husband lived an ordinary, controlled life. But the dreams—invasive images of blood and brutality—torture her, driving Yeong-hye to purge her mind and renounce eating meat altogether. It's a small act of independence, but it interrupts her marriage and sets into motion an increasingly grotesque chain of events at home. As her husband, her brother-in-law and sister each fight to reassert their control, Yeong-hye obsessively defends the choice that's become sacred to her. Soon their attempts turn desperate, subjecting first her mind, and then her body, to ever more intrusive and perverse violations, sending Yeong-hye spiraling into a dangerous, bizarre estrangement, not only from those closest to her, but also from herself. Celebrated by critics around the world, *The Vegetarian* is a darkly allegorical, Kafka-esque tale of power, obsession, and one woman's struggle to break free from the violence both without and within her. One of the Best Books of the Year—BuzzFeed, Entertainment Weekly, Wall Street Journal, Time, Elle, The Economist, HuffPost, Slate, Bustle, The St. Louis Dispatch, Electric Literature, Publishers Weekly

English Language Ideologies in Korea Jinhyun Cho, 2017-07-27 This volume critically examines the phenomenon of “English fever” in South Korea from both micro- and macro-perspectives. Drawing on original research and rich illustrative examples, the book investigates two key questions: why is English so popular in Korea, and why is there such a gap between the ‘dreams’ and ‘realities’ associated with English in Korea? These questions are explored through the eyes of English-Korean translators and interpreters, who represent the professional group most intensely engaged in the zeal for English language mastery. Macro-perspectives focus on historical factors leading to the rise of English, with English-Korean translation and interpreting as a key theme. Micro-perspectives explore the dreams that individuals attach to English and the ways in which they imagine it can transform their lives, and contrast these dreams with the stark realities felt on the ground. The gaps between these dreams and realities are explored from various angles, which include commodification, gender and neoliberalism. The book thus offers fresh insights on how the phenomenon of “English fever” has been created, reproduced, and sustained from both historical and contemporary viewpoints. From the reviews: This is an important study of how English is experienced in one country, Korea. A very insightful analysis of the interlocking of historical factors influencing the status of English, and the interlocking significance of class, gender, aesthetics, myth-making, and the role of the media and competitive commodification. The study is based on competent use of relevant theoretical approaches, solid fieldwork, and a personal capacity to draw complex threads together. It demonstrates how language policy can be analysed in a stimulating way that has major importance beyond the borders of Korea. Language ideologies are brought to life effectively. Robert Phillipson, Emeritus Professor, Copenhagen Business School, Denmark

Pragmatics in Korean and Japanese Translation Jieun Kiaer, Ben Cagan, 2022-09-30 This book explores how the greater amount of pragmatic information encoded in Korean and Japanese can result in pragmatic (in)visibility when translating between those languages and English. Pragmatic information must be added when translating from English to Korean or Japanese and is easily lost when translating in the other direction. This book offers an analysis of translations in Japanese and Korean of *Harry Potter and the Philosopher's Stone* and *The Hobbit*, or *There and Back Again* to show how the translated versions crystallise the translators' interpretations of relationships in the way characters address one another. This book discusses fan translations of Korean and Japanese to English of various popular media, observing that the emotional meanings easily lost when translating in this direction are often deemed important enough to warrant the insertion of additional explanatory material. The book additionally discusses the role of fan translation in the construction of international online communities and a heightened communal commentary on translation. Western translation commentary has historically lacked sufficient emphasis on translation to and from East Asian languages, and these case studies help to address a problem of central importance to translation to and from languages that encode interpersonal dynamics in dramatically different ways to English. This book will be of interest to students and researchers in translation studies, particularly in Korean and Japanese translation. The book will also appeal to students and researchers of the Korean and Japanese languages.

Translating and Interpreting in Korean Contexts Ji-Hae Kang, Judy Wakabayashi, 2019-04-03 The focus of this volume is on how the people of the Korean Peninsula—historically an important part of the Sinocentric world

in East Asia and today a vital economic and strategic site—have negotiated oral and written interactions with their Asian neighbors and Europeans in the past and present through the mediation of translators and interpreters. These encounters have been shaped by political, social, and cultural factors, including the shared use of the Chinese writing system in East Asia for many centuries, attitudes toward other Asians and Westerners, and perceptions of Korean identity in relation to these Others. After exploring aspects of historical interactions, the volume addresses how the role and practice of translation and interpreting have recently evolved as a result of the development of digital technology, an increase in the number of immigrants, and changes in political and cultural dynamics in the region. It covers a range of historical and contemporary aspects, genres, and venues that extend beyond the common yet restrictive focus on literary translation and includes discussions of translator training and academic studies of translation and interpreting in Korea.

Interlingua-Based Broad-Coverage Korean-to-English Translation in CCLINC. ,2001 At MIT Lincoln Laboratory, we have been developing a Korean-to- English machine translation system CCLINC (Common Coalition Language System at Lincoln Laboratory). The CCLINC Korean-to-English translation system consists of two core modules, language understanding and generation modules mediated by a language neutral meaning representation called a semantic frame. The key features of the system include: (i) Robust efficient parsing of Korean (a verb final language with overt case markers, relatively free word order, and frequent omissions of arguments). (ii) High quality translation via word sense disambiguation and accurate word order generation of the target language. (iii) Rapid system development and porting to new domains via knowledge-based automated acquisition of grammars. Having been trained on Korean newspaper articles on missiles and chemical biological warfare, the system produces the translation output sufficient for content understanding of the original document.

Translation and Literature in East Asia Jieun Kiaer,Jennifer Guest,Xiaofan Amy Li,2019-05-07 Translation and Literature in East Asia: Between Visibility and Invisibility explores the issues involved in translation between Chinese, Japanese and Korean, as well as from these languages into European languages, with an eye to comparing the cultures of translation within East Asia and tracking some of their complex interrelationships. This book reasserts the need for a paradigm shift in translation theory that looks beyond European languages and furthers existing work in this field by encompassing a wider range of literature and scholarship in East Asia. Translation and Literature in East Asia brings together material dedicated to the theory and practice of translation between and from East Asian languages for the first time.

One Left Kim Soom,2020-09-15 During the Pacific War, more than 200,000 Korean girls were forced into sexual servitude for Japanese soldiers. They lived in horrific conditions in “comfort stations” across Japanese-occupied territories. Barely 10 percent survived to return to Korea, where they lived as social outcasts. Since then, self-declared comfort women have come forward only to have their testimonies and calls for compensation largely denied by the Japanese government. Kim Soom tells the story of a woman who was kidnapped at the age of thirteen while gathering snails for her starving family. The horrors of her life as a sex slave follow her back to Korea, where she lives in isolation gripped by the fear that her past will be discovered. Yet, when she learns that the last known comfort woman is dying, she decides to tell her there will still be “one left” after her passing, and embarks on a painful journey. One Left is a provocative, extensively researched novel constructed from the testimonies of dozens of comfort women. The first Korean novel devoted to this subject, it rekindled conversations about comfort women as well as the violent legacies of Japanese colonialism. This first-ever English translation recovers the overlooked and disavowed stories of Korea’s most marginalized women.

Government Translation in South Korea Jinsil Choi,2022-04-26 Government Translation in South Korea: A Corpus-based Study is the first book to investigate and discuss translation processes and translation products in South Korean government institutions, employing a parallel corpus-based approach. Choi identifies different agents and procedures involved in institutional translation practices, discusses linguistic and genre features of translations, and investigates changes made in translations compared to the original documents, during the two Korean presidencies of Lee Myung-bak (2008–2013) and Park Geun-hye (2013–2017). Choi’s book explores important facets of Korean government translation in the belief that practices associated with the normative meaning and concept of government translation have to be displaced into the wider understanding of the concept of translation as a social construct. Drawing on the theoretical frameworks of institutional translation and critical discourse analysis-informed corpus-based translation studies, the chapters discuss the practice, process and products of Korean government translation. The Korean-English parallel corpus methodology used introduces a systemic way to analyse changes in Korean government translations, based on a personally built sentence-level tagged corpus, both qualitatively and quantitatively. This volume will be of great interest to scholars and students of translation studies as well as Korean studies.

Learning Domain-Specific Transfer Rules: An Experiment with Korean to English Translation ,2002 We describe the design of an MT system that employs transfer rules induced from parsed bitexts and present evaluation results. The system learns lexico-structural transfer rules using syntactic pattern matching, statistical co-occurrence and errordriven filtering. In an experiment with domainspecific Korean to English

translation, the approach yielded substantial improvements over three baseline systems. In this paper, we describe the design of an MT system that employs transfer rules induced from parsed bitexts and present evaluation results for Korean to English translation. Our approach is based on lexico-structural transfer (Nasr et. al., 1997), and extends recent work reported in (Han et al., 2000) about Korean to English transfer in particular. Whereas Han et al. focus on high quality domainspecific translation using handcrafted transfer rules, in this work we instead focus on automating the acquisition of such rules. The proposed approach is inspired by example based machine translation (EBMT; Nagao, 1984; Sato and Nagao, 1990; Maruyama and Watanabe, 1992) and is similar to the recent works of (Meyers et al., 1998) and (Richardson et al., 2001) where transfer rules are also derived after aligning the source and target nodes of corresponding parses. However, while (Meyers et al., 1998) and (Richardson et al., 2001) only consider parses and rules with lexical labels and syntactic roles, our approach uses parses containing any syntactic information provided by parsers (lexical labels, syntactic roles, tense, number, person, etc.), and derives rules consisting of any source and target tree sub-patterns matching a subset of the parse features. A more detailed description of the differences can be found in (Lavoie et. al., 2001).

Winnie-the-Pooh in Korean A Translation of A. A. Milne's Winnie-the-Pooh into Korean A. A. Milne, 2017-08-26 Winnie-the-Pooh is the most popular children's book in the world. Korean is a language read and spoken by eighty million people worldwide, including North and South Korea combined. Korea is perhaps unique in that there are no minority languages there. Everybody there speaks Korean. This translation of this book into Korean is by 최창호 Cho Kyung Sook. Korean is a language isolate. This means that there are no known languages related to Korean. Korean has a unique writing system called Hangul. It was invented by King Sejong (1397-1450). Korean Hangul is written with partices that can be combined in different way to form syllables. Korean can be characterized as a syllabic language rather than an alphabetic language. This translation of Winnie-the-Pooh follows the original book closely, but does add the translator's own minor variations. The purpose of this book is to help Korean speakers learn English and to help English speakers learn Korean. To have a translation as close as possible to the original is the most useful. Ishi Press has reprinted translations of Winnie-the-Pooh into 18 languages thus far. We have published it in Armenian, Bengali, Bulgarian, Chinese, Dutch, Esperanto, Finnish, German, Icelandic, Persian, Polish, Russian, Spanish, Hindi, Urdu, Khowar, Kalasha and Latin. This translation into Korean is part of project to translate Winnie-the-Pooh into other languages. The idea is children need to learn to read at an early age and the best way to teach them to read is to provide reading materials that they find interesting. Children around the world laugh when they see Winnie-the-Pooh saying and doing silly things. Since Winnie-the-Pooh is the most popular children's book world-wide, translating this book into the different languages of the world will be conducive to teaching children to read in those languages.
