The Future of the Nursing Workforce in the United States Peter Buerhaus,Douglas Staiger,David Auerbach,2009-10-06 The Future of the Nursing Workforce in the United States: Data, Trends and Implications provides a timely, comprehensive, and integrated body of data supported by rich discussion of the forces shaping the nursing workforce in the US. Using plain, jargon free language, the book identifies and describes the key changes in the current nursing workforce and provide insights about what is likely to develop in the future. The Future of the Nursing Workforce offers an in-depth discussion of specific policy options to help employers, educators, and policymakers design and implement actions aimed at strengthening the current and future RN workforce. The only book of its kind, this renowned author team presents extensive data, exhibits and tables on the nurse labor market, how the composition of the workforce is evolving, changes occurring in the work environment where nurses practice their profession, and on the public's opinion of the nursing profession.

Active Surveillance for Localized Prostate Cancer
Laurence Klotz,2017-09-29 This fully updated and revised new edition provides a comprehensive, state-of-the art review of this field, and will serve as a valuable resource

for clinicians, surgeons and researchers with an interest in prostate cancer. The book reviews new data about molecular characteristics of the disease, profiles the new grading system for prostate cancer introduced in 2015, and provides new perspectives about imaging of prostate cancer, as well as the role of targeted biopsies. The text summarizes the role of biomarkers and MRI in patient selection and management and details the world wide results of active surveillance. Specific chapters address communication and ethical issues, QOL outcomes, economic aspects, and psycho-social aspects of surveillance. The role of focal therapy for low risk disease is summarized, and the data supporting preventive interventions during surveillance reviewed. This text will serve as a very useful resource for physicians and researchers dealing with, and interested in this common malignancy, as it provides a concise yet comprehensive summary of the current status of the field that will help guide patient management and stimulate investigative efforts.

National Union Catalog ,1982 Includes entries for maps and atlases.

The Epidemiology of Aging Anne Newman,Jane A. Cauley,2012-12-12 The average age of the world's population is increasing at an unprecedented rate and this increase is changing the world. This "Silver tsunami" emphasizes the need to provide advanced training in epidemiology and increase the cadre of experts in the study of aging. This book is designed to summarize unique methodological issues relevant to the study of aging, biomarkers of aging and the biology/physiology of aging and in-depth discussions of the etiology and epidemiology of common geriatric syndromes and diseases. Contributing authors in the book represent many disciplines, not only

epidemiology and clinical geriatrics, but also demography, health services, research, cardiovascular disease, diabetes, psychiatry, neurology, social services, musculoskeletal diseases and cancer. The aim of the book is to provide a broad multidisciplinary background for any student/researcher interested in aging. The material in the book is organized and comprehensive. It represents the most up-to-date information on the scientific issues in aging research written by academics who specialize in research and training in the broad field of aging. The structure and organization of the book reflects our course series in the Epidemiology of Aging starting with the broad issues of demography and methodology, and then addressing specific health conditions and geriatric conditions common to older persons.

Assessing Progress on the Institute of Medicine Report The Future of Nursing National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Committee for Assessing Progress on Implementing the Recommendations of the Institute of Medicine Report The Future of Nursing: Leading Change, Advancing Health, 2016-03-22 Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of

Medicine (IOM) released the report *The Future of Nursing: Leading Change, Advancing Health*, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP *Future of Nursing: Campaign for Action* and others in implementing the recommendations from the 2010 report and identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.

Health Care Provision and Patient Mobility Rosella Levaggi, Marcello Montefiori, 2013-12-11 Patient mobility across Europe is markedly increasing and new generations will actively ask to be treated by the health-care system that best meets their needs. At a political level, the EU issued the EU Directive no. 24/2011/CE of 9th March 2011 concerning the application of patients' rights in cross-border health care and has contributed to improving the level of freedom of choice for the European citizen, but it does not seem to have increased actual patient mobility across Europe. Freedom to choose is necessary to grant the people of Europe the same access to public-sector health-care services. The latter is a key instrument for an efficiently functioning "single market" ensuring real mobility within the EU. The aim of this book is to study the current European health care market and discuss the hypothesis of a European right of citizenship with reference to health-care services. It examines patients' mobility from several perspectives: determinants of patient mobility, governance of cross-border mobility at EU level as concerns patients and health-care professionals, policy implications, and case studies. It is intended for health researchers, decision-makers and professionals concerned with health-care provision and patient mobility. The goal is

to provide, through scientific and methodological rigor, new informative tools useful for the implementation of new policies in the health-care sector in order to implement effective health-care integration in the European Union.

Surgical Decision Making E-Book Robert C.

McIntyre, Richard D. Schulick, 2019-01-08 Using a proven, practical, algorithmic approach, *Surgical Decision Making* summarizes evidence-based guidelines and practice protocols in an easy-to-follow format. Designed to sharpen the decision-making skills of both trainees and practicing surgeons, the 6th Edition directs your focus to the critical decision points in a wide range of clinical scenarios, helping you determine optimal evaluation and management to secure the best possible patient outcomes. Algorithms are accompanied by annotations that explain all critical factors affecting decisions in a concise, readable manner. Reflects the scope of practice of today's general surgeon, with fresh, expert perspectives from new editor Dr. Richard Schulick and numerous new contributors. Contains 58 new chapters and thoroughly revised content throughout. Includes new coverage of Preoperative Evaluation of the Geriatric Patient, Pancreatic Cystic Neoplasm, Familial Breast Cancer, Resuscitative Endovascular Balloon Occlusion of the Aorta, Blunt Cerebrovascular Injury, and much more. Uses an easy-to-follow, consistent format, with an algorithm on one page and short descriptions explaining the various steps in the decision-making process on the opposite page. Includes explanatory notes that summarize presenting signs and symptoms, laboratory investigation, diagnostic modalities, surgical therapies, and adjuvant therapies for each condition. Encompasses both general surgery and surgical subspecialties—helping you directly manage a broad range of problems. Emphasizes information that frequently

appears on board exams.

Bright Lights, Prairie Dust Karen Grassle, 2021-11-16

Karen Grassle, the beloved actress who played Ma on Little House on the Prairie, grew up at the edge of the Pacific Ocean in a family where love was plentiful but alcohol wreaked havoc. In this candid memoir, Grassle reveals her journey to succeed as an actress even as she struggles to overcome depression, combat her own dependence on alcohol, and find true love. With humor and hard-won wisdom, Grassle takes readers on an inspiring journey

through the political turmoil on '60s campuses, on to studies with some of the most celebrated artists at the famed London Academy of Music and Dramatic Arts, and ultimately behind the curtains of Broadway stages and storied Hollywood sets. In these pages, readers meet actors and directors who have captivated us on screen and stage as they fall in love, betray and befriend, and don costumes only to reveal themselves. We know Karen Grassle best as the proud prairie woman Caroline Ingalls, with her quiet strength and devotion to family, but this memoir introduces readers to the complex, funny, rebellious, and soulful woman who, in addition to being the force behind those many strong women she played, fought passionately—as a writer, producer, and activist—on behalf of equal rights for women. Raw, emotional, and tender, *Bright Lights* celebrates and honors womanhood, in all its complexity.

Noninsulin-dependent Diabetes, 1992

Nonprofits for Hire Steven Rathgeb Smith, Michael Lipsky, 2009-06-30 In recent years, government's primary response to the emergent problems of homelessness, hunger, child abuse, health care, and AIDS has been generated through nonprofit agencies funded by taxpayer money. As part of the widespread movement for privatization, these agencies represent revolutionary changes in the welfare state. Steven Smith and Michael Lipsky demonstrate that this massive shift in funds has benefits and drawbacks. Given the breadth of government funding of nonprofit agencies, this first study of the social, political, and organizational effects of this service strategy is an essential contribution to the current raging debates on the future of the welfare state. Reviews of this book: An insightful analysis of the implications of an important, broad trend of the past thirty years in the social welfare

policy of the United States and many other countries...[Smith and Lipsky] demonstrate that we do not have to read about other countries to find a comparative perspective that sheds light on the choices we face in our national health care debate. DD--Bradford H. Gray, *Health Affairs* The most comprehensive account we have of the history, extent, nature, and meaning of delivering social services that are paid for by government and delivered through nonprofit organizations. DD--H. Brinton Milward, *Public Administration Review* An interesting, absorbing, and important book. DD--William T. Gormley, Jr., *American Political Science Review* An important contribution to welfare state scholarship. DD--Kirsten A. Gronbjerg, *Contemporary Sociology*

Families Today Eunice Luccock Corfman, 1979

Prostate Cancer Prevention Jack Cuzick, Mangesh A. Thorat, 2014-02-15 Prostate cancer is by far the most common cancer in men and the second leading cause of death due to cancer. It comprises a mixed group of tumours displaying varying clinical behaviour: while some have a very aggressive course, others are rather indolent. Prevention of prostate cancer and discrimination between aggressive and indolent forms are important clinical goals and the acquisition of significant new evidence on means of achieving these aims makes this book particularly timely. A wide range of topics are covered by leading authorities in the field. The biology and natural history of prostate cancer are reviewed and the role of lifestyle and dietary factors, assessed. Detailed attention is paid to risk prediction biomarkers and to the role of novel high-throughput nucleic acid-based technologies in improving risk prediction and thereby allowing tailored approaches to cancer prevention. Potential means of chemoprevention of prostate cancer are also reviewed in depth, covering the

very positive new data on the impact of aspirin as well as evidence regarding 5 α -reductase inhibitors, DFMO and lycopene. Guidance is provided on the differentiation of aggressive from indolent disease and the policy and research implications of recent findings are examined. This book will be of interest to both clinicians and researchers.
