Manufacturing Government Communication on Covid-19 Philippe J. Maarek,2022-09-10 This book presents a comparative perspective on different government communication strategies to COVID-19 around the globe. Scholars from twenty parts of the world specialized in political and government communication analyze initiatives and methods of various governments' communicative responses to the pandemic. In their contributions to this volume, they examine a wide range of distinct attitudes and reactions facing the crisis. Today's omnidirectional contact allowed by social media, with its load of contradictory rumors and fake news, often obliterates the citizens' ability to comprehend reality. The book frames a broad canvas on how government communication may deal with that and manage similar crises – bound to happen as climate changes and war menaces are generating more and more worries about the future of humanity. This makes this volume a must-read for scholars and students of political communication, health policies and communication, crisis marketing and communication. It will also be of utmost interest for practitioners and policy-makers from these fields willing to better understand government communication and its answer to global crises.

IT Development in Korea Kwang-Suk Lee,2012-03-15 This book investigates the contextual factors that led to Korean society becoming 'broadband heaven' – the most wired nation in the world – by scrutinizing the historical contexts surrounding the Korean Information Infrastructure (KII) project (1995–2005), which aimed to establish a nationwide high-speed backbone network, as well as its later evolution, which involved redesigning the public infrastructure. The book details the hidden mechanisms and the real elements of building the 'broadband heaven': the global constraints conditioning its telecom policies, the dense state–capital linkages, and the bureaucratic desire for social control. It draws on the state-in-society approach to analyze the deformations caused by the symbiosis between the state and big business in implementing the rosy vision of the broadband network. This book provides insights into how to formulate future telecom policies along much more democratically participatory lines while restraining the overwhelming power of the telecom oligopolies and conglomerates. It stands alone as a comprehensive study of the recent East Asian model of IT development, written specifically to examine Korea's socio-historical mechanisms for promoting physical speed and broadband mobility. This book will be important reading to anyone interested in Korean Studies, Information Technology and I.T. Development.

North Korean Military Proliferation in the Middle East and Africa Bruce E. BechtolJr.,2018-09-07 North Korea has posed a threat to stability in Northeast Asia for decades. Since Kim Jong-un assumed power, this threat has both increased and broadened. Since 2011, the small, isolated nation has detonated nuclear weapons multiple times, tested a wide variety of ballistic missiles, expanded naval and ground systems that threaten South Korea, and routinely employs hostile rhetoric. Another threat it poses has been less recognized: North Korea presents a potentially greater risk to American interests by exporting its weapons systems to other volatile regions worldwide. In *North Korean Military Proliferation in the Middle East and Africa*, Bruce E. Bechtol Jr. analyzes relevant North Korean military capabilities, what arms the nation provides, and to whom, how it skirts its sanctions, and how North Korea's activities can best be contained. He traces illicit networks that lead to state and nonstate actors in the Middle East, including Syria, Iran, Hezbollah, and Hamas, and throughout Africa, including at least a dozen nations. The potential proliferation of nuclear and chemical weapons technology and the vehicles that carry it, including ballistic missiles and artillery, represent a broader threat than the leadership in Pyongyang. Including training and infrastructure support, North Korea's profits may range into the billions of dollars, all concealed in illicit networks and front companies so complex that the nation struggles to track and control them. Bechtol not only presents an accurate picture of the current North Korean threat -- he also outlines methodologies that Washington and the international community must embrace in order to contain it.
