A Global Perspective of Young Adolescents' Peer Aggression and Well-being Grace Skrzypiec, Mirella Wyr, Eleni

Didaskalou, 2019-07-19 Reporting on the findings from a study of young people across 11 different world locations (Australia, Mainland China, Greece, India, Indonesia, Italy, Korea, The Philippines, Poland, Spain, and Taiwan), *A Global Perspective of Young Adolescents' Peer Aggression and Well-being* looks beyond bullying to assess the harm to mental health and well-being of young people experiencing peer aggression in all its forms. The first book in a global movement that recommends a new dialogue on peer aggression, this book delves into the poorly understood nexus of peer aggression and bullying through the use of statistical data from questionnaires, as well as the students' own words and illustrations. By considering data from multiple countries, it addresses critical questions about cultural variation in aggression and associated well-being. Addressing the issue that there is a growing focus on other forms of aggression other than bullying, *A Global Perspective of Young Adolescents' Peer Aggression and Well-being* will offer invaluable insight for practicing teachers and school counsellors, as well as any researchers with an interest in the health and well-being of young adolescents.

Dynamic Programming Multi-Objective Combinatorial

Optimization Michal Mankowski, Mikhail Moshkov, 2021-02-08 This book introduces a fairly universal approach to the design and analysis of exact optimization algorithms for multi-objective combinatorial optimization problems. It proposes the circuits without repetitions representing the sets of feasible solutions along with the increasing and strictly increasing cost functions as a model for such problems. The book designs the algorithms for multi-stage and bi-criteria optimization

and for counting the solutions in the framework of this model. As applications, this book studies eleven known combinatorial optimization problems: matrix chain multiplication, global sequence alignment, optimal paths in directed graphs, binary search trees, convex polygon triangulation, line breaking (text justification), one-dimensional clustering, optimal bitonic tour, segmented least squares, optimization of matchings in trees, and 0/1 knapsack problem. The results presented are useful for researchers in combinatorial optimization. This book is also useful as the basis for graduate courses.

It covers a broad range of algorithms in depth, yet makes their design and analysis accessible to all levels of readers, with self-contained chapters and algorithms in pseudocode. Since the publication of the first edition, Introduction to Algorithms has become the leading algorithms text in universities worldwide as well as the standard reference for professionals. This fourth edition has been updated throughout. New for the fourth edition New chapters on matchings in bipartite graphs, online algorithms, and machine learning New material on topics including solving recurrence equations, hash tables, potential functions, and suffix arrays 140 new exercises and 22 new problems Reader feedback–informed improvements to old problems Clearer, more personal, and gender-neutral writing style Color added to improve visual presentation

South Korea's Webtooniverse and the Digital Comic Revolution

Brian Yecies, Ae-Gyung Shim, 2021-04-09 This book investigates the meteoric rise of mobile webtoons – also known as webcomics – and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant – and understudied – aspect of the new screen ecologies and their role in a new wave of media globalisation as we approach the end of the second decade of the 21st century.

Dress History of Korea Kyunghye Pyun, Minjee Kim, 2023-04-20 Bringing together a wealth of primary sources and with contributions from leading experts, *Dress History of Korea* presents the most recent approaches to the interpretation of dress and fashion of Korea. Through close analysis of visual, written, and material sources—some newly excavated or recently re-discovered in global museums—the book reveals how dress and adornment evolved from the period of state formation to the modern era. Authors with a range of academic and curatorial experience discuss the close relation of dress and adornments to the socio-political and cultural history of Korea and place the dress history of Korea within broader contexts in studies of fashion, material culture, museology, and costume design. As in other cultures, modern Korean fashion owes many of its styles to historic dress and this process of adaptation is explored within high fashion and popular culture contexts in ways that benefit historians, curators, and designers alike. With key materials newly available to global readers, *Dress History of Korea* is the indispensable guide to the study of Korean dress and fashion.

The Concept of Care in Curriculum Studies Jung-Hoon Jung, 2015-12-22 The question at the heart of the book is what might an education with self-care and care-for-others look like? Juxtaposing self-understanding through the method of currere and the historical character of hakbeolism (a concept indigenous to Korea referring to a kind of social status people achieve based on a shared academic

background), this book articulates how subjective reconstruction of self in conjunction with historical study can be transformative, and how this can be extended to social change. Articulating how having one's own standard can be a way of making one's life a work of art, the author looks at how Korean schooling exercises coercive care, disconfirmation, and the whip of love for the children's own good. Emphasis is given to the internalized status of these practices in both students and teachers and to teachers' and parents' culpability not only in exercising but also in reproducing these practices through themselves. Going beyond describing and analysing the educational problem of academic (intellectual) achievement-oriented education based on aggressive competition, this book suggests ways to address these issues through autobiography (using the method of *carrere* to reconstruct one's subjectivity) and an ethic of care.

Smartland Korea Dal Yong Jin,2017-02-20 The dramatic advancement of cellphone technology has fundamentally changed our daily lives. Smartphones and their applications have created new capital for information and communication technology corporations and changed the way people communicate. Because of an interesting awareness of the significance for digital economy and people's daily culture, many countries, from the U.S. to China, have massively invested in the smartphone industries since the early 21st century. Among them, South Korea has become one of the centers for technology development and digital culture, although the country was once lagging behind in the penetration of the phones and their apps. Yet within the last few years, the country has taken a big step toward their goal of becoming a 'mobile game wonderland' by appropriating smartphones and it now exists as a curious test-bed for the future of smartphone technology. Smartland Korea, as the first attempt to comprehensively analyze mobile communication in the

context of Korean smartphones, looks into a largely neglected focus of inquiry, a localized mobile landscape, with particular reference to young Koreans' engagement with their devices and applications. Dal Yong Jin focuses not only on the celebratory achievement of technological advancement, but also the significance of social milieu in the development of the smartphones. He situates the emergence of smartphones within the growth of mobile technologies and overall telecommunications industries embedded in Korea's information and communication technologies. The book examines the technology's innovation and the evolution, the digital economy through the lens of political economy, and the youth culture embedded in the Korean smartphone context.
