Corporate Social Responsibility and Governance

Panagiotis Dimitropoulos, Efthalia (Elia) Chatzigianni, 2022-03-10

Corporate social responsibility (CSR) has developed into a crucial corporate and organizational issue around the world. It has been incorporated into various sectors and countries, and includes many types of activities and dimensions. It is a common notion that organizations are more inclined today to broaden and shift their performance focus from short-term goals towards long-term social, environmental, and value-added perspectives. Under the framework of corporate governance, organizations and companies are motivated to promote fairness, transparency, ethics, and accountability in their transactions, while concurrently maintaining enhanced standards of governance. This means that organizations and corporations must align their activities with community aspirations which is an issue falling within the sphere of CSR. Increased attention has been placed on the organizations regarding their approach towards the needs of various stakeholders. However, a crucial issue that this book attempts to address is the association, intersection, and inter-relationship between governance and CSR within the EU region, which are not adequately established in the existing literature. The book will show that governance and CSR are highly connected. With the purpose of studying the association of CSR with legal, managerial and empirical aspects of governance in corporations and not-for-profit organizations, in various sectors of the economy, the book also intends to provide useful policy implications, as well as to offer constructive directions for future research. This book will be of value to researchers, academics, practitioners, policymakers, and students in the fields of CSR and governance, organizational theory, marketing management, business ethics and human

resource management.

The Role and Meaning of Religion for Korean Society Song-Chong Lee, 2019-04-25 This special issue presents discussions of the role and meaning of religion for Korean society. Covering wide-ranging time periods, the authors explore with their own cases four major characteristics of Korean religion: Creativity, Greater Responsiveness, Adaptability, and Prophethood. Their topical religious traditions include Neo-Confucianism, Christianity, Buddhism, and Korean new religious movements.

Comprehensive Nanoscience and Technology

, 2010-10-29 From the Introduction: Nanotechnology and its underpinning sciences are progressing with unprecedented rapidity. With technical advances in a variety of nanoscale fabrication and manipulation technologies, the whole topical area is maturing into a vibrant field that is generating new scientific research and a burgeoning range of commercial applications, with an annual market already at the trillion dollar threshold. The means of fabricating and controlling matter on the nanoscale afford striking and unprecedented opportunities to exploit a variety of exotic phenomena such as quantum, nanophotonic and nanoelectromechanical effects. Moreover, researchers are elucidating new perspectives on the electronic and optical properties of matter because of the way that nanoscale materials bridge the disparate theories describing molecules and bulk matter. Surface phenomena also gain a greatly increased significance; even the well-known link between chemical reactivity and surface-to-volume ratio becomes a major determinant of physical properties, when it operates over nanoscale dimensions. Against this background, this comprehensive work is designed to address the need for a dynamic, authoritative and readily accessible source of information, capturing the full breadth of the subject. Its six volumes, covering a broad spectrum of disciplines including material sciences, chemistry, physics and life sciences, have been written and edited by an outstanding team of

international experts. Addressing an extensive, cross-disciplinary audience, each chapter aims to cover key developments in a scholarly, readable and critical style, providing an indispensable first point of entry to the literature for scientists and technologists from interdisciplinary fields. The work focuses on the major classes of nanomaterials in terms of their synthesis, structure and applications, reviewing nanomaterials and their respective technologies in well-structured and comprehensive articles with extensive cross-references. It has been a constant surprise and delight to have found, amongst the rapidly escalating number who work in nanoscience and technology, so many highly esteemed authors willing to contribute. Sharing our anticipation of a major addition to the literature, they have also captured the excitement of the field itself in each carefully crafted chapter. Along with our painstaking and meticulous volume editors, full credit for the success of this enterprise must go to these individuals, together with our thanks for (largely) adhering to the given deadlines. Lastly, we record our sincere thanks and appreciation for the skills and professionalism of the numerous Elsevier staff who have been involved in this project, notably Fiona Geraghty, Megan Palmer and Greg Harris, and especially Donna De Weerd-Wilson who has steered it through from its inception. We have greatly enjoyed working with them all, as we have with each other.

Information Resources in Toxicology, Volume 2: The Global Arena Steve Gilbert, Asish Mohapatra, Sol Bobst, Antoinette Hayes, Sara T. Humes, 2020-05-15 This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The

editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Opens with an overview of the international toxicology scene, organizations and activities involved with both the science and regulatory framework, and a specific look at the European Union's efforts. Offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals, organizations,

professional societies, universities, poison control centers, legislation, and online databases Provides the Second Edition of the International Union of Pure and Applied Chemistry's Glossary of Terms Used in Toxicology, a carefully constructed and peer reviewed collation of critical terms in the science Concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture Paired with Volume One, which offers chapters on a host of toxicology sub-disciplines, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

Follow the Leader, Lose the Region Jeff

Reeves, 2023-03-01 As competition among the traditional great powers in the Asia region intensifies, Canada faces a stark choice: Should it align its foreign policy with the US-led free and open Indo-Pacific strategy? Shared values give Canada a clear incentive to follow the lead of the United States and Western-aligned democracies, but Jeffrey Reeves presents the case for a foreign policy based on understanding how Asia sees itself. He draws on Asian sources to demonstrate Western misunderstandings of regional developments and to outline alternative, regionally based policy options. *Follow the Leader, Lose the Region* urges the Canadian government to pivot away from the policies of its Western allies in order to chart an independent course that better serves its interests.

Women's Lives around the World [4 volumes] Susan M.

Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04 Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major

part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world, with coverage that includes the education of girls and teens; the key roles women play in their families, careers, religions, and cultures; how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

Part-Whole Reasoning in an Object-Centered

Framework Patrick Lambrix, 2003-06-29 In this book, the author develops an object-centered framework with specialized support of the part-of relation based on description logics. These logics are a family of object-centered knowledge representation languages tailored for describing knowledge about concepts and is-a hierarchies of these concepts. In addition to the representation and reasoning facilities provided by description logics for is-a, representation and reasoning facilities are introduced for part-of. Finally, the feasibility and the usefulness of the approach is demonstrated by applying the framework to various areas including domain modeling, agent-oriented scenarios, document

management and retrieval, and composite concept learning.

Antibiotics - Therapeutic Spectrum and Limitations Amal Kumar Dhara, Amit Kumar Nayak, Debprasad Chattopadhyay, 2023-07-13 Antibiotics: Therapeutic Spectrum and Limitations provides up-to-date information on managing microbial infections, the development and types of antibiotics, the rationale for utilizing antibiotics, toxicity considerations, and the control of antibiotic resistance in one single resource. This book also aims to provide comprehensive insights and current trends on antibiotic therapies to treat microbial infections, their mechanisms of action, and the role of modern drug delivery in improving their efficacy. Written by leading experts from around the globe, the chapters in the book covers important aspects of microbial infections including hospital acquired infections and community acquired infections and adult sepsis, examines the various types of antibiotics with different mechanisms and therapeutic uses, the global challenge of antibiotic resistance, and clinical trials, regulatory considerations, and market overview of antibiotics. Furthermore, the chapters include updated literature reviews of the relevant key topics, high-quality illustrations, chemical structures, flowcharts, and well-organized tables, all of which enable better understanding by the readers. Provides in-depth and updated information and analyses on microbial infections, antibiotics and therapeutics, the consequences of antibiotic resistance, and the role of modern drug delivery in improving efficacy Discusses different types of antibiotics and their mechanisms as well as traditional medicine, herbal drugs, and postbiotics in the treatment and prevention of microbial infections and management of antibiotic resistance Contributed by global leaders and experts from academia, industry, research institutes, and regulatory agencies

International Handbook of Disaster Research Amita Singh,2023-11-04 This handbook is a comprehensive source of information, analysis and directions in disaster studies. It goes beyond the oft-explored issues of management and science related to the topic and explores policies, governance, law and decision-making combined with the processes of implementation and enforcement, all the while integrating the latest science and technology updates related to the topic, such as artificial intelligence and early warning systems. It brings together studies which relate to sociology, politics and institutional economics, which work under the impact of resource availability, issues of leadership and international laws. Disasters are trans-boundary and disaster studies are trans-disciplinary. It is this aspect which would form the fulcrum of contributions and present a new, refreshing and innovative design for the handbook. The transformatory pedagogy which started with the Hyogo Framework for action 2005-2015 and The Sendai Framework for Disaster Risk Reduction 2015-2030 outlines seven clear targets and four priorities for action to prevent new and reduce existing disaster risks. The four priority areas around which the book would revolve are (i) Understanding disaster risk; (ii) Strengthening disaster risk governance to manage disaster risk; (iii) Investing in disaster reduction for resilience and; (iv) Enhancing disaster preparedness for effective response, and to Build Back Better in recovery, rehabilitation and reconstruction.
