From Viridiana Sanchez Santos's quinceañera demonstration against anti-immigrant policy to Zach Wahls's moving declaration that his two moms and he were a family like any other, *No Voice Too Small* celebrates the young people who know how to be the change they seek. Fourteen poems honor these young activists. Featuring poems by Lesléa Newman, Traci Sorell, and Nikki Grimes. Additional text goes into detail about each youth activist's life and how readers can get involved.

Click Here to Start (A Novel) Denis Markell, 2017-08-01 Young fans of Ernie Cline's Ready Player One will love this classic video game inspired mystery filled with elements of Escape from Mr. Lemoncello's Library and From the Mixed Up Files of Mrs. Basil E. Frankweiler. What if playing video games was prepping you to solve an incredible real-world puzzle and locate a priceless treasure? Twelve-year-old Ted Gerson has spent most of his summer playing video games. So when his great-uncle dies and bequeaths him the all so-called treasure in his overstuffed junk shop of an apartment, Ted explores it like it's another level to beat. And to his shock, he finds that eccentric Great-Uncle Ted actually has set the place up like a real-life escape-the-room game! Using his specially honed skills, Ted sets off to win the greatest game he's ever played, with help from his friends Caleb and Isabel. Together they discover that Uncle Ted's "treasure" might be exactly that—real gold and jewels found by a Japanese American unit that served in World War II. With each puzzle Ted and his friends solve, they get closer to unraveling the mystery—but someone dangerous is hot on their heels, and he's not about to let them get away with the fortune. Technology in Medieval India C. 650-1750 Irfan Habib, 2016 This book covers the whole range of technology, from the tools and skills of ordinary men and women to the instruments of astronomers and the equipage and weaponry of war. Changes in technology are carefully traced and their consequences examined. Larger questions, such as those of constraints on technological development and the role of the social and economic environment, are also addressed. This volume, in line with the others of A People's History of India, gives several extracts from texts, containing significant information about specific aspects of pre-modern technology. There are special notes on technical terms, sources of the history of technology, the problem of invention versus diffusion, and the development of medieval technology outside India. It includes illustrations taken from medieval sculpture, painting and book-illustrations. The volume is addressed to the general reader as well as the student, who would like to read about something on which conventional textbooks have little to offer. A special effort is made to keep the style non-technical without loss of accuracy. It is hoped that the theme is sufficiently interesting not only for the historian but for any citizen wanting to know what common people, men and women, did with their hands and tools in earlier times.
