1368 Ali Humayun Akhtar,2022-07-12 A new picture of China's rise since the Age of Exploration and its historical impact on the modern world. The establishment of the Great Ming dynasty in 1368 was a monumental event in world history. A century before Columbus, Beijing sent a series of diplomatic missions across the South China Sea and Indian Ocean that paved the way for China's first modern global era. 1368 maps China's ascendance from the embassies of Admiral Zheng He to the arrival of European mariners and the shock of the Opium Wars. In Ali Humayun Akhtar's new picture of world history, China's current rise evokes an earlier epoch, one that sheds light on where Beijing is heading today. Spectacular accounts in Persian and Ottoman Turkish describe palaces of silk and jade in Beijing's Forbidden City. Malay legends recount stories of Chinese princesses arriving in Melaka with gifts of porcelain and gold. During Europe's Age of Exploration, Iberian mariners charted new passages to China, which the Dutch and British East India Companies transformed into lucrative tea routes. But during the British Industrial Revolution, the rise of steam engines and factories allowed the export of the very commodities once imported from China. By the end of the Opium Wars and the arrival of Commodore Perry in Japan, Chinese and Japanese reformers called for their own industrial revolutions to propel them into the twentieth century. What has the world learned from China since the Ming, and how did China reemerge in the 1970s as a manufacturing superpower? Akhtar's book provides much-needed context for understanding China's rise today and the future of its connections with both the West and a resurgent Asia.

Nomads and Crusaders, A.D. 1000-1368 Archibald Ross Lewis,1988 [A] fine, arresting book with a clear and novel thesis and a firm grasp of geography. Good stuff, in short . . . strongly recommended. -William H. McNeill

The Population History of China (1368-1953) Shuji Cao,2024-02-06 From 1368 to 1953, China's administrative divisions were mainly composed of counties, prefectures, and provinces. This book shows the population figures, density, and changes in the provincial population in China during this period and population figures of each major city and town and its proportion in terms of the provincial population during this period—the urbanization rate. Data in this book is drawn partly from historical sources and partly from statistical-model-based calculations. The book also includes provincial population maps in 1393, and their original statistical models, population databases, and metadata.

The Ming Maritime Trade Policy in Transition, 1368 to 1567 Kangying Li,2010 The Ming maritime policy in transition, 1368-1567 is an unprecedented structural approach to one of the most puzzling phenomena in Chinese early modern history: the maritime trade prohibition from 1368 to 1567. This policy deliberately interdicted its own people from sailing abroad and prevented foreigners from entering China unless they were part of an official tribute mission. Other than treating this phenomenon as an isolated trade policy or defense strategy the author analyzes the policy against the general Chinese historical background from the fourteenth to sixteenth centuries. He approaches the policy as a superstructure established on the foundation of a compatible ideology, the social context, economic institutions and the political power landscape. The 200 years long process of the policy in transition is hence investigated as a 200 years course that witnessed the general transformation of the Ming ideological, social, economic and political structures. It is the historical undercurrent rather than spindrift that appeals to this book's historiography; it is a comprehensive study of the two particular centuries of the Ming society, of which the developments and characteristics have amazed not only historians.

Ming Taizu (r. 1368-98) and the Foundation of the Ming Dynasty in China Hok-lam Chan,2023-05-31 This second collection of studies by Hok-lam Chan focuses on the person and the image of Ming Taizu, the founder of the Ming dynasty, and a powerful, brutal and autocratic emperor who has had a significant impact not only in late imperial China, but also in East Asia, over the last six centuries. Individual studies look at the legitimation of the dynasty, particular military and religious figures, policies of persecution and punishment, and struggles over the succession.

Ming China, 1368-1644 John W. Dardess,2012 This engaging, deeply informed book provides the first concise history of one of China's most important eras. Leading scholar John W. Dardess offers a thematically organized political, social, and economic exploration of China from 1368 to 1644. He examines how the Ming dynasty was able to endure for 276 years, illuminating Ming foreign relations and border control, the lives and careers of its sixteen emperors, its system of governance and the kinds of people who served it, its great class of literati, and finally the mass outlawry that, in unhappy conjunction with the Manchu invasions from outside, ended the once-mighty dynasty in the mid-seventeenth century. The Ming witnessed the beginning of China's contact with the West, and its story will fascinate all readers interested in global as well as Asian history.

China as a Sea Power, 1127-1368 Lo Jung-pang,2012-01-01 Lo Jung-pang argues that during each of the three periods when imperial China embarked on maritime enterprises (the Qin and Han dynasties, the Sui and early Tang dynasties, and Song, Yuan, and early Ming dynasties), coastal states took the initiative at a time when China was divided, maritime trade and exploration subsequently peaked when China was strong and unified, and declined as Chinese power weakened. At such times, China's people became absorbed by internal affairs, and state policy focused on threats from the north and the west. These cycles of maritime activity, each lasting roughly five hundred years, corresponded with cycles of cohesion and division, strength and weakness, prosperity and impoverishment, expansion and contraction. In the early 21st century, a strong and outward looking China is again building up its navy and seeking maritime dominance, with important implications for trade, diplomacy and naval affairs. Events will not necessarily follow the same course as in the past, but Lo Jung-pang's analysis suggests useful questions for the study of events as they unfold and decades to come.

Dictionary of Ming Biography, 1368-1644 Association for Asian Studies. Ming Biographical History Project Committee,Luther Carrington Goodrich,1976 Based largely upon original Ming documents, the Dictionary explores the lives of nearly 650 representative figures, both Chinese and foreign, who influenced the course of almost three hundred years of Chinese history. The articles span all classes, professions, and fields of endeavor, from emperors to artists, soldiers to missionaries, concubines, physicians, and pirates.

China's Second Capital - Nanjing under the Ming, 1368-1644 Jun Fang,2014-05-23 This book is a study of the dual capital system of Ming dynasty China (1368-1644), with a focus on the administrative functions of the auxiliary Southern Capital, Nanjing. It argues that the immense geographical expanse of the Chinese empire and the poor communication infrastructure of pre-modern times necessitated the establishment of an additional capital administration for effective control of the Ming realm. The existence of the Southern Capital, which has been dismissed by scholars as redundant and insignificant, was, the author argues, justified by its ability to assist the primary Northern Capital better control the southern part of the imperial land. The practice of maintaining auxiliary capitals, where the bureaucratic structures of the primary capital were replicated in varying degrees, was a unique and valuable approach to effecting bureaucratic control over vast territory in pre-modern conditions. Nanjing translates into English as Southern Capital and Beijing as Northern Capital.

Agricultural Development in China, 1368-1968 Dwight H. Perkins,2017-07-12 Agricultural Development in China explains how China's farm economy historically responded to the demands of a

rising population. Dwight H. Perkins begins in the year A.D. 1368, the founding date of the Ming dynasty. More importantly, it marked the end of nearly two centuries of violent destruction and loss of life primarily connected with the rise and fall of the Mongols. The period beginning with the fourteenth century was also one in which there were no obvious or dramatic changes in farming techniques or in rural institutions. The rise in population and hence in the number of farmers made possible the rise in farm output through increased double cropping, extending irrigation systems, and much else. Issues explored in this book include the role of urbanization and long distance trade in allowing farmers in a few regions to specialize in crops most suitable to their particular region. Backing up this analysis of agricultural development is a careful examination of the quality of Chinese historical data. This classic volume, now available in a paperback edition, includes a new introduction assessing the continuing importance of this work to understanding the Chinese economy. It will be invaluable for a new generation of economists, historians, and Asian studies specialists and is part of Transaction's Asian Studies series.

Religion and Prison Art in Ming China (1368-1644) Ying Zhang,2020-04-28 Approaching the prison as a creative environment and imprisoned officials as creative subjects in Ming China (1368-1644), Ying Zhang introduces important themes at the intersection of premodern Chinese religion, poetry, and visual and material culture.

Women, Property, and Confucian Reaction in Sung and Yüan China (960-1368) Bettine Birge,2002-01-07 This book, originally published in 2002, argues that the Mongol invasion of the thirteenth century precipitated a transformation of marriage and property law in China that deprived women of their property rights and reduced their legal and economic autonomy. It describes how after a period during which women's property rights were steadily improving, and laws and practices affecting marriage and property were moving away from Confucian ideals, the Mongol occupation created a new constellation of property and gender relations that persisted to the end of the imperial era. It shows how the Mongol-Yüan rule in China ironically created the conditions for radical changes in the law, which for the first time brought it into line with the goals of Learning the Way Confucians and which curtailed women's financial and personal autonomy. The book evaluates the Mongol invasion and its influence on Chinese law and society.
