Atlantic France Nick Chavasse,2023-03-24 From Ouessant in the north to Hendaye on the Spanish border, the third edition of this comprehensive sailing guide to the Atlantic coast of France has, once again, been thoroughly revised and updated by Nick Chavasse aboard his Bowman 40, Wild Bird. His coastal explorations have taken him over drying causeways and under mast-height bridges, up tranquil rivers and around sand-strewn islands and this first-hand familiarity is evident in the extent and depth of coverage. Plans have been revised and updated throughout and there are numerous new photographs to help the navigator identify key features. *Atlantic France* is the authoritative cruising guide for this most popular coastline of historic ports and idyllic anchorages with its sometimes-challenging tides, currents and pilotage.

Pays de la Loire: The Vendée Angela Bird,Murray Stewart,2018-05-08 This new title from Bradt is the only English-language guide to focus on this part of the Pays de Loire: The Vendée and surrounding area including Pornic, La Rochelle, Île de Ré and Nantes, an increasingly popular part of France. Written by award-winning travel writer Murray Stewart and Angela Bird, who for almost 50 years has owned a home in the region, it offers comprehensive coverage of this beguiling area, with details on everything from family holidays to walks, cycling, local cuisine and history. Thanks to the author's long history with the area, the guide also reveals the quirks and themes which give the Vendée its own distinct character, as well as straying just beyond the area's boundaries to incorporate La Rochelle and Nantes, both entry points for those arriving by air and both offering urban distractions for the occasional rainy day. The Vendée offers all the benefits of a well-established destination, both with French and British visitors, with easy access times from the UK by ferry adding to its appeal. Popular with campers and self-caterers, its sunny climate and 140km of sandy beaches, combined with tree-lined canals and open marshland, make for a diverse outdoor playground. Bradt's *The Vendée* and surrounding area includes information on suggested walks and cycleways, and also summarizes the best places for bird-watching. The region has no true cities, or even large towns, but the guide includes details of the many local museums which provide easily accessible insight into the bloody history of an area which has, at times, been central to the evolution of modern-day France.

Management of the Effects of Coastal Storms Philippe Quevauviller,Paolo Ciavola,Emmanuel Garnier,2017-04-24 A large part of the world's coastlines consists of sandy beaches and dunes that may undergo dramatic changes during storms. Extreme storm events in some cases dominate the erosion history of the coastline and may have dramatic impacts on densely populated coastal areas. Policy, research and historical background are essential elements that need to be interconnected for effective coastal planning and management. This

book discusses this framework, with Chapter 1 providing an insight into policy settings and science-policy interactions in the area of coastal risks related to storms and flooding, and integrated coastal zone management. This is followed by a review of the current understanding of the processes generating extreme coastal events, the morphological evolution of coastlines during and after the events, and the methods for monitoring the process as it occurs or for post-event appraisal. The final chapter discusses the importance of historical approaches regarding coastal threats, taking the Xynthia storm as an example.

Advances in Tourism Economics Álvaro Matias, Peter Nijkamp, Manuela Sarmiento, 2009-09-16 'Advances in Tourism Economics' follows his predecessor 'Advances in Modern Tourism Research' (2007) in providing a thorough assessment of state-of-the-art economic research in this rapidly developing field. The authors start by analyzing the recent upsurge of model-based economic research in the field, which builds on powerful tools in quantitative economics, such as discrete choice models, social accounting matrices, data envelopment analyses, impact assessment models or partial computable equilibrium models including environmental externalities. The volume originates from this novel research spirit in the area and aims to offer an attractive collection of operational research tools and approaches. It forms an appealing record of modern tourism economics and positions the field within the strong tradition of quantitative economic research, with due attention for both the demand and supply side of the tourism sector, including technological and logistic advances.

Digues maritimes et fluviales de protection contre les submersions - 2e colloque national - Dignes 2013 ROYET Paul, BONELLI Stéphane, 2013-05-01 Au regard du Code de l'environnement, les digues, considérées comme ouvrages hydrauliques, ne doivent pas rompre de façon dangereuse pour les populations. En tant que moyen de prévention du risque d'inondation ou de submersion, les performances et les limites de ces digues doivent être connues avec précision. Les digues de protection constituent donc une question politique mise en évidence par plusieurs événements récents (Xynthia 2010, la NouvelleOrléans 2005, Rhône aval 2003, Gard 2002, Aude 1999). Cet ouvrage rassemble les contributions présentées lors du 2e colloque national Dignes maritimes et fluviales de protection contre les submersions (Dignes2013), organisé par l'Irstea et Promosciences, les 12, 13 et 14 juin 2013 au Centre des Congrès d'Aix-en-Provence, avec le soutien du MEDDE, du CFBR, et de la Région Provence-Alpes-Côte d'Azur. Il s'adresse aux maîtres d'ouvrages, gestionnaires, concepteurs, constructeurs, enseignants et chercheurs, services de contrôle, organismes financeurs, agissant dans les domaines d'activités liés, directement ou indirectement, à la sûreté des digues maritimes et fluviales.

Reeds PB0 Small Craft Almanac 2022 Bloomsbury Publishing, 2021-11-25 The Reeds PB0 Small Craft Almanac may be more compact and concise than the Reeds Nautical Almanac but it contains a wealth of indispensable navigational data specially tailored for small craft sailors, presented in an easy to find, quick reference manner for on-board use. Streamlined to focus on tidal data (tide tables, tidal streams and tidal curves) and lights, buoys and waypoints, the Small Craft Almanac covers the whole of the UK and Ireland and the west coast of Europe from Denmark to the Gironde. Published in association with Practical Boat Owner magazine, this practical handy Almanac

boasts many unique features for small craft sailors and represents excellent value for money for those who don't need the more comprehensive marina data, passage information and chartlets of the full Reeds Almanac. Meticulously researched, it includes a huge amount of information of value to small craft navigators: tide tables, tidal streams and tidal gates; secondary port differences; 2,500+ waypoints; radio data; light recognition; weather information; principal lights; IALA buoyage; international codes and flags; sun/moon rise/set times; emergency information. Also available: free supplements of up-to-date navigation changes from January to June at: www.reedsnauticalalmanac.co.uk

The Archaeology of Europe's Drowned Landscapes Geoff Bailey, Nena Galanidou, Hans Peeters, Hauke Jöns, Moritz Mennenga, 2020-04-09 This open access volume provides for the first time a comprehensive description and scientific evaluation of underwater archaeological finds referring to human occupation of the continental shelf around the coastlines of Europe and the Mediterranean when sea levels were lower than present. These are the largest body of underwater finds worldwide, amounting to over 2500 find spots, ranging from individual stone tools to underwater villages with unique conditions of preservation. The material reviewed here ranges in date from the Lower Palaeolithic period to the Bronze Age and covers 20 countries bordering all the major marine basins from the Atlantic coasts of Ireland and Norway to the Black Sea, and from the western Baltic to the eastern Mediterranean. The finds from each country are presented in their archaeological context, with information on the history of discovery, conditions of preservation and visibility, their relationship to regional changes in sea-level and coastal geomorphology, and the institutional arrangements for their investigation and protection. Editorial introductions summarise the findings from each of the major marine basins. There is also a final section with extensive discussion of the historical background and the legal and regulatory frameworks that inform the management of the underwater cultural heritage and collaboration between offshore industries, archaeologists and government agencies. The volume is based on the work of COST Action TD0902 SPLASHCOS, a multi-disciplinary and multi-national research network supported by the EU-funded COST organisation (European Cooperation in Science and Technology). The primary readership is research and professional archaeologists, marine and Quaternary scientists, cultural-heritage managers, commercial and governmental organisations, policy makers, and all those with an interest in the sea floor of the continental shelf and the human impact of changes in climate, sea-level and coastal geomorphology.

France: M-Z United States. Office of Geography, 1964 Nearly the whole of America's partisan politics centers on a single question: Can markets solve our social problems? And for years this question has played out ferociously in the debates about how we should educate our children. From the growth of vouchers and charter schools to the implementation of No Child Left Behind, policy makers have increasingly turned to market-based models to help improve our schools, believing that private institutions--because they are competitively driven--are better than public ones. With *The Public School Advantage*, Christopher A. and Sarah Theule Lubiencki offer powerful evidence to undercut this belief, showing that public schools in fact out-perform private ones.
