Babel No More Michael Erard, 2012-01-10 A "fascinating" (The Economist) dive into the world of linguistics that is "part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time" (The New York Times Book Review). In Babel No More, Michael Erard, "a monolingual with benefits," sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots' pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

100 Words To Make You Sound Smart American Heritage Dictionaries, 2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. 100 Words to Make You Sound Smart provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Genetics and Insurance FRANCOIS EWALD,T. McGleenan,Urban Wiesing,2023-05-31 Compiled by a well known and respected team of editors and contributors from interdisciplinary backgrounds, this book has its origins in the Euroscreen project, a research project funded by the European Commission to examine the legal and ethical issues arising from the use of genetic testing and screening since 1990. Contributors from members of a sub-group look at the likely impact of genetic testing on insurance. It will be published at a point when the significant controversy surrounding this issue will have intensified throughout the European Union. Although taking a European perspective, it addresses US issues where there is a strong interest in comparative legislative strategies, taking a themed approach, this book looks comprehensively at the basis issues with an analytical rather than a descriptive approach.
