**Power and the Professional** Gordon W.F. Young, 2020-09-08 No matter who you are or what you aim to achieve, power determines whether you succeed or fail. But while power dynamics permeate every interaction in the workplace, the concept is very poorly understood or managed in practice. Everyone has influence over some people and is under the influence of others, and must choose how to deal with these realities in daily interactions. This book offers a comprehensive and applied understanding of power in a professional scenario: where it comes from, how it moves and what that means in practice for how professionals work together. Drawing on numerous recent case studies, this book offers a toolbox that anyone can apply, including explanations of the different forms of power, the two ways power can move between parties, the perils of power, how to create accountability, the intersection of power and ethics, and tools for maintaining power relationships with both superiors and subordinates. It provides employers and employees alike the means to understand, manage, and exert the power necessary to control their own circumstances.

**Catastrophic Injuries in Sports and Recreation** Charles H. Tator, 2008-12-27 Catastrophic Injuries in Sport and Recreation is an essential reference guide to safe participation in a wide variety of sports and recreational activities. A masterful achievement of methodology, it is the first complete epidemiological study and analysis of all catastrophic injuries in all sports and recreational activities that occurred within a large defined geographical area with a large population: ten million people within the province of Ontario between 1986 and 1995. Concentrating on injuries that resulted in death or long term disability, the contributors identify both the personal risk factors for participants and the societal risk factors that are important causes for these kinds of injuries. Providing detailed analysis of 2154 case studies, the contributors demonstrate what went wrong in each event, and show how each injury could have been prevented. Recommending specific prevention strategies for a wide range of injuries, Catastrophic Injuries in Sport and Recreation is a practical medical reference for athletes and doctors alike.

*Dracula's Desires* Linda Mercury, 2012-09-20 Revealing herself as the Dracula

of legend, much less a woman, should have been Valerie Tate's greatest challenge. But with her longing for blood quenched by the one man she couldn't resist, Valerie now finds herself in an impossible circumstance. . . Out Of The Shadows. . . It's a fact that vampires do not get pregnant. But Valerie is definitely pregnant. Worse, six months ago her lover, Lance Soleil, abandoned her. Determined to find answers, Valerie goes on a quest--one that leads her to Lance's childhood friend, John Janté, a man with whom she shares a strong bond--and an intense lust. But when John is kidnapped, Valerie's attempt to rescue him uncovers more than she bargained for. . . Into The Fire. . . Scouring parallel realms and pocket dimensions, Valerie soon finds that Lance has regained Paradise as Angel of the Lost. . . John is hostage in a bizarre world that resembles Victorian London. . . and most shocking of all, Valerie's greatest love may be within her reach once more. For the soul of Dracula's dead wife, Ilona, is trapped within John's captor, a mad woman robbed of her humanity and manipulated by a conspiracy of Fallen Angels. Now, torn between past and present loves, Valerie must contend with emotions that threaten to break her. And in a desperate show-down, the reunited triad of a vampire, an angel, and a human, must face their deepest fears--with the future of an unborn angel-to-be in the balance. . . Before becoming an author, Linda Mercury had varied careers, including librarian, art model, and professional clown. She holds advanced degrees in both History and Library/Information Science. She lives in Oregon with her husband.

Killer commodities Merrill Singer, Hans A. Baer, 2008-08-15 Killer Commodities enters the increasingly heated debate regarding consumer culture with a critical examination of the relationship between corporate production of goods for profit and for public health. This collection analyzes the nature and public health impact of a wide range of dangerous commercial products from around the world, and it addresses the question of how policies should be changed to better protect the public, workers, and the environment.

**Imposing Values** N. Scott Arnold, 2009-03-20 A major question for liberal politics and liberal political theory concerns the proper scope of government. Liberalism has always favored limited government, but there has been wide-ranging dispute among liberals about just how extensive the scope of government should be. Included in this dispute are questions about the extent of state ownership of the means of production, redistribution of wealth and income through the tax code and transfer programs, and the extent of government regulation. One of N. Scott Arnold's goals is to give an accurate characterization of both modern liberalism and classical liberalism, explaining along the way why libertarianism is not the only form that classical liberalism can take. The main focus of Arnold's book, however, concerns regulation--specifically, the modern liberal regulatory agenda as it has taken shape in contemporary American society. This is the set of regulatory regimes favored by all modern liberals and opposed by all classical liberals. It includes contemporary employment law in all its manifestations, health and safety regulation, and land use regulation. The heart of the book consists of a systematic evaluation of arguments for and against all the items on this agenda. It turns out that there are good arguments on both sides for most of these regulatory regimes. Because of

this, and because someone's vision of the proper scope of government will ultimately prevail, some procedural requirements that all liberals could agree to must be satisfied for one side to impose legitimately its values on the polity at large. These procedural requirements are identified, argued for, and then applied to the elements of the modern liberal regulatory agenda. Arnold argues that many, though not all, of these elements have been illegitimately imposed on American society.

*Right/Wrong* Juan Enriquez, 2021-09-14 A lively and entertaining guide to ethics in a technological age. Most people have a strong sense of right and wrong, and they aren't shy about expressing their opinions. But when we take a polarizing stand on something we regard as an eternal truth, we often forget that ethics evolve over time. Many shifts in the right versus wrong pendulum are driven by advances in technology. Our great-grandparents might be shocked by in vitro fertilization; our great-grandchildren might be shocked by the messiness of pregnancy, childbirth, and unedited genes. In *Right/Wrong*, Juan Enriquez reflects on what happens to our ethics as technology makes the once unimaginable a commonplace occurrence.
